Annual Integrated Rating & Ranking: Power Distribution Utilities (April 2023)

## 11<sup>th</sup> Annual Integrated Rating and Ranking of Power Distribution Utilities

April 2023

आर. के. सिंह R. K. SINGH

विद्युत मंत्री एवं नवीन और नवीकरणीय ऊर्जा मंत्री भारत सरकार Minister of Power and Minister of New & Renewable Energy Government of India

MESSAGE

The power sector in India has seen a transformational growth in the last few years on various fronts such as generation and transmission capacities, improvement in distribution sector and energy efficiency. The Ministry of Power, Government of India aims to ensure 24x7 reliable energy access and simultaneously, accelerate energy transition by shifting to cleaner and renewable energy sources.

India has made tremendous progress on the renewable energy front. India had pledged in NDC in COP 21 in Paris that it will have 40 percent of its power generation capacity by non-fossil resources by 2030. We achieved this target in 2021 – nine years in advance. Renewable energy has already become cheaper than traditional energy in India, due to more than 220% rise in renewable capacity added across India over last 9 years, which has enabled economies of scale in the segment.

There is a strong push from the Govt. of India (GoI) towards the shift for renewable energy resources. A project outlay of INR 19,500 crores was approved for implementation of Productivity Linked Incentive (PLI) Scheme under Tranche II on 'National programme on High Efficiency Solar PV Modules'. This project aims at achieving manufacturing capacity of GW scale in High Efficiency solar PV modules. This scheme is in turn expected to bring direct investment of INR 94,000 crores. Government of India have approved the National Green Hydrogen Mission, which aims to make India a hub for green hydrogen and its derivatives; with a target to bring in INR  $\sim$  8 lakh crore investments by 2030. This will help India in becoming energy independent and in Decarbonisation of major sectors of the economy.

The whole country has been connected to one grid. It is possible to transmit almost 112 GW from one part of the country to the other. It is planned to increase the transfer capacity to 1.50 lakh MW by 2030. We have added nearly 1.6 lakh circuit kilometres lines to our transmission capacity. Today India has more than 4.64 lakh circuit kilometers of power transmission lines, compared to about 2.8 lakh circuit kilometres in 2014.

#### :: 2 ::

The distribution sector has also been strengthened with an outlay of more than Rs. 2 lakh crores over the last 8 years. The strengthening of the distribution system has substantially increased power availability to 22.5 hours in rural areas and approximately 23.5 hours in urban areas.

We have also achieved universal household electricity access. Under the Deen Dayal Upadhyaya Gram Jyoti Yojana, 18,500 villages and lakhs of hamlets were electrified, 1.28 crore households were given access to electricity. A total of about 2.86 crore households have been electrified under SAUBHAGYA scheme.

All these achievements have been possible because of focused initiatives to capitalize on India's potential and address the key challenges faced by entities in the power sector. Power distribution is a decisive driver of the power sector's health, and the Government of India is committed to turn it around in a similar way.

We have taken major steps towards promoting greater financial prudence in the sector and tackling some of its long-standing challenges. The Revamped Distribution Sector Scheme (RDSS) was launched in July 2021 to facilitate a reforms-oriented and results-based financial support structure to modernize the power distribution in India and reduce losses in the sector. National Smart Grid Mission continues to accelerate installation of smart meters.

FY 2021 was a challenging year for the power distribution sector because of COVID, given significant challenges in customer billing & collections, and unforeseen decrease in power demand during the multiple COVID waves and associated lockdowns. The Government supported the sector during the difficult period through liquidity infusion under Aatma Nirbhar Bharat Abhiyan.

The sustained efforts by Gol through RDSS Scheme and other reform initiatives has helped the distribution sector to bounce back strongly in FY 2022 to record tremendous progress on many key indicators. AT&C losses, which capture the operational efficiency of power distribution entities, have improved to 17% in FY2022, a reduction of ~8% since 2015. Similarly, the cash-adjusted ACS-ARR Gap which captures financial losses in the sector, has reduced by more than 50% from FY 2020 to FY 2022.

#### :: 3 ::

Late Payment Surcharge (LPS) Rules were notified in June 2022 to tackle the mounting payables of power distribution entities to Gencos and Transcos. The rules provide the mechanism for settlement of outstanding dues as well as provisions to encourage distribution utilities to make timely bill payments. Energy accounting and audit was made mandatory in Oct 2021 for all power distribution utilities to identify area of power theft, losses, thereby enabling them to take focused steps for improving their billing efficiency.

Tariff Subsidy by the State Governments form a significant part of the revenue of the distribution utilities. However, due to enforcement of RDSS and LPS schemes and Integrated Ratings, State Governments are now required to release cash towards subsidies booked by the state distribution utilities. For the first time in FY22, aggregate Subsidy disbursement by State Governments has crossed 100% of subsidy booked and system wide subsidy arrears have decreased by ~15%.

Additionally, Integrated Ratings have been linked to lending terms offered by state lenders in the sector, thus reinforcing these ratings as the fundamental performance barometer in the sector. Through these initiatives, we are on track to bring down the AT&C losses to 12-15%, ACS-ARR gap to zero and subsidy arrears to zero by 2025.

The 11th Integrated Rating continues with the comprehensive review undertaken during 10th Integrated Ratings. The stakeholders would be able to directly compare performance between FY 2021 and FY 2022 through interactive digital dashboard, urjadrishti.com. It will provide users with the results of the integrated rating exercises and rich sector analysis. Further, the ratings are dynamic and will be revised for individual Discoms if there are important updates during the year.

I congratulate PFC & REC for completing this important annual exercise well in time. The stakeholders will find this report and dashboard immensely helpful in understanding the distribution sector's strengths and challenges, and in fostering further performance improvement. I am certain that with the help of this rating exercise, RDSS, LPS and other government measures, we will succeed in achieving a complete turnaround of the entire power distribution sector.

#### संदेश

भारत निकट भविष्य में विश्व की सबसे बड़ी अर्थव्यवस्थाओं में अपना स्थान बनाने की दिशा में तेजी से अग्रसर है, जिसके लिए तीव्र गति से हो रहा औद्योगीकरण और शहरी करण अवश्यंभावी है। अर्थव्यवस्था की इस प्रगति में बिजली क्षेत्र की महत्वपूर्ण भूमिका है। पिछले कुछ वर्षों में देश के बिजली क्षेत्र ने कई उपलब्धियां हासिल की हैं। बिजली की पहुंच अब हर जगह है। साथ ही बिजली की उपलब्धता में भी सराहनीय वृद्धि हुई है। इसका श्रेय बिजली उत्पादन की स्थापित क्षमता में त्वरित वृद्धि और राष्ट्रीय ग्रिड को मजबूत करने की दिशा में किये गए प्रयासों को जाता है। हमने अपनी स्थापित बिजली क्षमता में गैर-जीवाश्म ईधन की हिस्सेदारी के संदर्भ में भी अपने लक्ष्यों में बहुत अच्छा प्रदर्शन किया है।

जैसा कि विदित है, इन प्रयासों से बिजली उत्पादन और पारेषण क्षेत्र में अमान परिवर्तन हुआ है, साथ ही, बिजली वितरण क्षेत्र में भी इन सुधारों के परिणाम मिले हैं – उदाहरण के लिए, 2015 के बाद से AT&C हानियों में लगभग 7% की कमी आई है – लेकिन अभी भी इस क्षेत्र में बहुत कुछ किए जाने की आवश्यकता है। आज भी बिजली वितरण प्रणाली, बिजली क्षेत्र की आपूर्ति श्रृंखला की सबसे कमजोर कड़ी बना हुआ है। संचालन और बुनियादी ढांचे की कमियों के कारण अधिकांश बिजली वितरण कंपनियों को बड़ा नुकसान हो रहा है। जिसके कारण विद्युत क्षेत्र की उत्पादन और पारेषण कंपनियों की भारी रकम इन बिजली वितरण कंपनियों पर बकाया है। इन बिजली वितरण कंपनियों के बही खाते में कुल कर्ज काफी हद तक बढ़ गया है और यह पूरे बिजली एवं वित्तीय क्षेत्र के लिए चिंता का विषय है।

इस संदर्भ में, मुझे यह साझा करते हुए खुशी हो रही है कि रीवैम्पड डिस्ट्रीब्यूशन सेक्टर स्कीम (आर.डी.एस.एस.) और एडिशनल प्रुडेंशियल नॉर्म्स जैसी नई पहलों ने बिजली वितरण क्षेत्र में परिवर्तन लाना शुरू कर दिया है। विलंब भुगतान अधिभार और संबंधित मामले नियम (एलपीएस), 2022 के कार्यान्वयन से उत्पादन और पारेषण कंपनियों की बकाया राशि को चुकाने में काफी मदद मिल रही है। इन्हीं प्रयासों से वित्तीय वर्ष 2022 में वितरण क्षेत्र में उल्लेखनीय सुधार हुआ है।

कमरा नं. 200, श्रम शक्ति भवन, रफी मार्ग, नई दिल्ली—110001 • फोन : 011—23720450, 23720451, 23720452 Room No. 200, Shram Shakti Bhawan, Rafi Marg, New Delhi-110001 • Phone : 011-23720450, 23720451, 23720452 एकीकृत रेटिंग इस क्षेत्र में चल रहे प्रयासों की सफलता को आँकने में काफी मददगार साबित होगी। मुझे खुशी है कि हमने इस बार डिस्कॉम की वास्तविक वित्तीय स्थिति को समझने के उद्देश्य से रेटिंग में कई रणनीतिक बदलाव किए हैं। पहली बार न केवल नकद-समायोजित आकड़े पेश किए गए हैं, बल्कि यह सुनिश्चित करने के लिए मजबूत प्रक्रियाएं भी रखी गई हैं कि रेटिंग की समय-समय पर समीक्षा की जाती रहे और यह हमेशा अद्यतन रहें।

11वीं एकीकृत रेटिंग में हमने 10वीं एकीकृत रेटिंग के प्राधार को अपरिवर्तित रखा है। हमने संपूर्ण क्षेत्र की कवरेज के लिए निजी डिस्कॉम और विद्युत विभागों को भी शामिल किया है। इस कार्य विधि में नया डैशबोर्ड उर्जा दृष्टि डॉट कॉम (urjadrishti.com) विकसित किया गया है जो नवीनतम रेटिंग और स्कोर के साथ अपडेट किया जाएगा। यह पारदर्शिता हमें एक व्यवस्थित तरीके से समस्याओं का समाधान करने में मदद करेगी। साथ ही ऋणदाता भी इस क्षेत्र को अधिक विवेकपूर्ण तरीके से ऋण देने के लिए डिस्कॉम रेटिंग का उपयोग करने में सक्षम होंगे।

11वीं एकीकृत रेटिंग डिस्कॉम नेतृत्व के लिए भी बेहद मूल्यवान सिद्ध होगी। रैंकिंग और रिपोर्ट उनकी समग्र विशिष्टता एवं खामियो के साथ-साथ उन के सामने आने वाली चुनौतियों पर भी प्रकाश डालने में मदद करेगी। यह उन्हें कार्य-निष्पादन में सुधार के लिए क्षेत्रों की पहचान करने में भी मदद करेगी, जिसका उपयोग कार्य-योजनाओं को बनाने और लागू करने के लिए किया जा सकता है। इस रिपोर्ट में उल्लिखित सर्वोत्तम कार्य-प्रणालियाँ हाल के दिनों में प्रमुख भारतीय डिस्कॉमों द्वारा की गई वास्तविक कार्रवाइयों पर आधारित हैं और पूरे भारत में सभी डिस्कॉमों के लिए प्रासंगिक होंगी।

मैं इस महत्वपूर्ण कार्य योजना में शामिल सभी कर्मचारियों को बधाई देता हूं और बिजली वितरण क्षेत्र के समग्र विकास और प्रगतिशील परिवर्तन लाने के लिए सभी हितधारकों की भागीदारी की आशा करता हूं।

(कृष्ण पाल गुर्जर)

आलोक कुमार, भा.प्र.से. सचिव भारत सरकार Alok Kumar, I.A.S. Secretary Government of India

सत्यमेव जयते Ministry of Power Shram Shakti Bhawan New Delhi - 110001

विद्युत मंत्रालय श्रम शक्ति भवन नई दिल्ली–110001 Tele : 23710271/23711316 Fax : 23721487 E-mail : secy-power@nic.in

India's power sector is playing a key role in India's progress toward sustainable growth. India possesses huge renewable energy potential and is already one of the cheapest producers of renewable power globally. With targeted focus on boosting renewable manufacturing, including solar panels and green hydrogen, India is well poised to become a global leader in green energy in the next few years.

Despite unprecedented growth achieved in the last decade, the biggest challenge for the India's power sector continues to be the restoration of the financial viability of the distribution utilities. The distribution sector is plagued by the legacy issues relating to unsustainable debt, huge outstanding payables to GenCos and TransCos, subsidy arrears, etc. The government has undertaken several initiatives to transform this sector.

One of the flagship initiatives recently undertaken by Central Government has been the launch of the RDSS which intends to improve the operational efficiencies and financial sustainability of all state-owned Discoms / Power Departments by providing conditional financial assistance for strengthening of supply infrastructure. The major focus of RDSS is on loss reduction through development of smart metering infrastructure. It is heartening to note that almost every state has come forward to commit to reforms under the scheme for the turnaround of the discoms. The notification and implementation of the LPS rules, 2022 to reduce payables to Gencos & TransCos is another major intervention by the Ministry of Power. This is expected to enforce payment discipline by the State Governments. Other intervention which address key sectoral challenges include National Smart Grid Mission, mandatory Energy Accounting of DISCOMs etc.

Further, the Ministry had formulated the Integrated Rating Methodology in July 2012 to enable annual assessment of power distribution utilities' performance on a range of parameters. A comprehensive review of the Integrated Rating Methodology was undertaken last year for effecting improvements based on the suggestions received from utilities and other stakeholders and also keeping in view various developments in the sector. The Ratings have been made dynamic to capture any major triggers that might affect discoms' financial performance through the year. An interactive digital dashboard has also been put in place which would allow stakeholders

(discoms, lenders and policy makers) to easily access data on sectoral trends, discom performance, underlying drivers for rating outcomes, etc.

I am sure that the year on year and relative evaluation of utilities based on the information contained in the Rating report and Dashboard would provide rich insights on their performance against various financial and operational parameters and enable management of the utilities to take suitable measures to achieve financial sustainability and higher operational efficiency.

I am happy to note that the latest 11th Annual Integrated Rating and Ranking exercise covering 71 Power Distribution Utilities for the rating period FY 2021-22 has been completed in a timely manner with the active co-operation and support of all the utilities.

These Ratings have created immense impact, with public sector lenders already linking the ratings to their lending rates and other terms. I am sure that 11th Integrated ratings would drive valuable insights into the distribution sector, and I hope to see a further significant improvement in outcomes in the sector in the years to come.

Note

(Alok Kumar)

This report captures the outcomes and insights from the Eleventh (11<sup>th</sup>) Integrated Rating and Ranking Exercise, as per the framework approved by the Ministry of Power, with Power Finance Corporation Limited (PFC) as the nodal agency.

REC Limited provided feedback and inputs on the exercise. The utilities across states were also forthcoming with sharing data and other important inputs during the exercise.

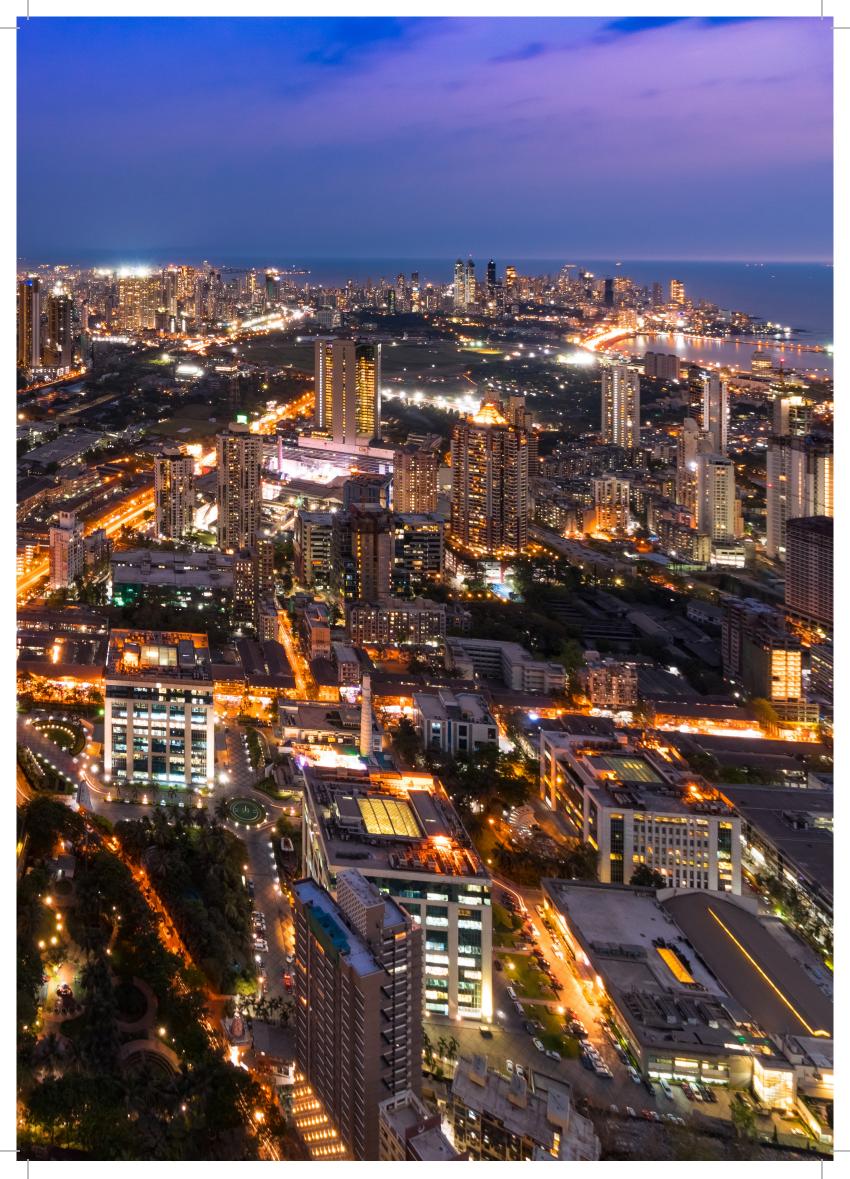

McKinsey & Company Inc. carried out the 11<sup>th</sup> Integrated Rating and Ranking Exercise. McKinsey undertook detailed analysis based on audited and provisional accounts of power distribution utilities, developed sectoral themes and provided suggestions for the 11th Integrated Ratings. Additionally, McKinsey has also developed an dynamic, interactive dashboard for distribution sector (Urjadrishti.com). Mckinsey was supported by Feedback Infra Private Limited which was subcontracted for data analysis and utility outreach.

The Committee constituted for the 11<sup>th</sup> Integrated Rating Exercise – with Member (E&C), Central Electricity Authority (CEA), Director, National Institute of Public Finance and Policy (NIPFP), Director (Commercial), PFC and Director (Technical), REC – also contributed to the recommendations for the report. The Eleventh (11<sup>th</sup>) Integrated Rating and Ranking of the Power Distribution Utilities has been approved by the Ministry of Power.

Except where otherwise stated, all data in this report is sourced from audited and provisional annual accounts of 69 participating power distribution utilities, tariff and true-up orders issued by various regulatory commissions, RDSS plans, other supporting information submitted by the power distribution utilities for the rating exercise.

S

The Indian power sector has accomplished remarkable feats over the last few years, from nearly achieving universal electrification, creating a national grid, launching power exchange markets, to turning power surplus. The surging renewable energy capacity will play a critical role in achieving Net Zero by 2070 and help India emerge as a global clean energy hub. Meanwhile, rising investments into the sector, especially in solar energy, green hydrogen and Battery Energy Storage Systems (BESS), promise continued growth.

Despite these wins, the industry is battling significant challenges, particularly in the distribution sector. The power distribution sector is currently facing financial losses, climbing debt and dues to power generators. COVID-19 and resulting lockdowns added to these woes: commercial and institutional power demand dropped as the world began working from home, long lockdowns limited industrial activity, lowering billing and collection efficiency, ultimately adding to financial losses and liquidity crunch.

The government has addressed these issues by launching major reforms including, RDSS (Revamped Distribution Sector Scheme), Late Payment Surcharge Rules 2022, Additional Prudential Norms for lending by financial institutions, National Smart Grid Mission, and mandating energy accounting and auditing. While these programs have reinvigorated the sector, some of the larger legacy issues will need more time and interventions to be resolved.

The Annual Integrated Rating Exercise, carried out under the approval and guidance of the Ministry of Power since 2012 plays an important role in addressing these challenges. It is a transparent, authentic source<sup>1</sup> that allows all stakeholders in the power distribution sector to gauge their performance and take greater ownership of their operations. The ratings provide a blueprint for stakeholders to assess performance, identify gaps, measure impact of steps taken and plan ahead.

This report publishes results and insights from the 11<sup>th</sup> edition of this annual exercise, conducted with the Power Finance Corporation Limited as the nodal agency. It covers 71 power distribution utilities comprising 45 state discoms, 14 private discoms and 12 power departments across India.

Except where otherwise stated, all data in this report is sourced from audited and provisional annual accounts of 69 participating power distribution utilities, tariff and true-up orders issued by various regulatory commissions, RDSS plans, other supporting information submitted by the power distribution utilities or obtained from Ministry of Power and its agencies.

## Key insights from the 11<sup>th</sup> Integrated Rating Exercise

The power distribution sector recorded major improvements across key parameters in FY22, largely helped by the following actions:

- Government made great efforts to support the sector: Aggregate subsidy disbursal was higher than the subsidy booked during the year. In addition, Government has taken over discom loans over FY20-FY22, which have also been converted into equity, thus easing their debt obligations.
- Utilities improved their collection efficiency: Improved subsidy disbursal by state government as well as better customer collections by discoms helped achieve this. As a result, AT&C losses improved to 16.5 percent in FY22, almost 5 percent lower than FY21 and 3 percent lower than FY20 levels
- State regulators were more responsive: 65 out of 71 utilities published new tariffs for FY23, compared to 58 utilities in FY22

However, there remains room for improvement:

- Days payable, while improving from 175 days in FY21 to 163 days in FY22, but can be reduced further
- Subsidy arrears stood at INR 66,000 crore at the end of FY22

### Major trends in the sector

- 1. Financial deficit nearly halved in FY22, compared to FY20, despite an 8 percent increase in gross input energy
  - Sectoral absolute cash-adjusted gap (between expenditure and income) dropped substantially to INR 53,000 crore in FY22 from INR 97,000 crore in FY20.
  - This was driven by significant improvement in the ACS-ARR gap, which captures the cash-adjusted gap per unit. The power distribution entities were recording a loss of 79 paise per unit energy in FY20, which reduced to only 40 paise per unit energy in FY22.
  - State discoms from five states: Rajasthan, Maharashtra, Karnataka, Madhya Pradesh and West Bengal improved their performance the most. Together, their absolute cash-adjusted gap reduced by about INR 43,000 crore over FY20-FY22.
  - Twelve utilities JdVVNL, GESCOM, MePDCL, JVVNL, MESCOM, CHESCOM, AVVNL, MPPoKVVCL, UPCL, BESCOM, Sikkim PD, MPMKVVCL – improved their ACS-ARR (cash-adjusted) gap by more than 1.0 INR / kWh during FY20-FY22.

- Improving financial deficit can be further broken down into three trends:
  - Full Subsidy disbursement in FY22 by states on aggregate basis, compared to shortfall of INR 23,000 crore in FY21
  - Shortfall in cash collection improved from INR 38,000 crore in FY20 to INR 24,000 crore in FY22
  - **Profit Before Tax (accrual)** rose by about INR 8,000 crore between FY20-FY22, helped by an increase in nontariff subsidy (subsidies provided under various center/state schemes, such as UDAY, AtmaNirbhar Bharat, etc. to support financially weaker discoms)
- Ten states (13 utilities) did not publish tariff orders for FY22 which impacted FY22 financials. The situation improved with only 6 utilities/ 4 states (BRPL, BYPL, TPDDL (Delhi); JBVNL (Jharkhand); IPCL (West Bengal) and Arunachal PD) not publishing tariff orders for FY23.

### 2. Aggregate subsidy disbursement (including non-tariff subsidy) by state governments crossed 100 percent of all subsidy amounts booked in FY22, compared to 95 percent in FY20 and 85 percent in FY21

- Of the 24 states providing subsidies to respective discoms, 17 disbursed 100 percent or more of the total subsidy booked. Six states showed most improvement in subsidy disbursal: Karnataka, Rajasthan, Madhya Pradesh, Maharashtra, Andhra Pradesh, and Punjab.
- Shortfall in subsidy disbursement by state governments has been contributing to multiple issues in the power distribution sector.
- Tariff subsidy disbursement (intrinsic part of state discoms' revenues) was 109 percent in FY22. States disbursed INR 156,500 crore of tariff subsidy as against INR 143,000 crore of amount booked in FY22, thus clearing some of their past arrears.

### 3. AT&C losses have improved to 16.5 percent in FY22; significantly lower than 19.9 percent in FY20 and 21.5 percent in FY21.

- AT&C losses increased sharply in FY21 driven in part by impact of COVID-19 on both collection and billing efficiency.
- In FY22, AT&C losses improvement was driven by collection efficiency, which rose from 93.1 percent in FY20 to 97.2 percent in FY22. Billing efficiency remained constant at ~86 percent during the same period.
- Further breakdown of the 3 percent improvement in AT&C losses shows that it was driven by both subsidy disbursement by states and customer collections. The latter points to an encouraging trend in the sector, indicating improved customer billing collections by discoms up from 92.7 percent in FY20 to 96.0 percent in FY22.
- 44 utilities improved their AT&C losses, of which 19 improved by more than 5 percent when compared to FY20 levels. The top improvers (>10 percent AT&C improvement) were TSNPDCL, JdVVNL, SBPDCL, DVVNL, JVVNL, MPMKVVCL, and CHESCOM.
- In case of distribution losses, 33 utilities did not achieve the targets set by respective State Electricity Regulatory Commissions (SERC) in FY22. The government schemes, such as RDSS, aim to improve billing efficiency by way of installation of smart meters and achieving approved trajectories.

There were notable improvements in trade receivables, trade payables and debt in the sector. These legacy challenges were worsened due to COVID-19 impact: receivables rose due to impact on customer billings and payments, payables surged because of significant financial loss and mounting receivables, while debt increased due to a combination of these factors. However, these parameters recovered in FY22.

#### 4. Pace of debt addition slowed down considerably in FY22, DSCR turned positive

- While total sectoral debt rose 24 percent to INR 6.20 lakh crore over FY20-FY22, the pace of debt addition slowed considerably. Debt increased by INR 34,000 crore in FY22, versus INR 85,500 crore in FY21.
- Debt Service Coverage Ratio (DSCR) turned positive in FY22 improving from -0.07 to 0.43 from FY20 to FY22, driven by a higher cash adjusted EBITDA.
- Discoms in four states: Tamil Nadu, Uttar Pradesh, Rajasthan and Madhya Pradesh, together held 57 percent of the sector's debt.
- Government also infused significant equity in the discoms / taken over discom loans over FY20-FY22, thus easing their debt obligations.
- With improving payables, receivables and subsidy disbursement by states, the working capital condition can be expected to improve further and play its part in reducing additional debt requirements.

#### 5. The sector cleared-off higher payables from FY21, to reach pre-COVID-19 levels

- The days payables returned to pre-COVID-19 levels in FY22, reducing to 163 days from 175 days in FY21. The return is notable given that payables to GenCos & TransCos increased significantly in FY21 and the utilities had to clear these additional dues in FY22.
- Utilities in Rajasthan, Uttar Pradesh and Uttarakhand improved days payable by more than 50 days over FY20-FY22.
- However, days payable remains higher than desired levels. Recognizing this Government has implemented LPS Rules in June 2022. This represents a major reform towards resolving the legacy outstanding payables towards GenCos and TransCos. The Rules provide the mechanism for settlement of outstanding dues as well as provisions to encourage distribution utilities to make timely bill payments.

#### 6. Days receivable recovered significantly

- Days receivable significantly reduced to 142 days in FY22 from 157 days in FY21, but still higher than benchmark levels.
- Four utilities contributed to approximately 50 percent of India's net trade receivables in FY22 MSEDCL, PuVVNL, MVVNL and DVVNL.
- The net trade receivables stood at INR 2.42 lakh crore at the end of FY22, which is higher than FY20 level. If this quantum of trade receivables gets reduced to benchmark levels, it would help in clearing the discoms' payables to GenCos and TransCos to a large extent.

#### 7. Regulatory assets were flat in FY22, subsidy arrears declined but remain significant

- The sector's regulatory assets were stagnant over FY20-FY22 at INR 1.6 lakh crore, highlighting the need for greater state efforts to clear dues through appropriate tariff increments/capital support/efficiency measures. To address the challenge, the states are being pursued to formulate liquidation plans and non-creation of new regulatory assets going forward.
- Five states Tamil Nadu, Rajasthan, Delhi, Maharashtra, Kerala contributed heavily to the sector's regulatory assets. As per the latest tariff order for TANGEDCO, regulatory assets of INR 89,000 crore have been recognized. Maharashtra has carried out significant liquidation of regulatory assets.

## Other highlights

- All discoms covered under the 11<sup>th</sup> Integrated Rating Exercise have submitted their audited financial accounts, except for Jammu, Kashmir and Meghalaya for these only provisional accounts have been received.
- Integrated scores improved for 46 out of 57 discoms covered in 11th Integrated Ratings.
- 35 utilities improved their cash adjusted ACS-ARR gap performance over FY20-FY22. Of these 12: Karnataka discoms, Rajasthan discoms, MePDCL, MPPoKVVCL, UPCL, Sikkim PD, MPMKVVCL, improved it by more than INR 1.0 per kWh.
- Of the 41 state owned discoms, where subsidy was booked in FY22, 32 reported receiving 100 percent or more of all subsidy amounts booked.
- Out of the 24 states which booked tariff subsidy, 18 states disbursed 100 percent or more of the amount (Karnataka, Maharashtra, Rajasthan, Punjab, Chhattisgarh, Madhya Pradesh, Assam, Haryana, Gujarat, Uttar Pradesh, Telangana, Tamil Nadu etc.). The remaining six states (Andhra Pradesh, Meghalaya, Delhi, Bihar, Himachal Pradesh, Tripura) disbursed 87 percent or more.
- Average billing efficiency for FY22 was 85.9 percent. 15 utilities reported billing efficiency greater than 92 percent, whereas 18 utilities reported it less than 82 percent. These utilities contributed 17 percent and 18 percent of total energy consumption, respectively. Billing efficiency improved by more than 3 percent over FY20-FY22 for 5 Discoms: SBPDCL, TSECL, UHBVNL, MPMKVVCL, WBSEDCL.
- 23 utilities achieved 100 percent collection efficiency. 18 utilities reported the collection efficiency metric improving by more than 5 percent.
- 21 discoms had cash adjusted DSCR of more than 1.1 in FY22. These are Gujarat discoms, Karnataka discoms, Delhi discoms, Haryana discoms, DNHPDCL, AEML, NPCL, TPML, TPWODL, MSPDCL, UPCL and CESC.
- 15 discoms had adjusted quick ratio of more than 1.0 in FY22. These are Gujarat discoms, DNHPDCL, AEML, NPCL, 3 Odisha discoms, IPCL, PSPCL, TSECL, MPPaKVVCL and APEPDCL.
- 27 utilities recorded days receivable of less than 60, and 27 utilities had days payable lower than 60.
- 15 Discoms received almost no Specific Disincentives. These include Gujarat discoms, Haryana discoms, Odisha discoms, AEML, TPML, NPCL, MPPaKVVCL and CHESCOM.
- 14 discoms scored more than 10 marks vis-à-vis maximum of 13 marks in performance excellence dimension (i.e., billing efficiency, collection efficiency, corporate governance, distribution loss -SERC Approved).
- 27 discoms scored more than 10 marks vis-à-vis maximum of 12 marks in external environment dimension (i.e., subsidy realized, loss takeover by state government, government dues, tariff cycle timelines, auto-pass through of fuel costs).
- Tariff orders for FY23 were issued for 65 of 71 utilities in the country. Four State/UT regulators did not issue them, including Arunachal Pradesh (power department), West Bengal (for IPCL), Delhi (BYPL, BRPL, TPDDL) and Jharkhand (JBVNL).
- FY21 True up orders were issued for 52 out of 71 utilities. The ones yet to issue were utilities from the State / UTs of West Bengal, Telangana, Jharkhand, Meghalaya, Mizoram, Tripura, Nagaland, Arunachal Pradesh, Goa, J&K, Andaman & Nicobar Islands, Lakshadweep and Delhi.
- 35 of 69 utilities covered in ratings implemented auto pass-through of fuel costs.

As part of the 11th Integrated Exercise, a set of best practices have also been identified that discoms can follow to improve their billing and collection efficiencies and manage working capital better. These include:

- Digitize bill generation and payment: Partner with popular mobile applications to deliver electricity bills; partner with UPI gateways and banks apps to facilitate online payments and reduce delays in collections
- Employ advance meter reading capabilities: Reduce bill reading errors by automating the process with tools such as AI-based apps to read meters from images, optical cable to connect with meters and download data
- Leverage analytics to reduce theft, fraud: Build an analytics team and equip it with MIS (Management Information System) reports to identify power theft and frauds. Employ dedicated vigilance squads for surveillance, use drones to monitor larger areas
- Build capabilities: Invest in technological capability among employee through tie-ups with academic institutes in • power sector (National Power Training Institute, Electrical Research and Development Association etc.). Deploy ERP systems, robotic processes to automate regular processes
- Optimize KPIs: Re-evaluate payment terms if the discom has hired billing/collection agencies, institutionalize division-wise targets for greater accountability
- Improve accounting processes: Follow accounting standards (IND-AS) as prescribed under the Companies Accounting Standard Rules, maintain records of ageing trade receivables in guarterly or annual accounts

Further, the rating exercise has also launched an interactive digital dashboard (Urja DRISHTI), accessible at urjadrishti. com, to promote transparency in the sector for discoms, lenders and policy makers. The dashboard allows stakeholders to access present and past sectoral trends, identify underlying drivers for rating outcomes, compare performance across entities and prepare for further improvements.

#### About the 11th Integrated Rating Exercise

The 11<sup>th</sup> Integrated Rating Exercise methodology consists of 15 base rating metrics and 9 disincentives, which together lead to a score—out of 100—to holistically capture every discom's performance.<sup>2</sup> Based on these scores and specific overriding conditions<sup>3</sup>, the discoms are then assigned grades (A+, A, B, B-, C, C- and D).

The 11<sup>th</sup> Integrated Rating Exercise maintains the same rating framework as the 10<sup>th</sup>, thus allowing stakeholders to easily compare their performance with that from the previous year, identify key trends and gauge the impact of measures taken. It also brings forth persistent areas of concern that need resolution.

Exhibit 1

#### Summary of the 11th Integrated Rating Methodology for State & Private discoms

15 Base Metrics and 9 Specific Disincentives

|  |                     |                                     |          |                                      |     | Red car                                 | d metric |

|  |                     | Spec                                | ific Dis | incentives <sup>1,2</sup>            |     |   |          |
| <ul> <li>Auditor's<br/>Adverse Opinion</li> </ul>        | -15                 | Audit Qualificatio                  | ons      | -4                                   |     | Fariff Independent<br>of Subsidy        | -1       |
| <ul> <li>Availability of<br/>Audited Accounts</li> </ul> | -15                 | Governance (Aud<br>Exclusive MD & [ |          |                                      |     | Jncovered Revenue<br>Gap (Current Year) | -4       |
| <ul> <li>Default to<br/>Banks/FIs</li> </ul>             | -15                 | Tariff Cycle Dela                   | ys       | -4.5                                 | F   | Regulatory Assets <sup>3</sup>          | -5       |

The cumulative impact on the integrated score from all Specific Disincentives will be capped at -10 points, except in the case of Red card metrics
 Red card metrics carry a heavy disincentive score which is not capped under the limit for Specific Disincentives and results in ineligibility for A+, A grades
 Increase in regulatory assets balance will result in ineligibility for A+, A and B grades

<sup>2</sup> For Power Departments, a subset of metrics is being used, in view of their non-corporatized nature of operations. This subset of metrics has been detailed in Section 2.2.2

<sup>3</sup> Overriding conditions are cash adjusted ACS-ARR gap, red card metrics, and increase in regulatory assets

Last year, the exercise was revamped and a few landmark changes were introduced to the rating framework. These include:

- Replacing metrics based on accrual accounting with cash-adjusted metrics: This was done to surface the true, on-ground financial position of the sector.
- Increasing focus on quantitative metrics: This data was derived from audited accounts and regulatory filings and provided greater authenticity and information than the qualitative ones.
- Forming a committee (constituted by MoP) to review discom ratings: This was done basis key events, such as regulatory developments and new defaults to banks and financial institutions, during the year.

#### Key features of the 11th Integrated Rating Exercise

**Comprehensive scorecard** for every DISCOM with rating, ranking, trajectory and performance barometer

Ratings will be **dynamic in nature**, reviewed quarterly for key triggers (e.g., defaults to banks)

Excellent Good Average

Metrics **adjusted for actual cash received** rather than accruals, e.g., ACS-ARR gap, DSCR, Leverage

Interactive digital dashboard to view rankings, ratings and benchmarking results

Ratings **rely on available and verifiable data** sourced from audited accounts, information from utilities, regulatory filings and orders, etc.

Robust **analytics backed approach** – weighted average of 3 years data (to normalize anomalies), ability to drilldown from dimension to specific parameters

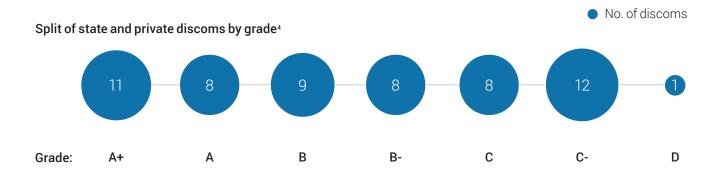

Actionable for DISCOMs via specific root causes of under-performance and best practices for improvement

#### **Results from the 11th Integrated Rating Exercise**

The scores and grades of disoms have shown significant improvement in the 11th Ratings, as compared to the previous 10<sup>th</sup> Ratings

- Of the 57 discoms covered in 11th Integrated Ratings, 46 saw improved scores. For 39 discoms, the scores improved by more than 5 percent.
- 24 discoms saw grades improve, whereas only 1 discom has been downgraded.
  - Of the balance 11 discoms with lower scores, 8 of them saw their scores decline by more than 5 percent.
- The number of discoms awarded C or lesser grade (C-, D) have reduced from 35 to 21.

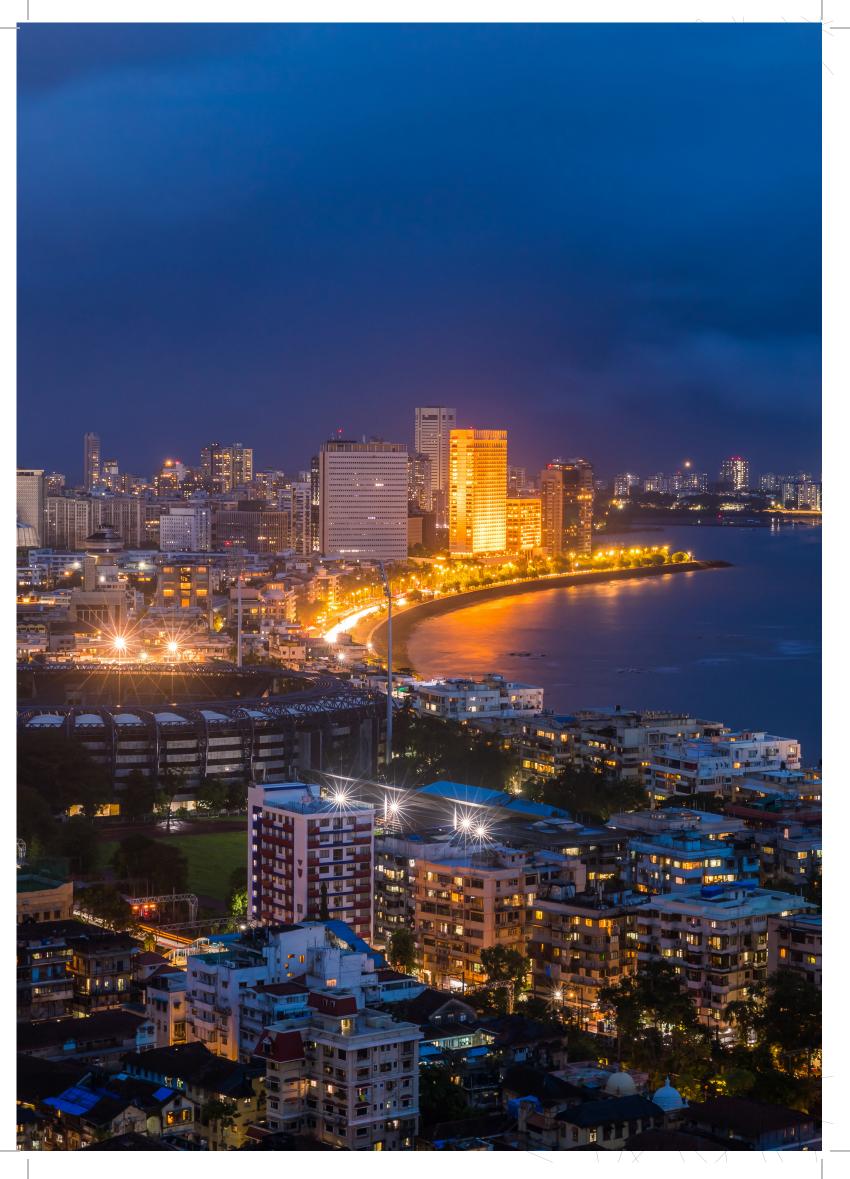

#### Split of discoms by performance trajectory

Note

- 1. Improving: Integrated Score of 11th Ratings increased by 5% or more than 10th Ratings 2. Declining: Integrated Score of 11th Ratings decreased by 5% or more than 10th Ratings
- 3. Stable: Integrated Score of 11th Ratings increased / decreased by less than 5% than 10th Ratings

<sup>4</sup> Excludes Power Departments (grades assigned to them are available in Section 3.2)

# Background and introduction

The power sector is a key enabler for economic growth in India. From 2010 to 2022, power demand in the country nearly doubled to 1,492 billion units. During this time, power generation capacity also grew, rising from 156 GW (gigawatts) to 412 GW (Feb 2023).<sup>5</sup> The government's continued push to enhance the power sector, and a greater thrust on low-cost renewable energy, has resulted in a significant decrease in the power deficit from -10.1 percent in 2010 to just -0.4 percent in 2022<sup>6</sup>.

Over the last decade, India has taken significant strides towards achieving 100 percent electrification, a single national grid, launching power exchange markets, among other initiatives. The country's commitment to achieve Net Zero by 2070 has provided further impetus to the shift to renewable energy sources. In fact, as part of it's the Paris Agreement commitments, India announced its Nationally Determined Contribution (NDC) – which includes reducing its GDP's emissions intensity by 45 percent by 2030 (w.r.t 2005 levels) and achieving 50 percent of installed capacity from non-fossil fuel-based energy resources by 2030.<sup>7</sup> In renewables, India has made tremendous progress, with installed capacity up from 57 GW in 2010 to 169 GW (Feb 2023), with a target to further triple it to 500 GW by 2030.<sup>8</sup> The country is also taking steps meet its growing power demand through initiatives such as National Hydrogen Mission and the tender for battery energy storage system (BESS), among other moves.

- Ministry of Power
- 5 Ibid
- <sup>7</sup> Union Cabinet
   <sup>8</sup> Ministry of Power

Despite achieving several feats, the industry is not without its challenges. The power distribution sector, in particular, has been facing issues with financial stability, which in turn is impeding growth. Even after government interventions, challenges relating to propensity to subsize tariff increments, low metering coverage, significant dependency on state government for timely subsidy payments, reliance on freebies due to subsidized tariffs, increasing working capital requirement and overall lack of profitability, pose as major headwinds.

The COVID-19 pandemic added to these woes. The last two years saw a significant drop in commercial and Institution (C&I) power demand, lower billing and collection efficiency, liquidity crunch, and mounting debt. To infuse liquidity in the sector, in FY21 the government announced INR 90,000 crore package under Atmanirbhar Bharat to provide guaranteed concessional loans to distribution utilities.

Several other reforms outside of COVID-19 have been implemented to reinvigorate the sector. The most important of these are:

- RDSS (Revamped Distribution Sector Scheme) to tackle grassroot issues including technical losses, metering losses, institutional capacity, subsidy arrears. The results-linked scheme, established in June 2021, has pushed the utilities and states to address performance gaps, and chart action plans in order to avail the benefits under this INR 3 lakh crore scheme.
- 2. Additional Prudential lending norms for linking disbursal of new loans with improvement in various performance obligations of the utilitiess.
- 3. Other reforms including, LPS Rules (Late payment surcharge & Related matters), 2022 and mandatory Energy Audit / accounting.

The Annual Integrated Rating Exercise is another positive step in this direction, where the performance of the power distribution utilities is captured across a variety of parameters such as availability, reliability, and efficiency. Further, many parameters used in the rating exercise are encouraging utilities to enhance their operations to meet the criteria for these schemes.

## **2.1** Introduction to the 11<sup>th</sup> Integrated Rating Exercise

Since 2012, Integrated Rating Exercise has been executed annually under the aegis of Ministry of Power (MoP) with the aim of evaluating performance of power distribution utilities. MoP has mandated Power Finance Corporation (PFC) to co-ordinate the rating exercise. So far, ten integrated rating exercises have been completed with the last, i.e., the 10<sup>th</sup> Integrated Ratings released by MoP on 5<sup>th</sup> August 2022 covering utility performance over FY 2020-21.

The framework adopted for the rating exercise is approved by the MoP and has evolved over the years to reflect the changes in the power sector and national priorities. The rating framework underwent a significant overhaul during the 10<sup>th</sup> Integrated Rating Exercise – wherein the rating framework was significantly expanded to comprehensively evaluate utility performance. The new evaluation metrics were sourced from mix of key metrics being used in RDSS evaluation, global benchmarks in power distribution sector and through extensive stakeholder engagement including MoP, discom executives, global energy experts, PFC, REC.

The salient features of the revised methodology adopted for 10<sup>th</sup> Integrated Rating Exercise have been detailed below:

#### Ratings that reflect the true picture

- All calculations based on actual cash received instead of accruals, to factor in the impact of realization of cash from consumer dues, government dues, and tariff subsidies. Metrics that have improved due to this change include the ACS-ARR gap, debt service coverage ratio, and leverage.
- Increased weightage of quantitative metrics (derived from audited accounts and regulatory filings and orders), to improve the accuracy and transparency of ratings.
- Negative scoring for non-compliance with specific metrics to promote adoption of best practices, such as unavailability of audited accounts and defaults to banks and financial institutions. For power departments, a subset of metrics relevant to them has been used.
- Captured impact of external environment on the discoms' financials, through metrics such as subsidy realization (received / booked), loss takeover by state government, tariff cycle timelines, implementation of auto-pass through of fuel costs
- Establishment of protocols and a Committee for a trigger-based review of ratings, to factor in the impact of events of significance and to ensure that ratings reflect the latest performance of discoms. A ratings review can be triggered by new payment defaults, publication of audited accounts, issuance of tariff orders, etc.

#### A robust analytical approach

- Usage of three years of weighted average performance to calculate scores for specific metrics, to factor in the impact of fluctuations and anomalies and reflect a long-term view of discoms' performance.
- Trajectory-based scoring for specific metrics to promote positive trends and improvements.
- Performance benchmarks and best practices used to determine scoring boundaries.

#### Insights for all stakeholders:

- A digital dashboard (accessible at www.urjadrishti.com) has been developed to enable participants and stakeholders in the exercise to view key performance metrics and comparisons between discoms.
- Deeper performance analyses and insights have been enabled for individual discoms by benchmarking performance using important metrics and analyses of trends and drivers. Every discom will be provided with a detailed report benchmarking their performance on each parameters with peers. It also highlights their strengths, improvement areas and potential actions they can take to improve performance.
- Best practices and insights from top-performing discoms have been synthesized to inspire the rest of the sector.

The 10<sup>th</sup> Integrated Rating Exercise was also the first time in the Integrated Ratings, that the Private Distribution Utilities and Power Departments were also included in the exercise to provide complete sectoral coverage. The same has been continued for the 11<sup>th</sup> Integrated Rating Exercise as well.

The 11<sup>th</sup> Integrated Rating continues with the same framework used the year before with the objective of capturing the performance changes on the same base. Further, an interactive and dynamic dashboard has been implemented during this year's exercise to enable discoms to view their rating performance, past scoring and value trends, benchmark against other discoms and draw insights for future improvements.

## **2.2** Summary of the 11<sup>th</sup> Integrated Rating methodology

The 11<sup>th</sup> Integrated Rating methodology evaluates discoms performance against three main parameters:

- 1. Financial Sustainability (75% weightage): Includes metrics such as ACS-ARR gap (cash adjusted), days receivable, days payable to GenCos and TransCos, adjusted quick ratio, debt service coverage ratio (cash adjusted) and leverage (cash adjusted).
- Performance Excellence (13% weightage): Includes metrics focusing on operational performance, such as distribution loss (SERC approved), billing efficiency, collection efficiency and corporate governance.
- **3. External Environment (12% weightage):** Includes metrics to cover the impact of state government action and regulator action, such as subsidy realized, loss takeover, government dues, auto pass through of fuel and adherence to tariff cycle timelines.

For certain parameters, evaluation covers three years of performance as well as improvements from year to year. For Power Departments, a subset of metrics is being used, in view of their non-corporatized nature of operations. This subset of metrics has been detailed in Section 2.2.2.

| S. No. | Parameter                                   | Max. score |
|--------|---|------------|
| А      | Financial Sustainability                    | 75         |
| 1      | ACS-ARR Gap (cash adjusted)                 | 35         |
| 2      | Days Receivable                             | 3          |
| 3      | Days Payable to Gencos and Transcos         | 10         |
| 4      | Adjusted Quick Ratio                        | 10         |
| 5      | Debt Service Coverage Ratio (cash adjusted) | 10         |
| 6      | Leverage (Debt/EBITDA; cash adjusted)       | 7          |
| В      | Performance Excellence                      | 13         |
| 1      | Distribution Loss (SERC approved)           | 2          |
| 2      | Billing Efficiency                          | 5          |
| 3      | Collection Efficiency                       | 5          |
| 4      | Corporate Governance                        | 1          |
| С      | External Environment                        | 12         |
| 1      | Subsidy Realized (Last 3 FYs)               | 4          |
| 2      | Loss Takeover by State Government           | 3          |
| 3      | Government Dues (Last 3 FYs)                | 3          |
| 4      | Tariff Cycle Timelines                      | 1          |
| 5      | Auto Pass-through of Fuel Costs             | 1          |
|        |   |            |

#### 2.2.1 Evaluation Parameters for State and Private Utilities<sup>9</sup>

<sup>9</sup> Appendix 3 provides details each rating parameter

| S. No. | Parameter   | Max. score |
|--------|---|------------|
| D      | Specific Disincentives                                      |            |
| 1      | <ul> <li>Auditor's Adverse Opinion</li> </ul>               | 0, -15     |
| 2      | Availability of Audited Accounts                            | 0, -15     |
| 3      | <ul> <li>Default to Banks/Financial Institutions</li> </ul> | 0, -15     |
| 4      | Audit Qualifications  | 0, -4      |
| 5      | Governance  | 0, -3      |
| 6      | Tariff Cycle Delays   | 0,-4.5     |
| 7      | Tariff Independent of Subsidy                               | 0, -1      |
| 8      | Uncovered Revenue Gap (Current Year)                        | 0, -4      |
| 9      | Regulatory Assets <sup>10</sup>                             | 0, -5      |
|        | <ul> <li>Red card metrics<sup>11</sup></li> </ul>           |            |

#### 2.2.2 Evaluation Parameters for Power Departments

| A | Financial Sustainability             | 55      |
|---|--------------------------------------|---------|
| 1 | ACS-ARR Gap (cash adjusted)          | 55      |
| В | Performance Excellence               | 35      |
| 1 | Distribution Loss (SERC approved)    | 10      |
| 2 | Billing Efficiency                   | 10      |
| 3 | Collection Efficiency                | 10      |
| 4 | Corporate Governance                 | 5       |
| С | External Environment                 | 10      |
| 1 | Subsidy Realized (Last 3 FYs)        | 6       |
| 2 | Tariff Cycle Timelines               | 2       |
| 3 | Auto Pass-through of Fuel Costs      | 2       |
| D | Specific Disincentives               |         |
| 1 | Tariff Cycle Delays                  | 0, -4.5 |
| 2 | Tariff Independent of Subsidy        | 0, -1   |
| 3 | Uncovered Revenue Gap (Current Year) | 0, -4   |
| 4 | Regulatory Assets                    | 0, -5   |

<sup>10</sup> Increase in regulatory assets balance will result in ineligibility for A+, A and B grades
 <sup>11</sup> Red card metrics are those that substantially affect financial performance of discoms and therefore carry a higher negative score. They are not included in the -10 capping limit that applies to other Specific Disincentives as well as result in ineligibility for A+ and A grades. For more details, please see Appendix 3

#### 2.2.3 Grading and Performance

The 11<sup>th</sup> Integrated Rating Exercise assigns a grade based on rating score and performance trajectory to every discom similar to the 10<sup>th</sup> Integrated Rating Exercise. The change is limited to basis of determining performance trajectory.

#### **Grading Scale**

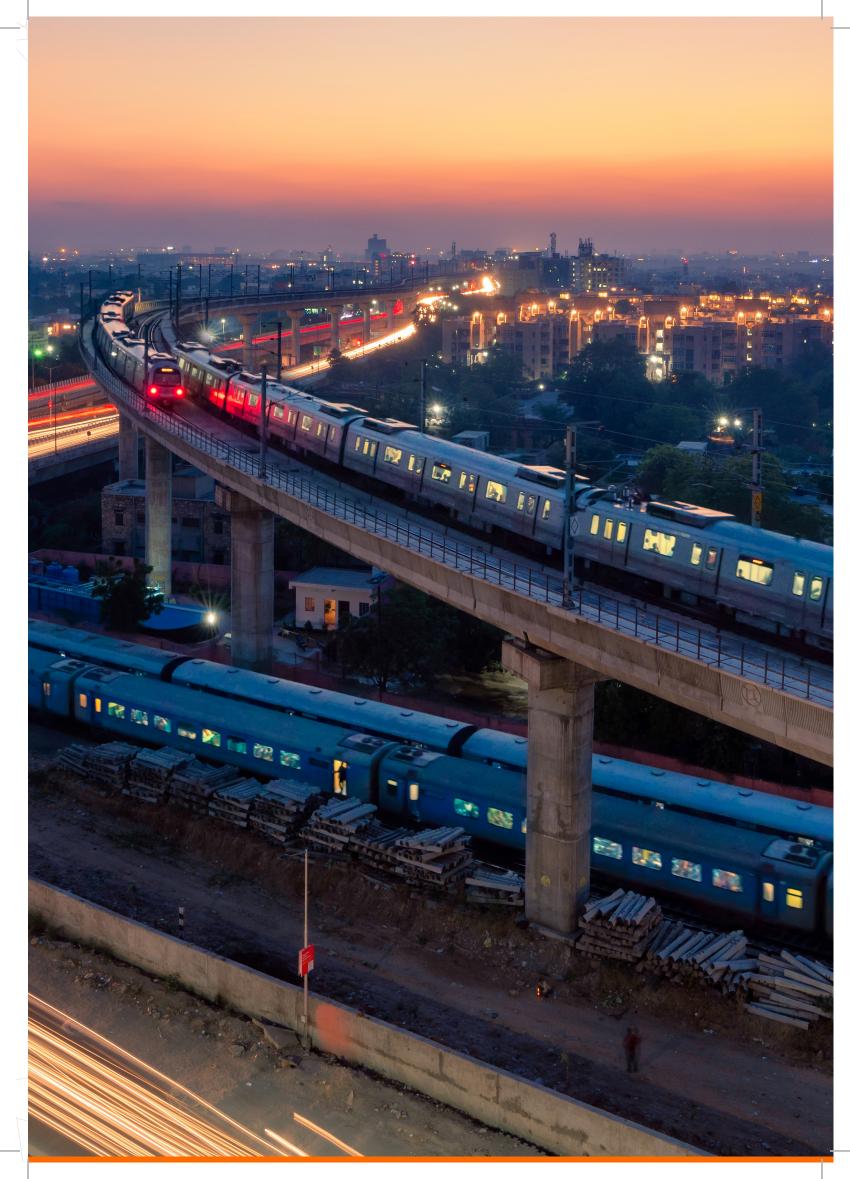

Grading for state and private discoms takes into account both the integrated rating score and the ACS-ARR gap performance. For power departments, grades are based only on the rating score.

| Grade | Rating score                                    | Additional overriding<br>ACS-ARR gap condition  | Grading definitions  |
|-------|---|---|--|
| A+    | Greater than or equal to<br>85                  | Should be in surplus (Gap<br>should be less than or equal<br>to 0 paisa/kWh, i.e., surplus) | Exceptionally strong financial and operational performance |
| A     | Greater than or equal to<br>65 and less than 85 | ACS-ARR Gap should be less<br>than or equal to 15 paisa/<br>kWh                             | Very high financial and operational performance            |
| В     | Greater than or equal to<br>50 and less than 65 | ACS-ARR Gap should be less<br>than or equal to 50 paisa/<br>kWh                             | High financial and operational performance                 |
| B-    | Greater than or equal to<br>35 and less than 50 | ACS-ARR Gap should be less<br>than Rs. 1.00/kWh   | Moderate financial and operational performance             |
| С     | Greater than or equal to<br>15 and less than 35 | ACS-ARR Gap should be less<br>than Rs. 1.25/kWh   | Below average financial and operational performance        |
| C-    | Less than 15                                    |   | Low financial and operational performance                  |
| D     | Utilities under SMA-2                           |   | Very low financial and operational performance             |

#### **Performance Trajectory**

This year, performance trajectory is assigned to discoms, based on the trend in Integrated Score (as detailed below). Since this is the second year of continuing the same Integrated Rating Methodology, FY21 Integrated Score is used as the baseline to determine performance trajectory.

| Trajectory | Definition   |
|------------|--|
| Improving  | Integrated Score of $11^{th}$ Ratings increased by 5% or more than $10^{th}$ Ratings                             |
| Declining  | Integrated Score of 11th Ratings decreased by 5% or more than 10th Ratings                                       |
| Stable     | Integrated Score of 11 <sup>th</sup> Ratings increased / decreased by less than 5% than 10 <sup>th</sup> Ratings |

# Ratings and results of the 11<sup>th</sup> Integrated Rating Exercise

Based on the methodology approved by the Ministry of Power and elaborated in the previous chapter, the discoms have been given a ranking and rating for the 11th Integrated Rating Exercise in sections 3.1 and 3.2.

# **3.1** State & private utilities

| Rank | Name of utility  | State/UT                | Ownership           | Grade movement | Grade |
|------|--|-------------------------|---------------------|----------------|-------|
| 1    | Adani Electricity Mumbai Limited (AEML)                                      | Maharashtra             | Private Utility     | -              | A+    |
| 2    | Uttar Gujarat Vij Company Limited (UGVCL)                                    | Gujarat                 | State Power Utility | -              | A+    |
| 3    | Madhya Gujarat Vij Company Limited (MGVCL)                                   | Gujarat                 | State Power Utility | -              | A+    |
| 4    | DNH Power Distribution Corporation Limited (DNHPDCL)                         | Dadra &<br>Nagar Haveli | State Power Utility | -              | A+    |
| 5    | Paschim Gujarat Vij Company Limited (PGVCL)                                  | Gujarat                 | State Power Utility | -              | A+    |
| 6    | Dakshin Gujarat Vij Company Limited (DGVCL)                                  | Gujarat                 | State Power Utility | -              | A+    |
| 7    | Noida Power Company Limited (NPCL)   | Uttar Pradesh           | Private Utility     | -              | A+    |
| 8    | Tata Power Limited - Mumbai (TPML)   | Maharashtra             | Private Utility     | -              | A+    |
| 9    | Dakshin Haryana Bijli Vitran Nigam Limited<br>(DHBVNL)                       | Haryana                 | State Power Utility | -              | A+    |
| 10   | Uttar Haryana Bijli Vitran Nigam Limited (UHBVNL)                            | Haryana                 | State Power Utility | Upgrade        | A+    |
| 11   | Punjab State Power Corporation Limited (PSPCL)                               | Punjab                  | State Power Utility | Upgrade        | А     |
| 12   | Uttarakhand Power Corporation Limited (UPCL)                                 | Uttarakhand             | State Power Utility | Upgrade        | А     |
| 13   | Tata Power Delhi Distribution Limited (TPDDL)                                | Delhi                   | Private Utility     | -              | А     |
| 14   | Assam Power Distribution Company Limited (APDCL)                             | Assam                   | State Power Utility | Upgrade        | А     |
| 15   | Mangalore Electricity Supply Company Limited (MESCOM)                        | Karnataka               | State Power Utility | Upgrade        | А     |

# **3.3** Performance of discoms on rating metrics

The grades indicate the overall performance of the discoms utilizing the weightage of individual metrics and various overriding criteria. A deeper look at the individual metrics indicates that while most of the top performing discoms have performed consistently well across metrics, there is some variation in the bottom performers by metric. Some discoms feature in the bottom performers across large number of metrics. Dissecting the performance of discoms by dimensions reveals 2 key insights a) DISCOMs in select states are consistently performing well on financial sustainability metrics b) the trend has shifted from majorly private discoms in most of the top performers on performance excellence metrics to a mix of State and private discoms.

#### **Financial Sustainability**

|   |   | Bottom Performers Top Performers      |
|---|---|---------------------------------------|
| Metric  | Metric value distribution                       |                                       |
|   | Bottom  | Тор                                   |

# State of India's Power Distribution Sector

The 11<sup>th</sup> Integrated Rating Exercise brings forth critical insights into the overall performance of the power distribution sector. In FY22, the sector displayed several green shoots and encouraging recovery since the pandemic hit. On several important parameters such as financial deficit, AT&C losses, collection efficiency, its performance improved compared to pre-COVID-19 levels, whereas in certain other areas longstanding challenges continue to hinder growth. This chapter deep dives into several ranking parameters below.

Sectoral analysis for FY22 is based on data of 62 utilities, whereas data for all 71 utilities is considered for FY21 and FY20. FY22 data was not available for 4 discoms and 5 power departments – Torrent Power Surat, Torrent Power Ahmedabad, JPDCL, KPDCL, Puducherry PD, Mizoram PD, Daman & Diu PD, Andaman & Nicobar Islands PD, Lakshadweep Islands ED.

# 4.1 Financial deficit

Financial deficit is the most important indicator of financial health in the sector. The 11<sup>th</sup> Annual Integrated Rating calculates the absolute gap (i.e., losses) on a cash adjusted basis, where the focus is on capturing revenue cash flows instead of revenue accrued.

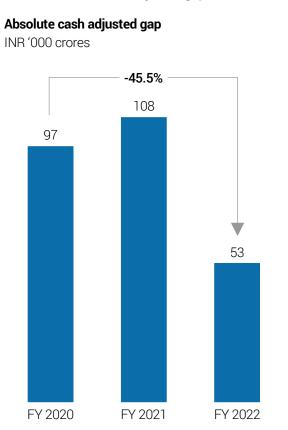

## Financial deficit in India's power distribution sector nearly halved in FY22 as compared to FY20, despite an 8 percent increase in gross input energy.

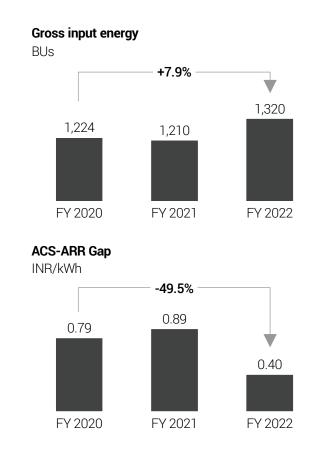

In FY22, the power distribution sector's financial deficit nearly halved, when compared to FY20, with absolute cash-adjusted gap declining 46 percent to INR 53,000 crore. Shortfall in cash collection, i.e., the cash-adjustment in the absolute gap on account of gross trade receivables also improved – in FY20, cash adjusted revenue was INR 38,000 crore lower than accrued revenue, compared with INR 24,000 crore in FY22.

Analyzing the losses shows the deficit narrowed despite gross input energy volume growing by 8 percent over FY20-FY22 on the back of rising demand for power. This was driven by a 50 percent improvement in the ACS-ARR gap, which captures the cash-adjusted gap per unit. This highlights that the power distribution entities were recording a loss of 79 paise per unit energy in FY20, which reduced to only 40 paise per unit energy in FY22.

#### Exhibit 1

#### Trend in national cash adjusted gap for FY20 to FY22

State discoms from five states: Rajasthan, Maharashtra, Karnataka, Madhya Pradesh and West Bengal showed the most improvement in absolute cash-adjusted gap largely due to higher subsidies disbursement by state governments and better cash collections. Together, their absolute cash-adjusted gap reduced by about INR 43,000 crore over FY20-FY22.

#### State discoms of following states showed the most improvement in their absolute cash-adjusted Gap

| State          | <b>Cash adjusted gap</b><br>FY22 (INR cr) | <b>Cash adjusted gap</b><br>FY20 (INR cr) | <b>Cash adjusted gap</b><br>improvement (FY22–FY20)<br>(INR cr) |
|----------------|---|---|---|
| Rajasthan      | -2,198                                    | 13,651                                    | -15,850   |
| Maharashtra    | 1,154                                     | 12,699                                    | -11,546   |
| Karnataka      | -3,203                                    | 4,698                                     | -7,901  |
| Madhya Pradesh | 2,441                                     | 7,210                                     | -4,769  |
| West Bengal    | -1,106                                    | 2,259                                     | -3,364  |

#### ACS-ARR (cash-adjusted) gap improved by more than 1.00 INR/kWh for 12 utilities over FY20-FY22

|           |                | <b>Cash adjusted gap</b><br>(INR cr) |        | <b>ACS-ARR</b><br>(INR / kWh | (cash adjusted) |             |

| JVVNL     | Rajasthan      | 4,946                                | -1,299 | 1.52                         | -0.36           | -1.88       |
| MESCOM    | Karnataka      | 212                                  | -903   | 0.35                         | -1.52           | -1.87       |
| CHESCOM   | Karnataka      | 376                                  | -740   | 0.49                         | -0.88           | -1.37       |
| AVVNL     | Rajasthan      | 1,628                                | -1,493 | 0.74                         | -0.58           | -1.33       |
| MPPoKVVCL | Madhya Pradesh | 3,284                                | 683    | 1.52                         | 0.27            | -1.25       |
| UPCL      | Uttarakhand    | 892                                  | -746   | 0.61                         | -0.49           | -1.10       |
| BESCOM    | Karnataka      | 3,168                                | -284   | 0.98                         | -0.09           | -1.07       |
| Sikkim PD | Sikkim         | 178                                  | 78     | 1.71                         | 0.64            | -1.07       |
| MPMKVVCL  | Madhya Pradesh | 3,271                                | 738    | 1.29                         | 0.26            | -1.04       |

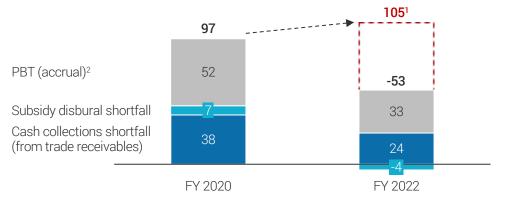

The bulk of absolute cash-adjusted gap in FY22 was concentrated with 8 utilities. TANGEDCO (Tamil Nadu), TSSPDCL, TSNPDCL (Telangana<sup>12</sup>), MVVNL, PuVVNL, DVVNL (Uttar Pradesh), SBPDCL (Bihar), APSPDCL (Andhra Pradesh) together account for nearly 74 percent of the absolute cash-adjusted gap in the country.

<sup>12</sup> TSNPDCL, and TSSPDCL have received Non-tariff Subsidy amount (UDAY loss takeover subsidy pertaining to last 4 years) of ~INR 2,700 crore and ~INR 6,200 crore respectively in June 2022, which has not been considered in FY22 financials It is important to note that the extent of these losses would have been much higher had sector performance not improved in FY22. If the gross input energy of FY22 was purchased with the ACS-ARR gap as high as that in FY21 (89 paise), then the absolute cash adjusted gap would have been 1.05 lakh crore (versus the INR 53,000 crore recorded in FY 22, marking an improvement of 56 percent).

#### Exhibit 2

### Components that helped reduce ACS-ARR gap in FY22

INR '000 crores

1 Assuming Ceteris Paribus, -105 (INR '000 Crores) is the expected Absolute Gap of FY22 if the same ACS-ARR (in INR/kWh) continued at FY22 Gross energy volume

2 Excluding revenue grant(s) for loan-takeover

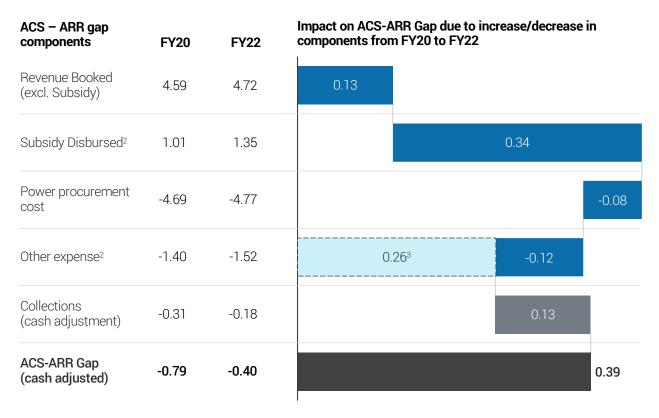

The improvement in absolute cash-adjusted gap can be attributed to:

- Profit Before Tax (PBT): This component represents profitability and is driven by discoms' operational performance and to some extent by state regulators (tariff revision) and state government (loss-takeover, subsidies under various schemes), etc. In FY22, PBT (excluding revenue grant under UDAY for loan takeover) improved by about INR 19,000 crore.
- Subsidy received subsidy booked: State governments provide subsidy to discoms in lieu of low tariff power supplied to certain customer segments such as farmers, residential areas (i.e., tariff subsidy). In the past, states have often fallen short on disbursing the full subsidy amount, resulting in large subsidy arrears in the sector. This shortfall manifests as a cash shortage and cascades into negative impact on working capital, payables to GenCos, etc. Subsidy disbursement improved by about INR 11,500 crore.
- Cash collections from trade receivables: This component represents the cash shortfall/ surplus on account of gross trade receivables (mainly bill collections from the customers). Many discoms in the country fall short on cash collections from the customers and have been seeing a steady rise in trade receivables – leading to a cash shortage and downstream issues in working capital management. FY22 saw an improvement of INR ~14,000 crore (i.e., 0.13 INR / kWh) from FY20. The utilities did not realize cash of INR ~38,000 crore in FY20, which got converted to trade receivables, which reduced to INR ~24,000 crore in FY22.

FY22 also had to absorb the impact of significant delays /non-issuance of tariff orders in FY21. 10 states (total 13 utilities) didn't publish tariff orders for FY22. These 13 utilities together represented about 18 percent of the sector's revenues and about 58 percent of its financial loss in FY22. However, there has been significant improvement with respect to issuance of FY23 tariff orders – with tariff orders published for all but six utilities from four states (BRPL, BYPL, TPDDL (Delhi); JBVNL (Jharkhand); IPCL (West Bengal) and Arunachal PD).

#### Exhibit 3

## Breakdown of ACS-ARR Gap improvement from FY20-FY22 $\ensuremath{\mathsf{INR}}\xspace{\mathsf{kWh}}$

1 Other Expense = Total Pre-Tax Expenditure, excluding Power Procurement Cost

2 Subsidy Disbursal is excluding revenue grant for loan takeover

3 Net PBT improvement is also driven by government subsidy

## 4.1.1 Improving PBT

A deep dive into operational performance shows that the improvement in PBT (excluding revenue grant under UDAY for loan takeover) of INR 19,000 crore over FY20-FY22 was driven by increase in 'non-tariff subsidy booked', which also increased by INR 19,000 crore during the same period. The increase in non-tariff subsidy was driven by disbursals under various government schemes such as UDAY, etc. Non-tariff subsidy represents subsides disbursed under various central or state schemes for supporting financially weak discoms. It is distinct from tariff subsidy, wherein the state governments reimburse the discoms in lieu of subsidized tariffs offered for certain end-customers (for e.g., farmers, low-income groups).

Notably, the PBT can be improved further through improvements in billing efficiency. However, billing efficiency in the sector was stagnant over FY20-FY22, as covered in more detail in Section 4.2. Other factors impacting the PBT are already accounted by the regulator in the tariff setting exercise, and hence have marginal resultant impact on PBT.

## 4.1.2 Higher subsidy disbursal

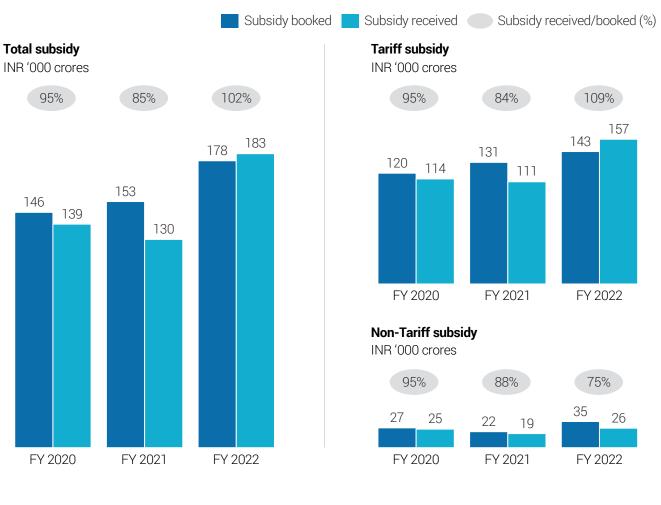

Improvement in subsidy disbursal was one of the biggest highlights for FY22 – **aggregate subsidy disbursement by state governments crossed 100 percent (~102 percent) of all subsidy amounts booked in FY22**. Total subsidy comprises of tariff subsidy as well as non-tariff subsidy amounts given under various central/state government schemes.

Subsidy disbursement is a parameter that has been lagging in the power distribution sector over the past few years. Even in the past two years, subsidy disbursement was below par -95 percent of subsidy booked in FY20 and 85 percent in FY21 - resulting in considerable subsidy arrears. Thus, achieving 100 percent subsidy disbursement was an phenomenal achievement on part of the state governments.

Of the 24 states which provide subsidies to discoms, 10 states disbursed more than 100 percent of subsidy booked (thus clearing off some of their arrears), seven disbursed 100 percent, and five disbursed more than 93 percent in FY22.

Six states showed the most improvement in subsidy disbursal: Karnataka, Rajasthan and Madhya Pradesh have shown significant jump in disbursals over FY20 levels. Maharashtra, Andhra Pradesh, Punjab saw a major dip in FY21, but have returned to FY20 levels. Disbursal for Telangana's discoms was low (~39 percent), because the UDAY subsidy booked in FY22 was received in FY23, and hence not considered in the FY22 ratings.

#### Exhibit 4

#### Trend in subsidy disbursement for FY20 to FY22

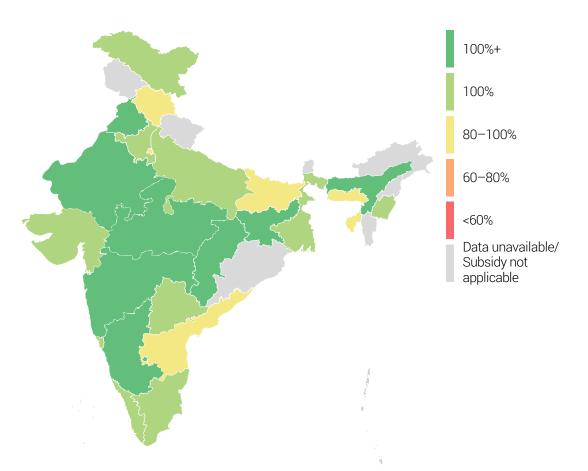

Tariff subsidy highlights: It represents the state governments' reimbursements to the discoms in lieu of subsidized tariffs offered for certain end-customers (for e.g., farmers, low-income groups), and forms an intrinsic part of the state Discom financials (tariff subsidy is not applicable for private Discoms). States have disbursed about INR 156,500 crore of tariff subsidy against the INR 143,000 crore booked in FY22, thus clearing some of their past arrears. Tariff subsidy disbursal rate of 109 percent in FY22, was significantly higher than 95 percent in FY20 and 84 percent in the FY21.

Non-tariff subsidy highlights: This represents subsides disbursed under various central or state schemes for supporting financially weak discoms. Prominent schemes such as UDAY, etc. provide such subsidies in the form of loan-takeover, loss-takeover, equity infusion, among other practices. Non-tariff subsidy disbursement has remained flat across FY20-FY22, increasing marginally from about INR 25,000 crore to INR 26,000 crore. Further, in FY22, nearly the entire amount booked was disbursed by the states, except for INR 8,900 crore under UDAY for Telangana. Notably, five states: Tamil Nadu, Uttar Pradesh, Rajasthan, Madhya Pradesh and Bihar comprise over close to 95 percent of the disbursement.

#### Exhibit 5

State-wise tariff subsidy received as percent of tariff subsidy booked for FY22 Percent

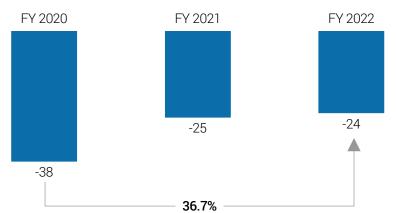

## 4.1.3 Improving trade receivables collections

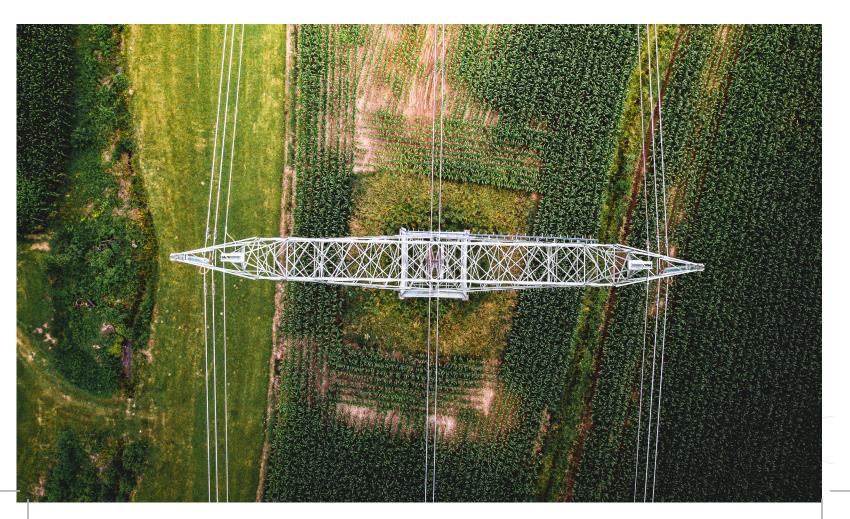

Increasing trade receivables in the sector underlines the issue of revenue increasingly accumulating with debtors instead of being paid out to the discoms. This shortfall in cash collection is captured directly as 'cash-adjustment' in the calculation of absolute gap.

However, negative cash adjustment improved by ~37 percent to INR -24,000 crore in FY22 from FY20, highlighting a positive trend in the sector. This was largely driven by discoms improving their collection processes through easier payment methods (including digital payments), quick turn-around in bill generation, early payment discounts, increasing awareness among customers (especially rural) for bill payments, etc.

#### Exhibit 6

## Trend in Cash Collection Shortfall (of Gross Receivables) for FY20 to FY22 INR '000 crores

# **4.2** Improvement in Aggregate Technical and Commercial (AT&C) losses

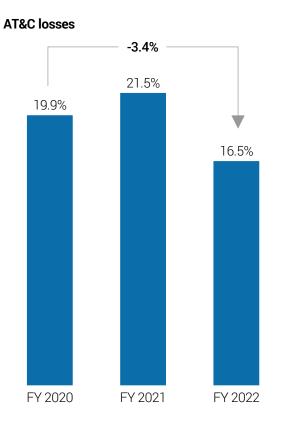

AT&C losses have reduced to 16.5 percent in FY22; significantly lower than 19.9 percent in FY20 and 21.5 percent in FY21 AT&C losses were considerably high in FY21, as COVID-19 adversely impacted both billing and collection efficiencies. However, the AT&C losses reduced by ~3 percent even when compared to pre-pandemic level (FY20).

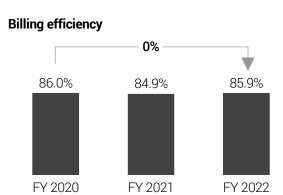

The break-down of AT&C trends, indicates that the improvement has been driven by collection efficiency, which improved from 93.1 percent in FY20 to 97.2 percent in FY22. On the other hand, Billing efficiency has remained unchanged at 85.9 percent during the same period.

Twenty five states/UTs have exhibited an improvement in AT&C losses. Billing efficiency improved by more than 3 percent over FY20-FY22 for 5 discoms: SBPDCL, TSECL, UHBVNL, MPMKVVCL and WBSEDCL. Collection efficiency improved by more than 5 percent for 18 discoms.

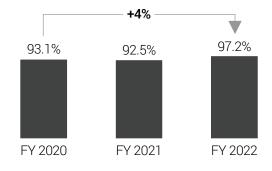

#### Exhibit 7

Trends in AT&C losses, Billing efficiency and Collection efficiency for FY20 to FY22 Percent

#### **Collection efficiency**

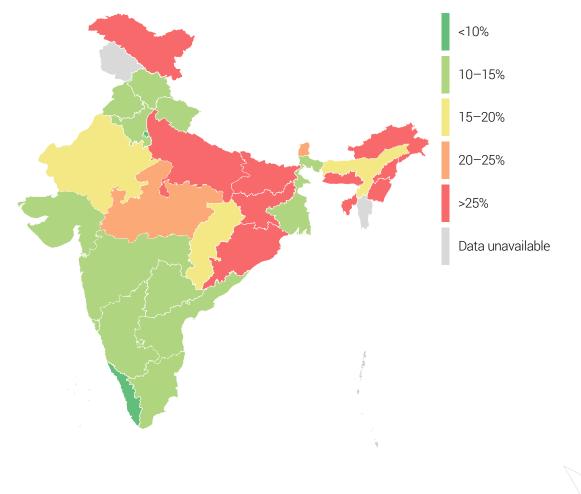

#### Top 10 DISCOMs with highest improvement in AT&C losses as compared to FY20 levels

|           |                |                       | FY20                  |        |                       | FY22                     |        |                    |

| UHBVNL    | Haryana        | 81%                   | 98%                   | 21%    | 86%                   | 100%                     | 14%    | -7%                |

Exhibit 8

#### State-wise AT&C losses for FY22 Percent

Discoms in five states contributed to about 52 percent of national AT&C losses: Uttar Pradesh, Maharasthra, Madhya Pradesh, Rajasthan and Tamil Nadu. Of these, Rajasthan and Madhya Pradesh discoms have shown significant improvement during FY20-FY22. However, aggregate AT&C losses of Uttar Pradesh discoms remained high at 30% during the same period.

#### Drivers for collection efficiency:

Collection efficiency improved for both subsidy and customer billing components of revenue. The former was a result of states disbursing more than 100 percent of tariff subsidies booked, as covered in detail in the previous sub-section. The latter, representing the cash collections as against customer billing, increased from 92.7 percent to 96.0 percent during FY20-FY22. This points towards a very encouraging trend in the sector, as it was a result of discoms' efforts in adopting better processes for customer collections.

Exhibit 9

#### **Bifurcation of Collection efficiency for FY20 to FY22** Percent

#### Scope for improvement in billing efficiency

Billing efficiency remained stagnant over FY20-FY22 - declining marginally to 85.9 percent in FY22, as compared to 86 percent in FY20. There is significant scope for improving billing efficiency - 33 utilities had distribution losses higher than billing efficiency targets approved by respective State Electricity Regulatory Commissions (SERCs) in FY22.

Achieving the billing efficiency targets set by SERCs, would have reduced the sectoral loss by 33 percent to INR 36,000 crore, resulting in ACS-ARR gap to 0.27 INR / kWh in FY22. Further analysis of the data shows that achieving best-in-class billing efficiency of 92 percent could turn the sector break-even, improving the sectoral gap from the projected loss of 0.27 INR/kWh to zero.

Improvement in billing efficiency can be affected through steps to increase metering (consumer, feeder, DT), deployment of smart meters, separation of agricultural feeder, improving power factor to curb line losses, and curbing electricity theft, etc. To incentivize this, the government has implemented major initiatives, such as linking performance for RDSS grants, mandating energy audit & accounting, etc.

# **4.3** Legacy issues in the power distribution sector

The power distribution industry has made a number of notable advancements across important metrics, although there are still challenges in several areas. It is important to emphasize that these legacy problems have weighed on the industry for a while, and their resolution would require additional government support, measures from the discoms themselves and time.

- Debt Debt in the sector has been mounting, largely due to financial deficit and working capital shortage (caused in turn by low subsidy disbursal and shortfall in cash collections). This is further aggravated by the increasing burden of financing costs. Center and state governments have established several schemes to takeover some of the sector's debt, most notably through the UDAY scheme. In addition, state governments are supporting the state discoms by way of taking over the loans and losses, while the centre is pushing for lending based on Additional Prudential Norms for the sector and linking lending terms to annual rating results to encourage better fiscal discipline.
- Payables to GenCos & TransCos/days payable The power distribution sector suffers from high trade payables with days payable averaging 160 days nationally, as opposed to the benchmark of 45 days specified in LPS Rules, 2022. With the sector making losses and facing liquidity crunch, reducing trade payables remains challenging.
- Trade receivables/days receivable Trade receivables primarily comprise customer dues and electricity duty/cess (pass-through to government). Efficient discoms' collection process, consumer payment discipline govern the extent of trade receivables recorded. Reducing them requires investment in infrastructure (metering coverage, agricultural feeder billing) as well as billing awareness.
- Regulatory assets, subsidy arrears Discoms' financials depend significantly on tariff subsidy disbursals from state governments. Some states have been lagging in subsidy disbursal, leading to substantial accumulation of arrears. Further, multiple state have built significant regulatory assets. At the end of FY22, subsidy arrears and regulatory assets, stood at INR 66,000 crore and INR 1.6 lakh crore, respectively. These factors have led to direct cash shortfall for the discoms, resulting in major financial distress in the sector.

To make matters worse, COVID-19 and resulting lockdowns further impacted these parameters in FY21. Receivables increased due to impact on customer billings and payments, payables rose on significant financial loss and mounting receivables, while debt mounted due to the combined impact of all these factors. This set up a challenging precedent for FY22, which is why positive trends in all legacy issues was a notable achievement.

## 4.3.1 Sectoral debt

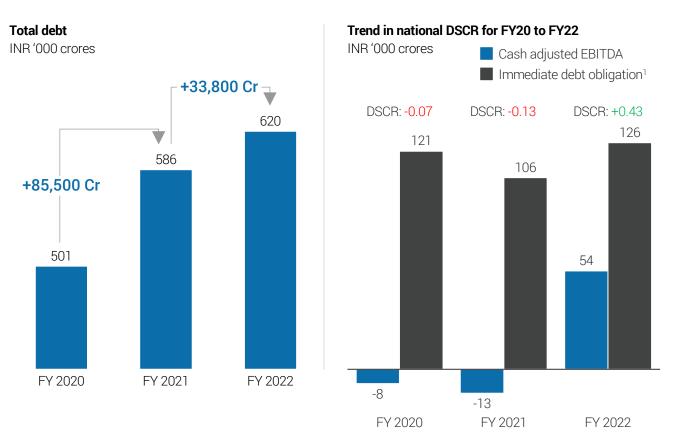

## Debt increased by INR 34,000 crore in FY22 compared to INR 86,000 crore in FY21, DSCR turned positive

The total sectoral debt rose by 24 percent, from INR 5.01 lakh crore in FY20 to INR 6.20 lakh crore in FY22. However, the pace of debt addition slowed down considerably. Sectoral debt climbed by roughly INR 33,800 crore in FY22, which is 60 percent less than the INR 85,500 crore increase in FY21. The "debt as a percentage of revenue" metric, which worsened from 71 percent in FY20 to 84 percent in FY21 then improved back to 77 percent in FY22, also reflecting this progress.

The sector's Debt Service Coverage Ratio (DSCR) turned around to being positive in FY22 – driven by improving sector financials. The DSCR improved from negative 0.07 in FY20 to positive 0.43 in FY22. This positive turnaround in DSCR bodes well for the sector's lenders, as debt serviceability remains the foremost priority for them.

#### Exhibit 10

#### Trend in national Debt and DSCR for FY20 to FY22

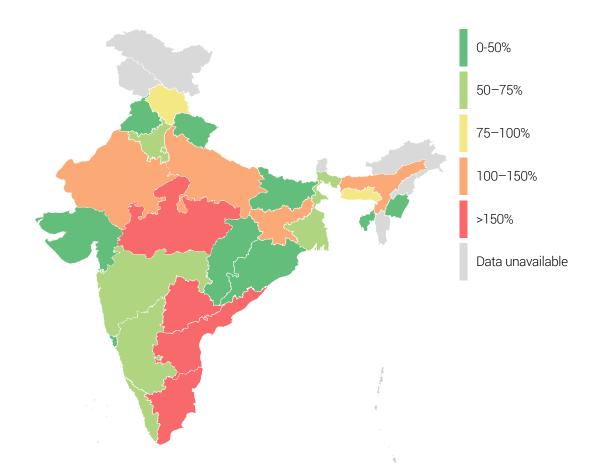

1 Immediate debt obligation includes: Interest Costs + Current Maturities + Interest Accrued & Due

Discoms in four states – Tamil Nadu, Uttar Pradesh, Rajasthan and Madhya Pradesh – together held nearly 57 percent of the sector's debt.

#### Exhibit 11

## State-wise debt as a % of Net Fixed assets (including CWIP) for FY22 Percent

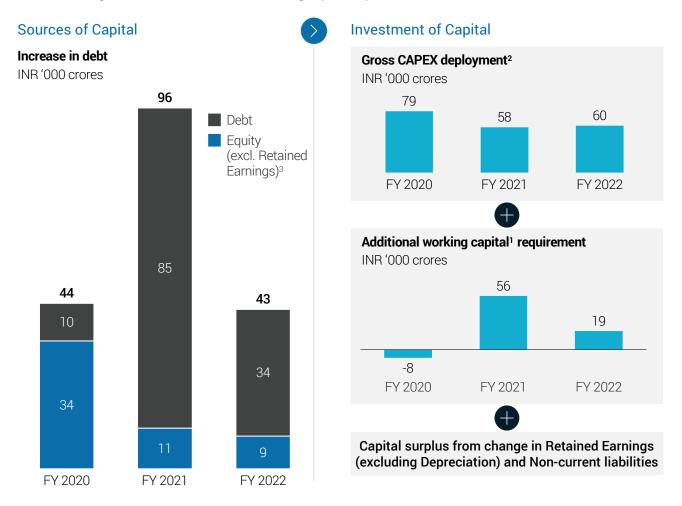

Equity investment (including conversion of loan-takeover subsidy) in the sector increased by INR 54,000 crore over FY20-FY22, of which state utilities infused INR 51,000 crore. This highlights an important shift in the sector, underlining state governments resolute support for their discoms.

Further, the sector observed debt addition of INR 129,000 crore (both short, long term) over FY20-FY22, with pace of debt addition slowing significantly.

CAPEX addition was INR 60,000 crore in FY22, compared to INR 58,000 crore in FY21. The FY22 figures are excluding 4 discoms and 5 power departments for which FY22 financial were not available. Additional Working Capital requirement, reduced significantly from INR 55,500 crore in FY21 to INR 19,000 crore in FY22.

#### Exhibit 12

#### Trend in debt, gross CAPEX and additional working capital requirement<sup>4</sup>

Working Capital = Current Assets - Current Liabilities (excluding Short Term Loans) Includes Capital WIP, Capital advances to contractors

3 Equity (excl. Retained Earnings) = Share Capital, Share Application Money Pending Allotment

FY 2022 figures shown above are based on data of 62 utilities, as financial of 4 discoms and 5 PDs were not available. These include Torrent Power Surat, Torrent Power Ahmedabad, Puducherry PD, Mizoram PD, Daman & Diu PD, Andaman & Nicobar Islands PD, Lakshadweep Islands ED, JPDCL, KPDCL

## 4.3.2 Payables to GenCos & TransCos

Trade payables to GenCos and TransCos increased by 10.5 percent over FY20-FY22 to reach INR 2.81 lakh crore. The increase, however, was altogether driven by rising power purchase cost, as the days payable (cycle times for payments) remained constant at 163 days during this period.

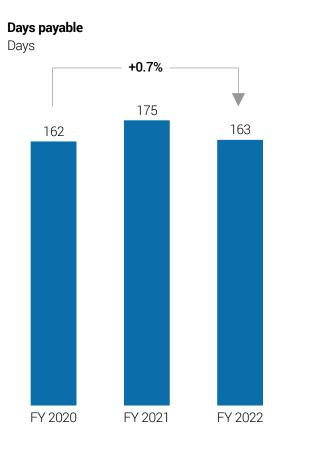

#### In FY22, the sector cleared-off accumulated payables from FY21 to reach pre-COVID-19 levels

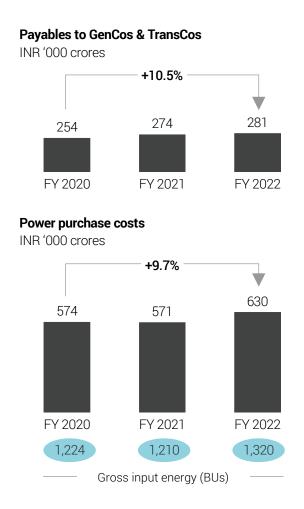

Payables to generation and transmission companies (GenCos and TransCos) were adversely impacted in FY21, driven by significant financial losses in the sector and an increase in consumers' receivables. As a result, the days payable increased from 162 days in FY20 to 175 days in FY21. Thus, going into FY22, the sector needed to clear payables accumulated during FY21. Against this backdrop, the days payables showed a notable return to pre-COVID-19 levels of 163 days in FY22.

Despite this positive trend, days payables remain at much higher than desired levels, considering the LPS Rules, 2022 specify a timeline of 45 days for clearing bills. However, resolving these issues is challenging given that the sector is overall loss making, and customers receivables are still increasing. LPS Rules, 2022 are a major step towards resolving mounting payables – the scheme provide mechanism for settlement of outstanding dues as well as provisions to encourage distribution utilities to make timely bill payments.

#### Exhibit 13

#### Trend in days payables and payables to GenCos and TransCos for FY20 to FY22

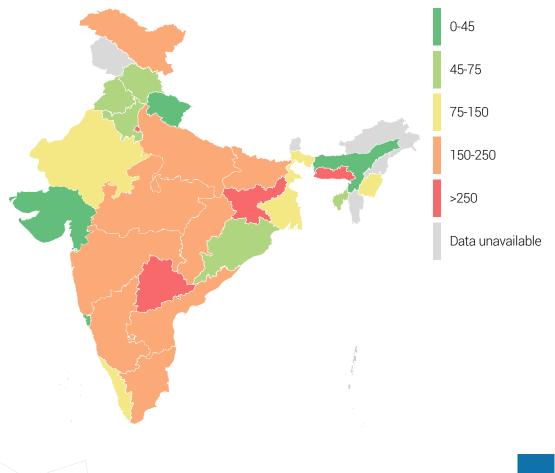

14 utilities improved their Days payable to Gencos and Transcos by more than 50 days over FY20-FY22. Meanwhile, 8 utilities saw a decline of more than 50 days in Days payable during the same period.

# 10 discoms, with >250 Days payable, contributed to 40% of the country's total payables to GenCos and TransCos

|           |               | Days payable to GenCos | Payables to GenCos & TransCos<br>(FY22) |                       |  |
|-----------|---------------|------------------------|---|-----------------------|--|
| Utility   | State         | & TransCos (FY22)      | Individual                              | As % of India's total |  |
| BYPL      | Delhi         | 645                    | 6,705                                   | 2.4%                  |  |
| JBVNL     | Jharkhand     | 537                    | 9,469                                   | 3.4%                  |  |

| MPPoKVVCL | M.P.          | 321                    | 9,377                                   | 3.3%                  |  |
| PuVVNL    | Uttar Pradesh | 282                    | 9,309                                   | 3.3%                  |  |
| MVVNL     | Uttar Pradesh | 263                    | 9,942                                   | 3.5%                  |  |
| DVVNL     | Uttar Pradesh | 251                    | 7,510                                   | 2.7%                  |  |

Exhibit 14

## **State-wise days payable for FY22** Days

### 4.3.3 Trade receivables

During FY20-FY22, trade receivables jumped by 17 percent, from INR 2.07 lakh crore to INR 2.42 lakh crore. During this period, revenue from operations also rose by about 10 percent, resulting in days receivable increasing from 134 to 142.

#### Days receivable recovered in FY22

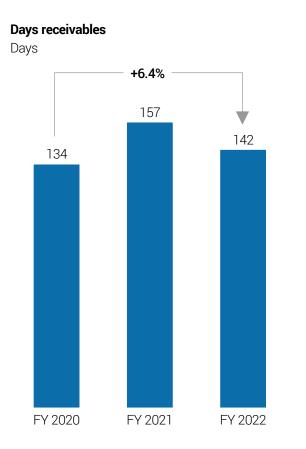

The net trade receivables increased in FY21 even with a corresponding decrease in revenues, reflecting the adverse impact of COVID-19 on the collections. However, the sector recovered in FY22 on the back of improved collection processes by discoms, as evidenced by a surge in collection efficiency (customer billing component of revenues) and reduction in Days receivables.

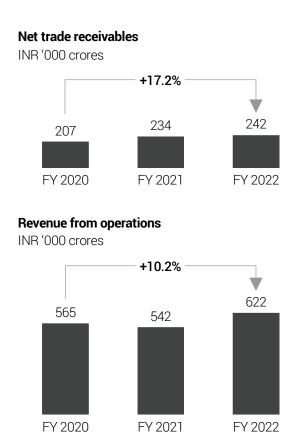

Part of the receivables accumulated during FY21 were not collected in FY22, as many commercial and industrial (C&I) customers faced COVID-19 induced business disruption. This resulted in higher trade receivables in FY22 compared to FY20.

The government has taken major steps to strengthen billing cycles and to bring down trade receivables. This includes installation of smart, pre-paid meters and mandating discoms to further improve their collection process and incentivizing them with grants under RDSS.

#### Exhibit 15

#### Trend in days receivable and trade receivables for FY20 to FY22

Several utilities continue to grapple with high trade receivables – there are 14 utilities in FY22, with days receivable greater than 200 days.

#### Four utilities contribute to ${\sim}49\%$ of India's Net trade receivables in FY22

|         |               |                        | Net trade receivables (FY22) |                       |
|---------|---------------|------------------------|------------------------------|-----------------------|
| Utility | State         | Days receivable (FY22) | Individual                   | As % of India's total |
| MSEDCL  | Maharashtra   | 202                    | 46,522                       | 19.2%                 |
| PuVVNL  | Uttar Pradesh | 864                    | 31,147                       | 12.9%                 |
| MVVNL   | Uttar Pradesh | 597                    | 22,486                       | 9.3%                  |
| DVVNL   | Uttar Pradesh | 596                    | 18,060                       | 7.5%                  |

Overdue from state government offices continue to contribute to high trade receivables in the sector. Government dues averaged about 24 percent of the net trade receivables over FY20-FY22, without displaying any noticeable improvement. This warrants for better financial discipline among government entities to service their payments to the distribution companies on time.

# 4.3.4 State factors – subsidy arrears, regulatory assets and tariff orders

While the state governments made considerable progress in covering subsidy disbursal deficits in FY22, undissolved balances of subsidies arrears and regulatory assets continue to adversely impact the sector.

**Regulatory assets:** The power sector's regulatory assets stood at about INR 1.6 lakh crore in FY22, having remained stagnant during the previous year. This highlights the urgent need for states to make greater efforts to clear their regulatory dues through appropriate tariff increments/capital support. To address the challenge, the states are being pursued to draw up a liquidation plan for regulatory assets and and non-creation of new regulatory assets going forward.

Six states – Tamil Nadu, Rajasthan, Delhi, West Bengal, Maharashtra, Kerala – contribute almost entirely to the regulatory assets challenge:

- Tamil Nadu emerged as the biggest concern. The state regulator published revised tariffs in Sep 2022. The FY23 tariff order recognized regulatory assets worth about INR 89,000 crore.
- Rajasthan's regulatory assets remained constant at INR 49,000 crore over FY21-22.
- In Delhi, the FY23 tariff orders were not released. The state had significant regulatory assets at the beginning of FY22.
- Maharashtra and Kerala showed progress in liquidation of regulatory assets.

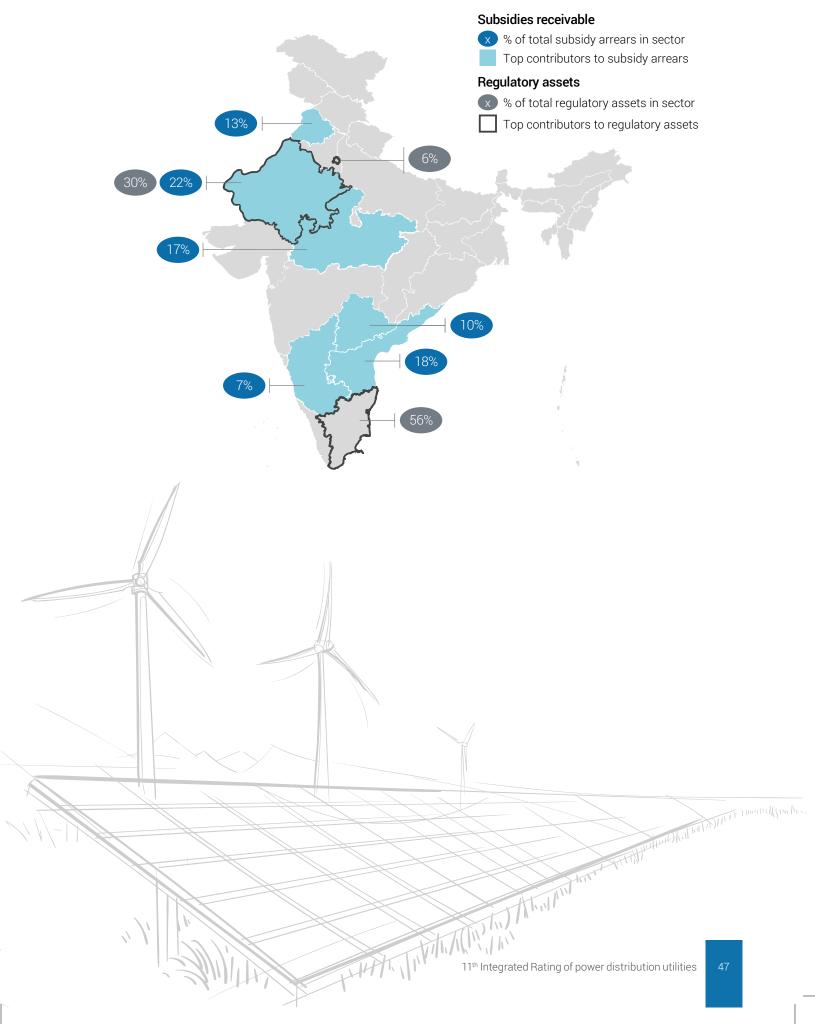

**Subsidy Arrears:** Overall, subsidy arrears declined by 15 percent to INR 66,000 crore in FY22. Six states—Rajasthan, Andhra Pradesh, Madhya Pradesh, Punjab, Telangana, Karnataka, together account for INR 58,500 crore or 88 percent of total subsidy receivables in the sector.

**Tariff orders:** Tariff orders for FY23 are yet to be issued for 6 utilities – BRPL, BYPL, TPDDL (Delhi), JBVNL (Jharkhand), IPCL (West Bengal) and Arunachal PD. Also, true-up orders are yet to be issued for 19 utilities. Further, the issuance of tariff and true-up orders was delayed for 20 and 13 utilities respectively.

Delay or non-issuance of tariff orders hampers the recovery of costs thereby straining the utility financials.

Exhibit 16

#### **Top contributors to subsidies arrears and regulatory assets for FY22** Percent

# 4.4 Scope for improvement

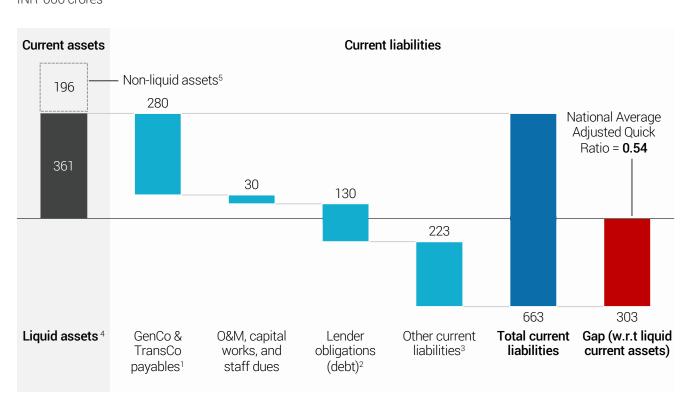

The power distribution sector displayed several encouraging green shoots in FY22, including recovering from some of the shocks experienced due to COVID-19. However, there remains a long way to go to turnaround the sector. Some areas that need immediate attention include, profitability, clearing debt, improving billing process and solving for liquidity crunch. Further, revamping operations of certain discoms, which contribute heavily to the sector's financial distress, can lead to tremendous improvements for the entire industry. This section digs deeper into some of these challenges.

## 4.4.1 Enhancing sectoral liquidity

The sector continued to suffer from liquidity crunch, with discoms' current liabilities exceeding their overall current assets, and amounting to nearly twice the value of their current liquid assets<sup>13</sup>. The sector's total liquidity gap is nearly INR 3.03 lakh crore and the discoms' combined liquid assets are adequate to cover only their generation, transmission and operational liabilities. Including their non-liquid assets, their lender obligations can be covered too. However, they have even more liabilities, which cannot be covered without liquidating non-current assets or marshalling external support.

<sup>13</sup> Current liquid assets comprise cash, receivables pending for less than three months, subsidies receivable, and other liquid financial assets

#### Exhibit 17

#### Breakdown of Adjusted Quick Ratio components INR '000 crores

1 Includes payables to GenCos, TransCos, Fuel Costs, Railway Receipt Costs

2 Key Components – (a) Short term loans – (b) Interest accrued & due on loans (c) Current maturities of Long-term loans – from banks / financial institutions / others

3 Includes Electricity duty/cess payable, other financial liabilities and other current liabilities

4 Key components – (a) Trade receivables <3 months old, subsidy receivables, cash and cash equivalents, unbilled revenue, market investments and other current assets

5 Key components – (a) Trade receivables >3 months, current regulatory assets, inventories, pre-paid expenses, current tax assets, and assets held for sale

## 4.4.2 Improving performance at targeted utilities

Overall, the sector has shown significant positive trends in FY22. Of the 50 discoms with 3 year financials available, 31 showed an improving ACS-ARR trajectory in FY22. These together held 48 percent of the sector's debt and 64 percent of sector's payables to GenCos & TransCos. This is a significant shift from the 10<sup>th</sup> Integrated Ratings, where only 15 utilities, holding 22 percent of sector's payables and 29 percent of sector's debt, showed an improving trajectory.

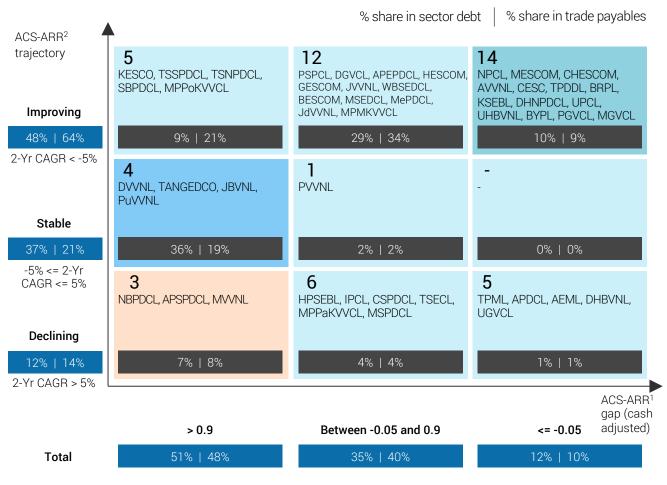

14 utilities exhibited a declining ACS-ARR trajectory in FY22. These together held 12 percent of the sector's debt and 14 percent of sector's payables to GenCos & TransCos. In comparison, 21 utilities, together holding 61 percent of sector's payables and 53 percent of sectors' debt exhibited a declining trajectory in FY21 in the 10<sup>th</sup> Integrated Ratings.

Within these, three are in critical state and could be focused on for performance improvement:

- MVVNL ACS-ARR gap (2.15 INR / kWh), holds 3 percent of sector debt, 4 percent of sector payables
- APSPDCL ACS-ARR gap (1.06 INR / kWh), holds 3 percent of sector debt, 3 percent of sector payables
- CSPDCL ACS-ARR gap (0.40 INR / kWh), holds 1 percent of sector debt, 3 percent of sector payables

Exhibit 18

#### Mapping of discoms by ACS-ARR gap bracket vs ACS-ARR gap trajectory

Note: The above figures exclude Power Departments and 7 Discoms which have not completed 3 full years of operation 1 ACS-ARR Gap (cash adjusted) – weighted average values have been used Further, there are five utilities with a stable ACS-ARR trajectory in FY22, of which following utilities could be focused on for performance improvement:

- TANGEDCO ACS-ARR gap (1.87 INR / kWh), holds 25 percent of sector debt, 9 percent of sector payables
- PuVVNL ACS-ARR gap (1.84 INR / kWh), holds 5 percent of sector debt, 3 percent of sector payables
- DVVNL ACS-ARR gap (1.44 INR / kWh), holds 3 percent of sector debt, 3 percent of sector payables
- JBVNL ACS-ARR gap (1.86 INR / kWh), holds 3 percent of sector debt, 3 percent of sector payables

## 4.5 Policy initiatives to support the sector

The Ministry of Power has implemented a variety of schemes and initiatives to reinvigorate the sector over the last decade. The most significant among these has been the Revamped Distribution Sector Scheme (RDSS). Launched in July 2021 with an outlay of INR 3.03 crore available till FY25-FY26, RDSS is a reforms-based and results-linked scheme that aims to reduce pan-India AT&C losses to 12–15 percent (from the current 21.5 percent) and bring down the ACS-ARR gap to zero. For availing funds available under this scheme, states must prequalify a set of criteria, including publishing audited financial reports, non-creation of additional regulatory assets, and upfront liquidation of dues or subsidies to discoms.

In September 2021, the Ministry also introduced new norms for discoms to become eligible for loans disbursed by the PFC and REC. These included timely availability of audited accounts, timely filing of tariff petitions and issuance of tariff orders, clearance of any pending subsidies and bills due to discoms, preparation of an ACS-ARR gap and AT&C loss improvement action plan, and zero defaults. In FY21, the Ministry also announced additional borrowing permissions to the extent of 0.5 percent of state GSDP. Each of these permissions is, inter-alia, linked to the reduction of AT&C losses and ACS-ARR gap for the next 4 to 5 years.

Given the focus on reducing AT&C losses and improve billing efficiency, the Ministry of Power has mandated electricity distribution companies to undertake energy accounting on periodic basis. The Manner and Intervals for Conduct of Energy Audit (Accounting) in electricity distribution companies Regulations, 2021 were issued in Oct 2021. As per the regulations, the power distribution utilities are required to conduct quarterly energy accounting and annual energy audit through energy managers and energy auditors certified by BEE (Bureau of Energy Efficiency). This exercise could help the utilities to get a detailed understanding of technical and commercial losses in the system, identify areas of high losses, energy thefts/pilferage and accordingly plan efficiency improvement steps, prioritize intervention areas. Further, steps have been initiated under RDSS for rollout of prepaid smart meters, smart Distribution Transformer (DT) metering, communicable feeder meters, and one time 100 percent customer indexing exercise in a bid to automate the energy accounting exercise.

In June 2022, the Ministry released Late Payment Surcharge and Related matters Rules, 2022 to tackle the mounting payables to GenCos and TransCos. The rules provisioned for converting discoms' outstanding dues to GenCos & TransCos into Equated Monthly Installments (EMIs) for gradual liquidation of these dues. Further, to promote timely payment of current power bills, the power supply would be regulated for discoms which fail to clear their bills one month after the due date of payment or two and half months after the presentation of bill by the generating company.

Further, the PFC and REC, have linked the performance in Annual Integrated Ratings to their lending terms. The Ministry has also launched a dashboard called Urja DRISHTI (Discom Rating for Integrated Solvency, Health and Transparency Improvement), accessible at urjadrishti.com, to capture the insights emerging from 11th Integrated Rating Exercise. Urja DRISHTI will increase transparency in the sector, help discoms benchmark themselves with their counterparts in other states, and identify their strengths and weaknesses. This knowledge can position them to better their performance by drawing up an action plan specific to their needs.

# Comparison with 10<sup>th</sup> Integrated Rating Exercise

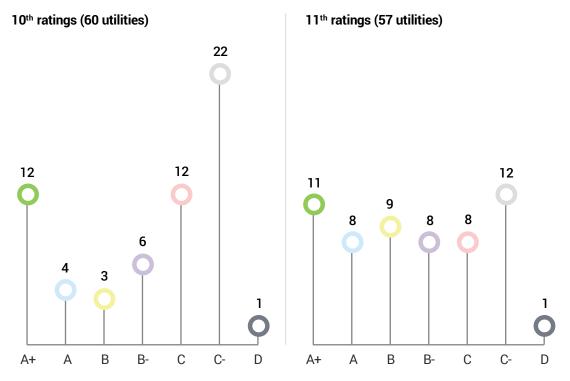

The 11<sup>th</sup> Integrated Rating Exercise uses the same rating framework as its predecessor, allowing stakeholders to easily compare overall sector and utilities' performance and gain insight into major drivers. Some overarching highlights include:

- Of the 57 discoms covered in 11<sup>th</sup> Integrated Ratings, 46 saw improved scores
- Of the remaining 11, seven saw their integrated score fall by less than 3 points
- 24 discoms saw grades improve, whereas only one discom has been downgraded from 10<sup>th</sup> to 11<sup>th</sup> ratings

Consequently, the number of discoms awarded C or lesser grade (C-, D) have reduced from 35 to 21 in the  $11^{\rm th}$  ratings.

#### Exhibit 1

State and Private discoms: Comparison of grades in 10<sup>th</sup> and 11<sup>th</sup> ratings

Note: 11th ratings excludes the following discoms - Torrent Power Ahmedabad, Torrent Power Surat and Ladakh (considered as PD)

#### Exhibit 2

#### Power departments: Comparison of grades in 10<sup>th</sup> and 11<sup>th</sup> ratings

A comparison of rankings from both years (as seen above) highlights cash adjusted ACS-ARR Gap as the biggest contributing factor for rise or fall in ratings. ACS-ARR gap carries a weightage of 35 points (out of 100) for discoms and 55 (out of 100) for the power departments. Further, change in ACS-ARR gap has significant downstream impact on parameters such as DSCR, leverage, and subsidy booked/realized, considering the factors that affect ACS-ARR also affect these metrics.

# **5.1** 11<sup>th</sup> vs 10<sup>th</sup> ratings: Grade and score snapshot

#### Notes:

- 1. Red card metrics attracted
- 2. Grade over-ride due to Regulatory Assets disincentive for BRPL, BYPL
- 3. Grade over-ride due to ACS-ARR Gap boundary conditions for KESCO
- 4. Grade over-ride due to Loan default in MePDCL
- 5. For new Utility (with 2-year operations), weighted average metrics have been calculated assuming 60% weightage for FY22, and 40% for FY21. This includes computation methodology applied in TPWODL, TPSODL, TPCODL, APCPDCL, KPDCL, JPDCL
- 6. For new Utility (with 1-year operations), weighted average metrics have been calculated assuming 100% weightage for FY22. This includes computation methodology applied in TPNDOL
- 7. Torrent Power Surat and Torrent Power Ahmedabad have not been included in the 11th Integrated Ratings

#### 1. 11<sup>th</sup> ratings includes Ladakh as PD

2. FY22 financials were not received for Mizoram PD, Puducherry PD, Andaman and Nicobar PD, Daman & Diu PD, Lakshadweep PD – consequently no marks have been awarded for them for financial metrics

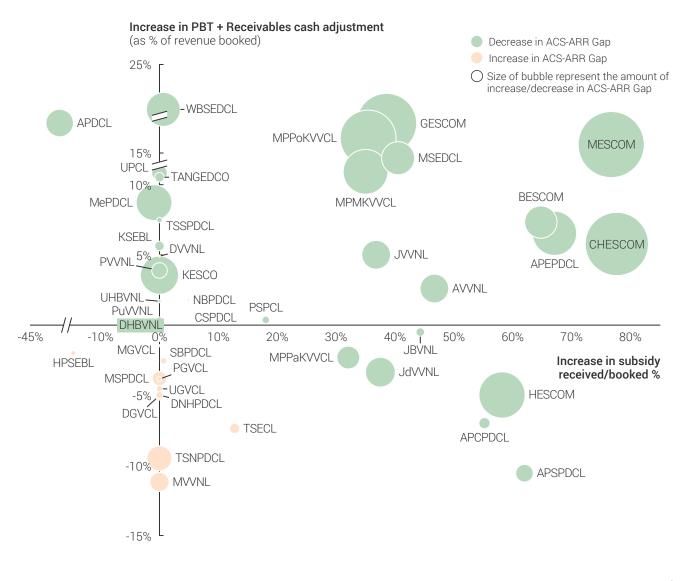

# **5.2** Cash-adjusted ACS-ARR movement b/w 10<sup>th</sup> and 11<sup>th</sup> Ratings

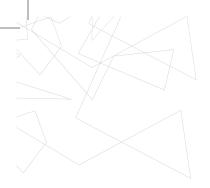

The ACS-ARR gap for state discoms is driven by a combination of two factors:

- Cash adjusted PBT (operational performance): Majorly in control of the discoms and driven by billing and collection efficiencies. Can see some amount of external impact if there is delay in issuance of tariff orders.
- **Subsidy disbursal:** Under direct control of the state governments. Any shortfall in subsidy disbursal with respect to subsidy booked, directly impacts the cash adjustment in ACS-ARR calculation.

#### Exhibit 3

#### Contributing factors to shift in state discoms' ACS-ARR Gap from FY21 to FY22

From FY22 to FY21, 30 out of 43 state discoms<sup>14</sup> improved their ACS-ARR gap, helped by a combination of both operational performance (cash-adjusted PBT rose by more than 5 percent of revenue booked for 17 discoms) and subsidy disbursal (improved by more than 30 percent of subsidy booked for 16 discoms). For the utilities, where ACS-ARR fell it was because of a decline in operational performance.

### 5.2.2 Private Discoms

Private discoms' ACS-ARR gap is entirely influenced by their own operational performance (cashadjusted PBT) since they do not receive subsidies. Here, the ACS-ARR gap is assessed on the basis of two components in operational performance: 1) PBT (accrual) and 2) cash adjustment due to trade receivable (cash collections).

Four out of nine<sup>15</sup> private discoms improved their ACS-ARR gap in FY22 from FY21. PBT (accrual) has been the major driver for ACS-ARR movement in private discoms, with the exception of TPCODL and CESC, which saw significant change in the cash collections.

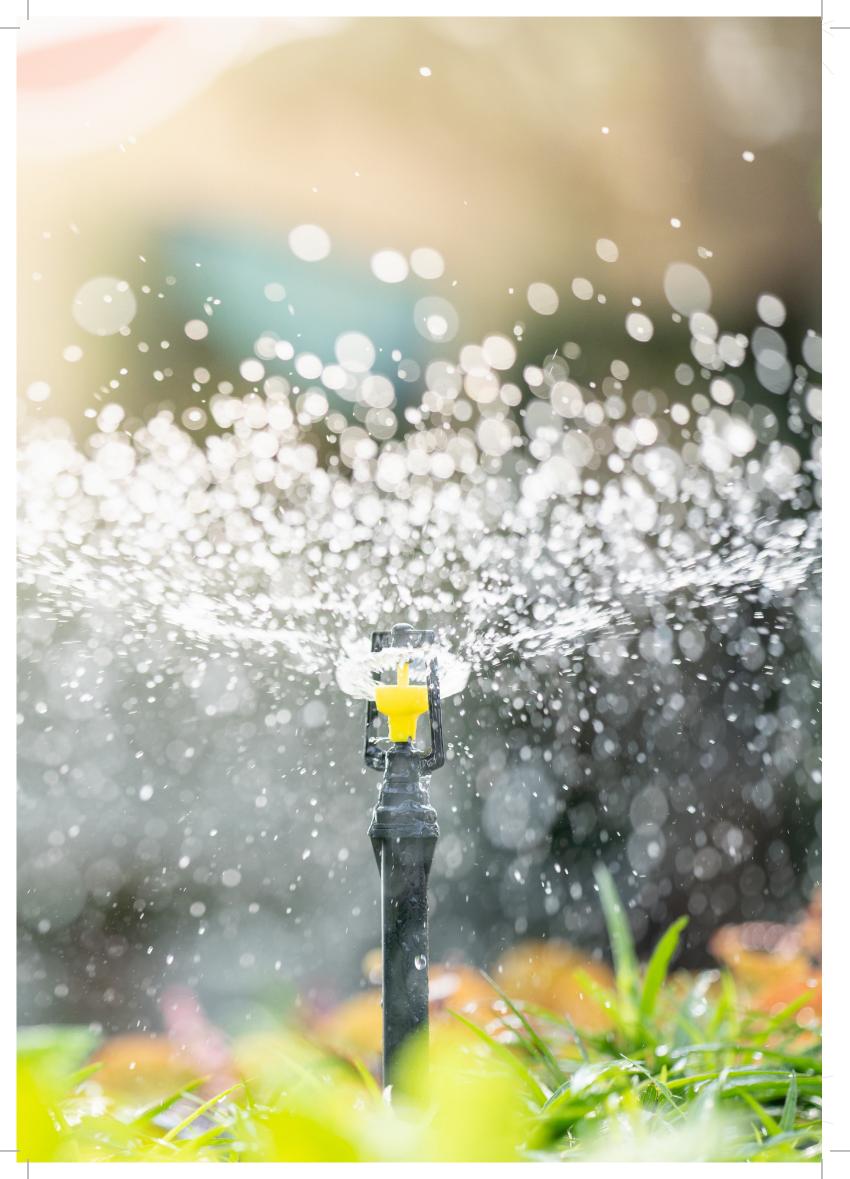

#### Exhibit 4

#### Contributing factors to shift in private discoms' ACS-ARR Gap from FY21 to FY22

<sup>14</sup> Excluding JPDCL and KPDCL. They have not been included since their power costs and revenues are accounted for in Government's books and separate details for other expenses are not available

<sup>15</sup> Of the 14 private discoms, Torrent Power Surat and Torrent Power Ahmedabad have been excluded. Further, TPWODL and TPSODL have not been included since they had only ~90 days of operations in FY21. TPNODL has also been excluded as the new entity started operations in FY22 post take-over

# Best practices adopted by discoms

Along with government launching interventions to revitalize the sector, discoms also share equal responsibility in strengthening their businesses and improving performance. They could proactively identify their shortfalls, especially by using the Urja DRISHTI dashboard and analyzing individual discom reports. The most common shortfalls for discoms include increasing billing efficiency, resolving collection-related problems and working capital management. Further, in some instances, external factors such as state government and state regulators come into play as well.

This section explores some of the best practices already adopted by discoms across the country, to guide other utilities. Each discom is thus advised to identify its most pressing pain points independently and employ whichever best practices apply to them most.

#### For improving billing efficiency:

 Digitize bills: Many well performing discoms are moving to online/electronic bills, especially since COVID-19 and lockdowns affected customer mobility. They are also partnering with popular mobile application to deliver digital electricity bills.

Going one step further, the utilities have integrated bill generation with digital bill payment through multiple channels (SMS, website, UPI, Paytm, partner banks' apps etc.). Top performing utilities collect nearly 85 percent of their payments through digital channels. AEML, for instance, has nearly done away with physical payment counters and replaced them with online payment and payment mobile vans.

Digitization has helped discoms to significantly reduce turnaround time for bill generation and delivery. More importantly, customers no longer need to physically visit payment counters and stand in long queues, which improved collections.

- Manage customer relationships better: Utilities are deploying digital, AI-enabled tools to
  improve their ties with customers. Functionalities such as IVR, Chatbots for FAQs, automated
  emails, ready hotline, dedicated WhatsApp number, etc. help to provider better customer
  service and save manpower and time. TPML has also launched Microsoft Kaizala which is a one
  stop digital solution for various services offered by the discom to its consumers, including bill
  payment, customer complaints, a way to upload meter readings, chat-based assistance etc.
- Upgrade grid infrastructure: Discoms have implemented high voltage distribution systems (or HVDS) and are making great efforts in undergrounding cables, bifurcating feeders based on loading, rerouting feeders and replacing open conductors with AB cables (aerial bunched cable) to reduce technical losses. Some have installed Automatic Meter Readers (AMR) for HT (high tension) customers, reducing the timeline for bill generation. Others have implemented CT meters for industrial consumers and adopted DT metering for greater accuracy. TPML, for instance, has demonstrated technological innovation in substations, including using Smart LT Network equipment with anti-theft mechanisms and installing LoRa NONC devices at remote, unmanned substations to communicate critical operational parameters.
- Acquire advanced meter reading and bill generation capabilities: Utilities that have acquired
  these technologies have reduced manual intervention (and errors) in generating customer bills,
  improving efficiency. APDCL, for example, deployed an AI-based app that uses images taken by
  meter readers to autofill units. TPDDL partnered with an AI firm to deploy OCR (optical character
  recognition) technology and gather meter readings from mobile device cameras. AEML and
  BRPL have been using specialized devices that can connect to meters via optical cables and
  download billing data. PGVCL deployed an in-house software that compiles GPRS data from
  meters on faulty lock, <20 units consumers, etc.</li>
- Implement robust checks to reduce fraud: Leading state utilities in Gujarat and Haryana and several private utilities have employed dedicated teams for analyzing data to identify fraud. At some of these utilities, accountability for loss monitoring resides with the dedicated substation and feeder-level managers. They regularly monitor MIS reports and have established the following checks to ensure that there are no revenue leakages:
  - Investigating frequent zero and average billed connections through onsite visits, phone calls and notices
  - · Removing service lines from permanently disconnected consumers to prevent misuse
  - · Bringing all newly energized connections under the billing cycles
  - · Identifying and investigating high loss and low consumption connections
- Maintain tight vigilance driven by technology: Many utilities hire dedicated check squads and are using technology to conduct frequent mass vigilance drives with wide publicity to contain theft. PGVCL, for example, is using drones for enforcing anti-theft surveillance.

#### For boosting collection efficiency:

- Lead disconnection drives and settlement schemes for defaulting customers: Top performing utilities tightly follow disconnection rules and regulations for defaulting customers. They often conduct mass disconnection drives, wherein they also provide spot payment facility to such customers for avoiding disconnection. Some state governments have also lent support in this regard. For example, government of Uttarakhand provided one time settlement scheme to customers who had long and overdue payments.
- Run special programs to improve awareness and engagement in rural areas: Partnering with post offices and gram panchayats and deploying dedicated agents to improve rural collections have helped discoms with large rural territories to improve collection efficiency. Haryana discoms have run successful programs to educate consumers about electricity usage and drive fundamental shifts in consumer behavior. These programs included rural roadshows as well as tie-ups with educational institutions to create awareness at the grassroots level. TPML leads SAKHI (Social Advancement for Knowledge and Household Income), under which, women have been engaged for electricity billing and recovery and have been provided multiple well-being measures.

State governments have also helped by appointing village entrepreneurs, which manage collections from rural customers, who otherwise may have to travel long distances to go to collection centers.

#### For enhancing organizational constructs and increased outreach:

• **Build capabilities:** Many discoms have been actively investing in building employee capabilities, often through partnerships with academic institutes such as Centralized Gujarat Energy Knowledge Centre, National Power Training Institute and Tata Power Skill Development Institute. The utilities also have provisions for training their employees at national institutes like IIM, IIT & Electrical Research and Development Association.

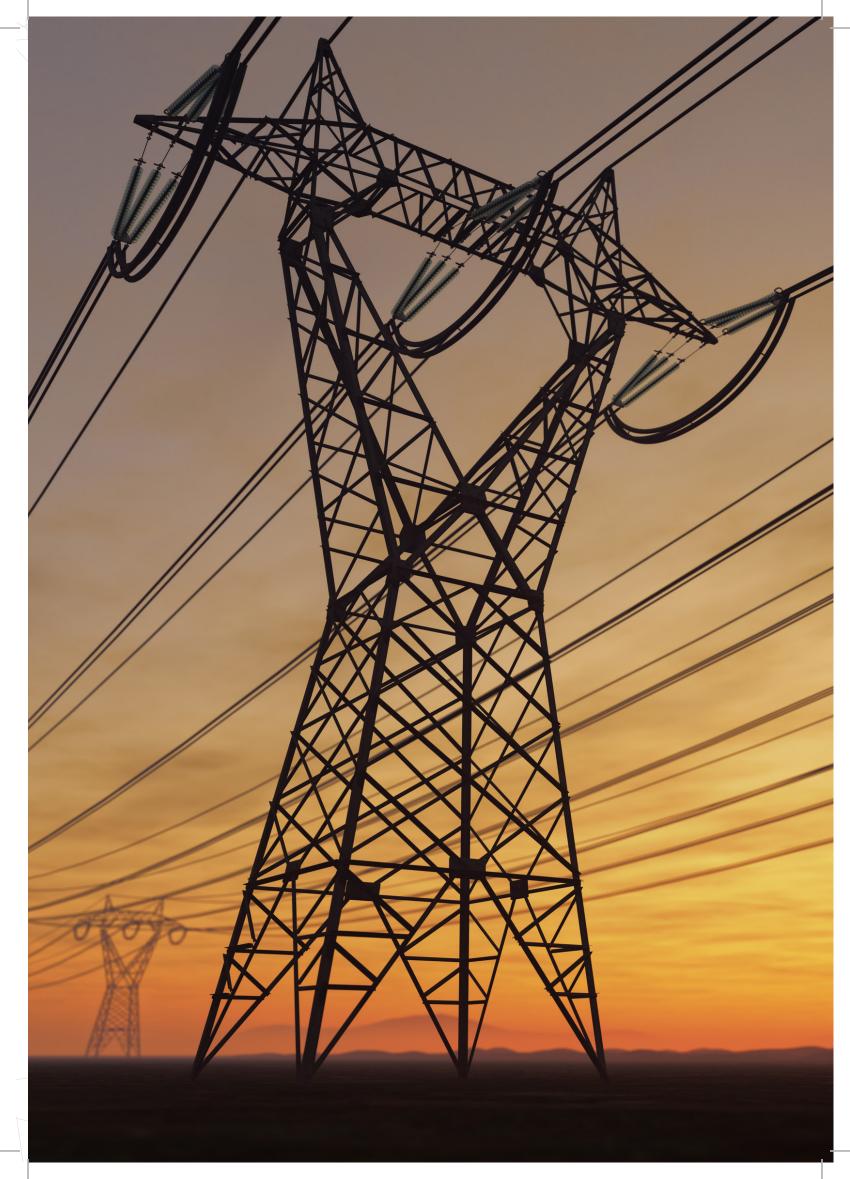

Discoms could focus on building technological capabilities as well. Integration of ERP system with on-ground operations can enable automating energy accounting process. Further, with the onset of Robotic Processes Automation, daily operations can be digitized, achieving greater accuracy and reduced turnaround time.

- Optimize KPIs for right incentivization: The discom operational performance can be further improved by linking it to the right set of KPIs. For instance, some utilities have revised their payment terms with third party collection agencies by linking it to collected amount, number of defaulting customers, etc. PGVCL, for instance, has implemented division-wise profitability, facilitated through an in-house software which automatically monitors and reports the status of collections, defaulting customers, customer complaints for each division. Vigilance staff, sometimes referred to as Revenue Protection Unit (RPU), can be incentivized by setting evaluation targets related to inspection of tariff misuse, unauthorized load, CT ratio errors, etc.
- Implement conducive terms and processes with vendors and suppliers: Many highperforming discoms maintain low liabilities by consistently cashing in early on payment discounts offered by vendors. They also have tightly integrated processes that involve third parties to ensure that funds are received on time (e.g., payment clearance processes with partner banks).
- Offer value-added services: These can help with customer outreach. For example, TMPL, has launched 'Know your Energy Consumption' service, where power demand, consumption, power factor patterns are emailed daily to subscribed customers, enabling them to optimize their usage. Energy Audit services can be provided to high-value electricity consumers to help them identify power wastage, suggest possible measure to save power.
- Increase media usage: Mass media channels (print media, OOH advertising and TV) can be
  used to promote collection channels and increase outreach. Further, for reaching remote/rural
  customers, channels such as phone calls, SMS, email, radio, TV and print media can be used in a
  structured manner to send reminders for due dates and payment.

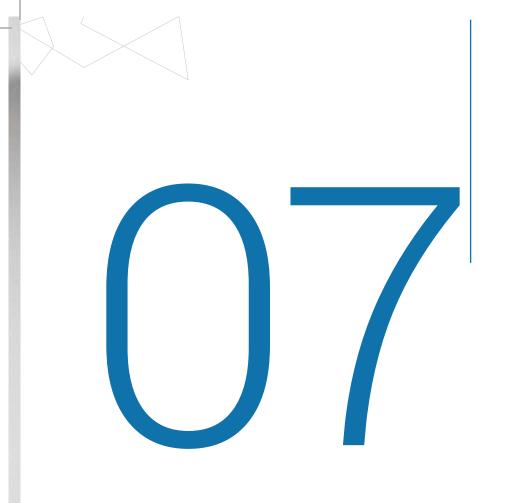

#### Best practices to consider with respect to governance, accounting, etc. are outlined below:

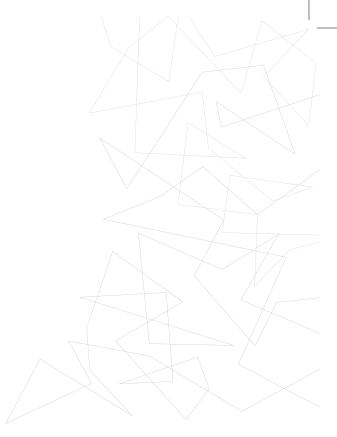

Below we highlight best practices in terms of governance, accounting etc.

- Create a business transformation action plan (including targets and KPIs, activities, monitoring and reviews) and establish a multi-disciplinary project management office for executing it
- Establish a cadence for top-management reviews of targets and milestones. Communicate with central nodal agencies (e.g., PFC and REC for RDSS) frequently
- Centralize key functions such as procurement and back-office operations. This has helped discoms in Haryana realize volume discounts, improve payment terms and optimize talent
- Follow accounting standards (IND-AS) as prescribed under the Companies Accounting Standard Rules
- Maintain records of ageing trade receivables in quarterly or annual accounts
- Maintain records of total electricity duty and delayed payment surcharges, booked and collected, in quarterly or annual accounts

# Appendix

## APPENDIX

# Important updates in the 11<sup>th</sup> Rating Exercise

The 11<sup>th</sup> Integrated Rating Exercise saw some changes in terms of classification, participation and calculation methodology for new utilities:

- Analysis was done basis data available from 57 discoms and 12 power departments.
- Ladakh was considered a power department in the 11<sup>th</sup> rating exercise versus a discom in the 10<sup>th</sup> rating exercise.
- Torrent Ahmedabad and Torrent Surat are the two utilities who have not participated in the 11<sup>th</sup> Integrated Rating Exercise and hence their data is not included in the analysis.
- For two discoms Jammu Power Distribution Corporation Limited (JPDCL) and Kashmir Power Distribution Corporation Limited (KPDCL) – revenue collection, power purchase was managed/financed by the UT government. Given, that individual accounts did not capture this critical financial information, they were not reflective of the true financial health of the discom. Therefore, zero marks were awarded for metrics linked to financial accounts.
- FY22 financials were not received for Mizoram PD, Puducherry PD, Andaman and Nicobar PD, Daman & Diu PD, Lakshadweep PD – consequently no marks have been awarded for them for financial metrics (ACS-ARR Gap, billing efficiency, collection efficiency, distribution loss (SERC approved))
- New utilities with two completed years of operation included only APCPDCL
  - · Included in the main ranking list of 11th rating exercise
  - Weighted average calculation: 40 percent weightage (FY 21), 60 percent weightage (FY 22)
  - Scores: Combine score weightage for two-year CAGR metrics (ACS-ARR Gap, Collection Efficiency, Efficiency) within the respective 'absolute score' metric
- New utilities with one completed years of operation included TPCODL, TPNOCL, TPWODL, TPSODL, JPDCL, KPDCL
  - Weighted average calculation: 100 percent weightage (FY 22)
  - Scores: Combine score weightage for two year, one year CAGR metrics (ACS-ARR Gap, Collection Efficiency, Efficiency) within the respective 'absolute score' metric
- In the 11th rating exercise red card metrics were given to following utilities:
  - Auditor's Adverse Opinion: TANGEDCO, HPSEBL, JBVNL
  - Un-availability of audited accounts: MEPDCL, JPDCL, KPDCL
  - · Default to Banks/FIs: MEPDCL
- Grade for following utilities were downgraded due to over-riding conditions:
  - Loan Default: MePDCL
  - Change in regulatory assets: BRPL, BYPL
  - Overriding ACS-ARR condition: KESCO

Note: Total revenue billed, and cash adjusted revenue has been derived and each cost component has been calculated as a % of billed revenue. Amounts in '000 Crores rounded off to 2 decimal places; % rounded off to nearest whole number; Other numbers rounded off to 2 decimal places; \* Unrealized Revenue.

## **Relative Performance, Key Strengths and Improvement Areas**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.03 in FY21 to 0.64 in FY22. FY21 accounts have been recasted.
  - PBT (excl. Other Subsidy) declined from 0.04% of Revenue booked in FY21 to (-8%) in FY22
  - Tariff Subsidy received improved significantly from 41% of subsidy booked in FY21 to 96% in FY22
- AT&C losses improved significantly from 22.7% in FY21 to 10.0% in FY22 driven majorly by improvement in Collection Efficiency (from 84.2% in FY21 to 97.8% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be reduced currently at INR 0.64/ kWh
  - Negative PBT ((-8%) of Revenue booked)
  - Total Subsidy disbursement 96% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-1%) of Revenue booked)
- Days Payable may be reduced currently at 193 days as compared to LPS norm of 45 days
- Debt Service Coverage Ratio (cash adjusted) can be improved currently it is 0.15 (for max. score, expected greater than or equal to 1.10)
- Leverage (cash adjusted) can be reduced currently it is 33.44 (for max. score, expected greater than 0 upto 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 94%, as compared to National median of ~50%

#### **External Environment**

- Automatic pass through of fuel cost should be implemented
- Govt. Support required for taking over of Discom losses

#### **Specific Disincentives**

• Ind-AS can be adopted, Employee liabilities can be addressed to remove Audit Qualification

# Eastern Power Distribution Company of Andhra Pradesh Limited (APEPDCL)

#### **Overview of APEPDCL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |

## **Relative Performance, Key Strengths and Improvement Areas**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.40 in FY21 to (-0.08) in FY22
  - PBT (excl. Other Subsidy) improved from (-6%) of Revenue booked in FY21 to 0.4% in FY22
  - Tariff Subsidy received improved significantly from 24% of subsidy booked in FY21 to 91% in FY22. Further, the DISCOM received Other Subsidy of 2% of Revenue booked in FY22.
- AT&C losses improved from 20.9% in FY21 to 7.8% in FY22 driven majorly by improvement in Collection Efficiency (from 84.8% in FY21 to 98.7% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) currently at (-0.08)
  - Positive PBT (2% of Revenue booked)
  - Total Subsidy disbursement 92% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Days Receivable currently at 47 days as against National median of ~71 days
- Healthy Adjusted Quick Ratio, currently at 1.29

#### Performance Excellence

• Amongst the top 10% ile performers in Billing Efficiency - currently at 93.4%

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 122 days as compared to LPS norm of 45 days
- Debt Service Coverage Ratio (cash adjusted) can be improved currently it is 0.58 (for max. score, expected greater than or equal to 1.10)

#### **External Environment**

• Automatic pass through of fuel cost should be implemented

#### **Specific Disincentives**

- Ind-AS can be complied, Employee Liabilities can be addressed to remove Audit Qualification
- Director Finance should be exclusive

# Southern Power Distribution Company of Andhra Pradesh Limited (APSPDCL)

#### **Overview of APSPDCL<sup>1</sup>**

| Ownership                   | State Govt. PSU  |
|-----------------------------|--|
| Date of incorporation       | 30-Mar-2000  |

## **Relative Performance, Key Strengths and Improvement Areas**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.55 in FY21 to 0.96 in FY22. Major recasting in FY21 accounts.
  - PBT (excl. Other Subsidy) declined from 0% of Revenue booked in FY21 to (-10%) in FY22
  - Tariff Subsidy received improved significantly from 43% of subsidy booked in FY21 to 105% in FY22
- AT&C losses improved significantly from 38.7% in FY21 to 13.6% in FY22 driven majorly by improvement in Collection Efficiency (from 66.8% in FY21 to 94.2% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 0.96/ kWh
  - Negative PBT ((-10%) of Revenue booked)
  - Total Subsidy disbursement 105% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-8%) of Revenue booked)
- Days Payable may be reduced currently at 187 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 154 days (for max. score, expected less than or equal to 60 days)
- Debt Service Coverage Ratio (cash adjusted) can be improved currently it is (-0.47) (for max. score, expected greater than or equal to 1.10)
- Leverage (cash adjusted) may be improved currently at (-10.71) (for max. score, expected greater than 0 upto 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at ~92%, as compared to National median of ~50%

#### **External Environment**

- Government dues can be lowered currently ~42% of total amount billed to Government in the past 3 years is due
- Automatic pass-through of fuel costs can be implemented
- Govt. support required for taking over of Discom losses

#### **Specific Disincentives**

• Ind-AS can be adopted and Employee Liabilities can be addressed to remove Audit Qualification

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 0.40 in FY21 to (-0.52) in FY22
  - PBT (excl. Other Subsidy) improved from (-11%) of Revenue booked in FY21 to (-2%) in FY22
  - Tariff Subsidy received declined from 144% of subsidy booked in FY21 to 104% in FY22. Further, the DISCOM received Other Subsidy of ~6% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-5%) of Revenue booked in FY21 to 3% in FY22
- AT&C losses improved from 18.7% in FY21 to 17% in FY22 driven by improvement in Billing efficiency (from 81.5% in FY21 to 83% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (4% of Revenue booked)
  - High Total Subsidy disbursement 102% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables (3% of Revenue booked)
- Amongst the top 20% ile performers in Days Payable to Gencos and Transcos- currently at 37 days as compared to LPS norm of ~45 days
- Healthy Cash adjusted Leverage, currently at 0.97
- Healthy Debt levels currently Debt as % of Revenue booked is 11%, as compared to National median of ~50%

#### Performance Excellence

Collection Efficiency currently at 100%

#### **Key Improvement Areas**

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

#### **Specific Disincentives**

- Ind-AS can be complied with to remove audit qualification
- Managing Director can be exclusive

# North Bihar Power Distribution Company Ltd (NBPDCL)

## **Overview of NBPDCL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.06 in FY21 to 0.97 in FY22
  - PBT (excl. Other Subsidy) improved from (-20%) of Revenue booked in FY21 to (-13%) in FY22
  - Tariff Subsidy received improved from 85% of subsidy booked in FY21 to 90% in FY22. Further, the DISCOM received Other Subsidy of  $\sim$ 4% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables decline from 0% of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses deteriorated from 27.8% in FY21 to 28.9% in FY22 driven majorly by decline in Collection Efficiency (from 93.8% in FY21 to 89% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 0.97/ kWh
  - Negative PBT ((-8%) of Revenue booked)
  - Total Subsidy disbursement 91% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-5%) of Revenue booked)
- Days Payable may be reduced currently at 130 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 148 days (for max. score, expected less than or equal to 60 days)
- Debt Service Coverage Ratio (cash adjusted) may be improved, currently at (-0.38) (for max. score, expected greater than or equal to 1.1)
- Leverage (Cash Adjusted) may be improved, currently at (-16.17) (for max. score, expected greater than 0 upto 5)

#### Performance Excellence

- Distribution losses may be reduced current losses are higher than SERC-approved levels
- Billing Efficiency can be improved currently at 79.9% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 89% (for max. score, expected is 99.5%+)

#### **External Environment**

- Automatic pass-through of fuel costs can be implemented
- Govt. support required for taking over of Discom losses

#### **Specific Disincentives**

- Managing Director and Director Finance should be exclusive
- Regulator can address the uncovered revenue gap currently at 6% of ARR

# South Bihar Power Distribution Company Limited (SBPDCL)

## **Overview of SBPDCL<sup>1</sup>**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated marginally from 0.45 in FY21 to 0.46 in FY22
  - PBT (excl. Other Subsidy) declined from (-4%) of Revenue booked in FY21 to (-7%) in FY22
  - Tariff Subsidy received improved from 105% of subsidy booked in FY21 to 110% in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-8%) of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses improved from 20.4% in FY21 to 18.1% in FY22 driven majorly by improvement in Collection Efficiency (from 95.7% in FY21 to 100% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

 Healthy Debt levels – currently Debt as % of Revenue booked is 20%, as compared to National median of ~50%

#### Performance Excellence

• Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be improved currently at INR 0.46/ kWh
  - Negative PBT ((-7%) of Revenue booked)
  - Total Subsidy disbursement 110% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-5%) of Revenue booked)
- Days Payable may be reduced currently at 214 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 192 days (for max. score, expected less than or equal to 60 days)
- Adjusted Quick Ratio can be improved, currently at 0.36 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-0.72) (for max. score, expected greater than or equal to 1.1)
- Leverage (cash adjusted) may be improved currently at (-4.22) (for max. score, expected greater than 0 upto 5)

#### Performance Excellence

- Billing Efficiency can be improved currently at 81.9% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

• Govt. Support required for taking over of Discom losses

#### **Specific Disincentives**

- Ind-AS can be complied to remove Audit Qualification
- Operational Audit Committee can be constituted

# DNH Power Distribution Corporation Limited (DNHPDCL)

#### **Overview of DNHPDCL<sup>1</sup>**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.39) in FY21 to (-0.14) in FY22
  - PBT (excl. Other Subsidy) declined from 9% of Revenue booked in FY21 to 3% in FY22
  - Cash adjustment due to Trade Receivables improved from (-2%) of Revenue booked in FY21 to (-1%) in FY22.
- AT&C losses improved from 5.2% in FY21 to 3.5% in FY22 driven both by improvement in Collection Efficiency (from 98.4% in FY21 to 99.4% in FY22) and Billing Efficiency (from 96.4% in FY21 to 97.1% in FY22).

### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 33% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (3% of Revenue booked)
  - Negative cash adjustment due to Trade Receivables (-1% of Revenue booked)
- Amongst the top 20% ile performers in Days Payable to GenCos & TransCos currently at 32 days as compared to LPS norm of 45 days
- Amongst the top 33%ile performers in Days Receivable currently at 36 days as against National median of ~71 days
- Healthy Debt Service Coverage Ratio, currently at 27.51
- Healthy Adjusted Quick Ratio, currently at 2.04
- Healthy Debt levels, currently Debt as % of Revenue booked is at 0%, as compared to National median of ~50%

#### Performance Excellence

- Amongst the top 10% ile performers in Billing Efficiency currently at 97.1%
- Achieved SERC approved Distribution loss target

#### **Key Improvement Areas**

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

#### **Specific Disincentives**

- Preparation of quarterly accounts can be undertaken by Discom
- Tariff Petition should be filed within the rating timelines

# Dakshin Gujarat Vij Company Limited (DGVCL)

## **Overview of DGVCL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |
|-----------------------------|---|
| Date of incorporation       | 15-Sep-2003   |
| Nature of operations        | Distribution  |
| Area of operations          | 7 districts in the state of Gujarat namely Bharuch, Narmada, Surat (except part of Surat City), Tapi, Dangs, Navsari and Valsad |
| Number of customers         | 3,512,052   |
| % Agricultural customers    | 5.93%   |
| % C&I customers             | 14.68%  |
| Gross input energy          | 26,782 MU (35% change) <sup>3</sup>   |
| Total energy sold           | 24,748 MU (41% change) <sup>3</sup>   |
| Revenue booked <sup>2</sup> | INR 17,396 Cr (40% change) <sup>3</sup>   |
| Profit after tax            | INR 95 Cr   |

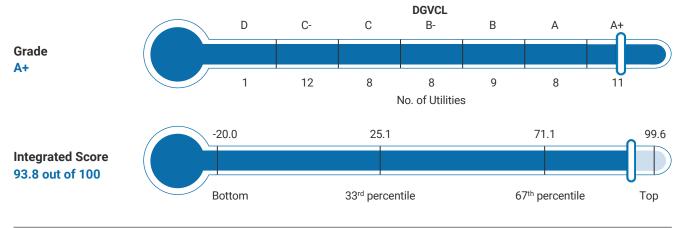

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- DGVCL score declined from 99.4 (10th Ratings) to 93.8 (11th Ratings).
- Major decline in ACR-ARR gap metric in FY22
- Data for FY22 for the 11th Rating Exercise sourced from Audited accounts

DGVCL achieved Rank 6 (out of 51 utilities), with Grade A+ and Integrated Score of 93.8 out of 100. Further, it exhibited a Declining Trajectory w.r.t. Integrated Score

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.25) in FY21 to 0.07 in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
  - Cash adjustment due to Trade Receivables has declined from 3% of Revenue booked in FY21 to (-2%) in FY22.
- AT&C losses improved from 7.4% in FY21 to 4.8% in FY22 driven majorly by improvement in Billing Efficiency (from 92.6% in FY21 to 97% in FY22).

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 10% ile performers in Days Payable to Gencos and Transcos currently at 0 days as compared to LPS norm of ~45 days
- Amongst the top 10%ile performers in Days Receivable currently at 13 days as against National median of ~71 days
- Healthy Adjusted Quick Ratio, currently at 2.73
- Healthy Debt Service Coverage Ratio, currently at 2.29
- Healthy Cash adjusted Leverage, currently at 0.09
- Healthy Debt levels currently Debt as % of Revenue booked is 0%, as compared to National median of ~50%

### Performance Excellence

- Amongst the top 10%ile performers in Billing Efficiency
- Achieved SERC approved Distribution loss target

#### **External Environment**

Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

• Tariff Petition should be filed within the rating timelines

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated marginally from (-0.13) in FY21 to (-0.05) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
- AT&C losses improved from 10% in FY21 to 8.7% in FY22 driven majorly by improvement in Billing Efficiency (from 90% in FY21 to 92.3% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in Days Receivable currently at 18 days as against National median of ~71 days
- Amongst the top 10% ile performers in Days Payable to Gencos and Transcos currently at ~0 days as compared to LPS norm of ~45 days
- Healthy Adjusted Quick Ratio, currently at 2.77
- Healthy Debt Service Coverage Ratio, currently at 5.84
- Healthy Cash adjusted Leverage, currently at 0.11
- Healthy Debt levels currently Debt as % of Revenue booked is 1%, as compared to National median of ~50%

#### Performance Excellence

- Amongst the top 20% ile performers in Billing Efficiency, currently at 92.3%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

• Tariff Petition should be filed within the rating timelines

116 11th Integrated Rating of power distribution utilities

# Paschim Gujarat Vij Company Limited (PGVCL)

## **Overview of PGVCL<sup>1</sup>**

| Ownership                   | State Govt. PSU                         |
|-----------------------------|---|
| Date of incorporation       | 15-Sep-2003                             |
| Nature of operations        | Distribution                            |
| Area of operations          | Saurashtra and Kutch regions            |
| Number of customers         | 6,385,410                               |

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.22) in FY21 to (-0.04) in FY22. Major recasting in FY21 accounts.
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
  - Cash adjustment due to Trade Receivables decline from 3% of Revenue booked in FY21 to 0% in FY22
- AT&C losses improved from 17.9% in FY21 to 16.7% in FY22 driven majorly by improvement in Billing Efficiency (from 82.1% in FY21 to 83.6% in FY22)

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 25% ile performers in Days Receivable currently at 23 days as against National median of 71 days
- Amongst the top 10% ile performers in Days Payable to Gencos and Transcos currently at 0 days as compared to LPS norm of ~45 days
- Healthy Adjusted Quick Ratio, currently at 3.39
- Healthy Debt Service Coverage Ratio, currently at 10.25
- Healthy Cash adjusted Leverage, currently at 0.15
- Healthy Debt levels currently Debt as % of Revenue booked is 1%, as compared to National median of ~50%

#### Performance Excellence

• Collection Efficiency currently at 99.6%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

• Tariff Petition should be issued within the rating timelines

# Uttar Gujarat Vij Company Limited (UGVCL)

## **Overview of UGVCL<sup>1</sup>**

| Ownership                   | State Govt. PSU  |
|-----------------------------|--|
| Date of incorporation       | 15-Sep-2003  |
| Nature of operations        | Distribution   |
| Area of operations          | Six full districts in northern region of Gujarat and three-part districts in western and central areas |
| Number of customers         | 3,936,893  |
| % Agricultural customers    | 10.46%   |
| % C&I customers             | 12.30%   |

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.23) in FY21 to (-0.01) in FY22. Major recasting in FY21 accounts.
  - PBT (excl. Other Subsidy) declined marginally from 1% of Revenue booked in FY21 to 0.8% in FY22
  - · Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22
  - Cash adjustment due to Trade Receivables declined from 4% of Revenue booked in FY21 to (-1%) in FY22
- AT&C losses improved marginally from 6.8% in FY21 to 6.7% in FY22

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 10%ile performers in Days Receivable currently at 12 days as against National median of ~71 days
- Amongst the top 10% ile performers in Days Payable to Gencos and Transcos currently at 0 days as compared to LPS norm of ~45 days
- Healthy Cash adjusted Leverage, currently at 0.11
- Healthy Adjusted Quick Ratio, currently at 2.98
- Healthy Debt Service Coverage Ratio, currently at 5.04
- Healthy Debt levels currently Debt as % of Revenue booked is ~0.4%, as compared to National median of ~50%

### Performance Excellence

- Amongst the top 10% ile performers in Billing Efficiency currently at 93.9%
- Achieved SERC approved Distribution loss target

#### **External Environment**

Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

• Tariff Petition should be filed within the rating timelines

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap remained constant at (-0.11) in FY21 and FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
- AT&C losses improved from 16.9% in FY21 to 13.6% in FY22 driven majorly by improvement in Billing Efficiency (from 83.1% in FY21 to 86.4% in FY22)

## **Key Strengths**

### **Financial Sustainability**

- Amongst the top performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (1% of Revenue booked)
  - High Total Subsidy disbursement 100% of Subsidy booked
  - Positive cash adjustment due to Trade Receivables
- Amongst the top 33%ile performers in Days Receivable currently at 40 days as against National median of 71 days
- Healthy Debt Service Coverage Ratio (cash adjusted), currently at 1.78
- Healthy Cash adjusted Leverage, currently at 2.96
- Healthy Debt levels currently Debt as % of Revenue booked is 19%, as compared to National median of ~50%

## Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

• Employee Liabilities can be addressed to remove audit qualification

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from (-0.22) in FY21 to (-0.34) in FY22
  - PBT (excl. Other Subsidy) improved from 3% of Revenue booked in FY21 to 5% in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 & FY22.
- AT&C losses improved from 17.2% in FY21 to 14.0% in FY22 driven majorly by improvement in Billing Efficiency (from 82.8% in FY21 to 86.0% in FY22)

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (5% of Revenue booked)
  - High Total Subsidy disbursement 100% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Amongst the top 20% ile performers in Days Payable to Gencos and Trancos currently at 42 days as compared to LPS norm of ~45 days
- Amongst the top 10% ile performers in Days Receivable currently at 8 days as against National median of ~71 days
- Healthy Debt Service Coverage Ratio currently at 1.81
- Healthy Cash adjusted Leverage, currently at 3.06

## Performance Excellence

- Achieved SERC approved Distribution loss target
- Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

### **Key Improvement Areas**

#### **Specific Disincentives**

• Managing Director should be exclusive

# Himachal Pradesh State Electricity Board Limited (HPSEBL)

## **Overview of HPSEBL1**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.02) in FY21 to 0.09 in FY22
  - PBT (excl. Other Subsidy) remained constant at (-3%) of Revenue booked in both FY21 and FY22
  - Tariff Subsidy received declined from 107% of subsidy booked in FY21 to 92% in FY22. Further, the DISCOM received Other Subsidy of 1% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables declined from 3% of Revenue booked in FY21 to 0% in FY22
- AT&C losses improved from 14.0% in FY21 to 12.9% in FY22 driven majorly by improvement in Billing Efficiency (from 86% in FY21 to 87.3% in FY22)

### **Key Strengths**

#### **Financial Sustainability**

• Amongst the top 20% ile performers in Days Receivable – currently at 21 days as against National median of 71 days

#### Performance Excellence

• Collection Efficiency currently at 99.8%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

• Debt levels can be reduced – currently Debt as % of Revenue booked is significantly high at 81%, as compared to National median of 50%

#### Performance Excellence

• Distribution losses may be reduced, current losses are higher than SERC-approved levels

#### **Specific Disincentives**

- Delay in Audit of Annual Account can be addressed
- Red Card on account of auditor's Adverse Opinion can be addressed

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- JPDCL score improved marginally from -20.5 (10th Ratings) to -20.0 (11th Ratings).
- Received Red Card as the Audited Accounts are not available
- In case of JPDCL, the Government manages revenue collection and power purchase. Hence, JPDCL accounts do not capture this information. The revenue captured therein is the Grant in aid from the Government to cover for other expenses. Thus, the accounts does not depict the true financial condition of discom and therefore, zero marks have been awarded for metrics linked to financial accounts.
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Provisional accounts.

JPDCL achieved Rank NA (out of 51 utilities), with Grade C- and Integrated Score of -20.0 out of 100. Further, it exhibited a Stable Trajectory w.r.t. Integrated Score

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 2.11 in FY21 to 1.81 in FY22. FY21 accounts have been recasted.
  - PBT (excl. Other Subsidy) improved from (-37%) of Revenue booked in FY21 to (-30%) in FY22
  - Tariff Subsidy received improved from 74% of subsidy booked in FY21 to 118% in FY22.
  - · Cash adjustment due to Trade Receivables declined from (-4%) of Revenue booked in FY21 to (-12%) in FY22
- AT&C losses improved from 43.1% in FY21 to 33.8% in FY22 driven by both improvement in Billing Efficiency (from 65.3% in FY21 to 72.5% in FY22) and Collection Efficiency (from 87.2% in FY21 to 91.3% in FY22)

### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be improved currently at INR 1.81/ kWh
  - Negative PBT ((-30%) of Revenue booked)
  - Total Subsidy disbursement 118% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-12%) of Revenue booked)
- Days Payable may be reduced currently at 537 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 439 days (for max. score, expected less than or equal to 60 days)
- Liquidity can be improved Adjusted Quick Ratio currently at 0.29 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-0.30) (for max. score, expected is greater than or equal to 1.1)
- Leverage (Cash Adjusted) may be improved currently at (-27.01) (for max. score, expected is greater than 0 up to 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 241%, as compared to National median of 50%

#### **Performance Excellence**

- Billing Efficiency can be improved currently at 72.5% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

- Govt. support required for taking over of Discom losses
- Automatic pass-through of fuel costs can be implemented
- Require regulatory support for issuance of tariff order for FY23 and true-up order for FY21

#### **Specific Disincentives**

- Tariff and True-up Orders should be issued within the rating timelines
- Red Card on account of auditor's adverse opinion can be addressed
- Audit Committee can be constituted
- MD and DF can be made exclusive
- Preparation of quarterly accounts can be undertaken by Discom

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.99 in FY21 to (-0.09) in FY22
  - PBT (excl. Other Subsidy) improved from (-8%) of Revenue booked in FY21 to (-2%) in FY22
  - Tariff Subsidy received improved significantly from 86% of subsidy booked in FY21 to 151% in FY22
- AT&C losses improved from 15.9% in FY21 to 11.2% in FY22 driven majorly by improvement in Collection Efficiency (from 95.2% in FY21 to 100% in FY22)

### **Key Strengths**

### **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) currently at (-0.09)
  - Negative PBT ((-13%) of Revenue booked)
  - High Total Subsidy disbursement 149% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-4%) of Revenue booked)
- Healthy Debt Service Coverage Ratio, currently at 1.38

#### Performance Excellence

• Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

### **Key Improvement Areas**

#### **Financial Sustainability**

• Days Payable may be reduced - currently at 172 days as compared to LPS norm of 45 days

#### **External Environment**

- Government dues can be lowered currently ~35% of total amount billed to Government in the past 3 years is due
- Govt. support required for taking over of Discom losses

#### **Specific Disincentives**

• Ind-AS can be complied and Employee Liabilities can be addressed to remove Audit qualification

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.23 in FY21 to (-0.88) in FY22
  - PBT (excl. Other Subsidy) improved from (-12%) of Revenue booked in FY21 to (-7%) in FY22
  - Tariff Subsidy received improved significantly from 85% of subsidy booked in FY21 to 163% in FY22.
  - Cash adjustment due to Trade Receivables improved from (-3%) of Revenue booked in FY21 to (-1%) in FY22
- AT&C losses improved significantly from 20.3% in FY21 to 11.3% in FY22 driven majorly by improvement in Collection Efficiency (from 91.4% in FY21 to 100% in FY22)

### **Key Strengths**

### **Financial Sustainability**

- Amongst the top 10% ile performers in ACS-ARR Gap (cash adjusted)
  - Negative PBT ((-8%) of Revenue booked)
  - High Total Subsidy disbursement 163% of Subsidy booked
  - · Negative cash adjustment due to Trade Receivables
- Healthy Cash adjusted Leverage, currently at 2.69
- Healthy Debt Service Coverage Ratio, currently at 2.20

#### Performance Excellence

• Collection Efficiency currently at 100%

#### **External Environment**

Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 185 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 177 days (for max. score, expected less than or equal to 60 days)

#### **External Environment**

• Govt. Support required for taking over of Discom losses

#### **Specific Disincentives**

• Ind-AS can be complied to remove Audit Qualification

# **Gulbarga Electricity Supply Company Limited (GESCOM)**

## **Overview of GESCOM<sup>1</sup>**

| Ownership                   | State Govt. PSU   |
|-----------------------------|---|

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.27 in FY21 to (-0.73) in FY22
  - PBT (excl. Other Subsidy) improved from (-13%) of Revenue booked in FY21 to 2% in FY22
  - Tariff Subsidy received improved from 92% of subsidy booked in FY21 to 131% in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-6%) of Revenue booked in FY21 to (-3%) in FY22
- AT&C losses improved from 20% in FY21 to 10.5% in FY22 driven majorly by improvement in Collection Efficiency (from 90.6% in FY21 to 100% in FY22)

### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 10% ile performers in ACS-ARR Gap (cash adjusted)
  - Negative PBT ((-1%) of Revenue booked)
  - High Total Subsidy disbursement 131% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-3%) of Revenue booked)
- Healthy Cash adjusted Leverage, currently at 2.35
- Healthy Debt Service Coverage Ratio, currently at 2.42

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 166 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 167 days (for max. score, expected less than or equal to 60 days)

#### **External Environment**

- Government dues can be lowered currently ~33% of total amount billed to Government in the past 3 years is due
- Government support required for taking over of Discom losses

#### **Specific Disincentives**

- Ind-AS can be complied to remove Audit qualification
- Preparation of quarterly accounts can be undertaken by Discom

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.11 in FY21 to (-0.44) in FY22
  - PBT (excl. Other Subsidy) declined from (-17%) of Revenue booked in FY21 to (-23%) in FY22
  - Tariff Subsidy received improved from 101% of subsidy booked in FY21 to 159% in FY22.
- AT&C losses improved from 14.2% in FY21 to 13.5% in FY22

### **Key Strengths**

## **Financial Sustainability**

- Amongst the top 20%ile performers in ACS-ARR Gap (cash adjusted)
  - Negative PBT ((-17%) of Revenue booked)
  - High Total Subsidy disbursement 159% of Subsidy booked
- Healthy Cash adjusted Leverage, currently at 3.82

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 244 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 165 days (for max. score, expected less than or equal to 60 days)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 80%, as compared to National median of 50%
- Adjusted Quick Ratio can be improved, currently at 0.28 (for max. score, expected is 1.00)

#### **External Environment**

• Govt. Support required for taking over of Discom losses

#### **Specific Disincentives**

• Ind-AS can be adopted and Going Concern can be addressed to remove audit qualification

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 0.68 in FY21 to (-1.52) in FY22
  - PBT (excl. Other Subsidy) improved from (-9%) of Revenue booked in FY21 to 9% in FY22
  - Tariff Subsidy received improved from 89% of subsidy booked in FY21 to 166% in FY22.
  - Cash adjustment due to Trade Receivables has declined from 1% of Revenue booked in FY21 to (-2%) in FY22.
- AT&C losses improved from 12.3% in FY21 to 9% in FY22 driven majorly by improvement in Collection Efficiency (from 97.3% in FY21 to 100% in FY22)

### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 10%ile performers in ACS-ARR Gap
  - Positive PBT (1% of Revenue booked)
  - High Total Subsidy disbursement 166% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-2%) of Revenue Booked)
- Healthy Debt Service Coverage Ratio, currently at 3.92
- Healthy Cash adjusted Leverage, currently at 1.34

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

• Days Payable may be reduced - currently at 128 days as compared to LPS norm of 45 days

#### **Specific Disincentives**

- Ind-AS can be complied and Employee Liability can be addressed to remove audit qualification
- Managing Director should be exclusive

# **Kashmir Power Distribution Corporation Limited (KPDCL)**

| Profit after tax            | INR - Cr   |

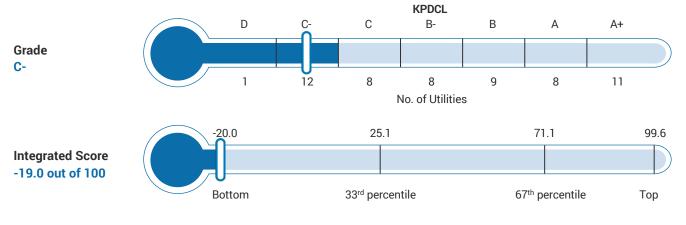

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- KPDCL score improved from -21.5 (10th Ratings) to -19.0 (11th Ratings).
- Received Red Card as the Audited Accounts are not available
- In case of KPDCL, the Government manages revenue collection and power purchase. Hence, KPDCL accounts do not capture this information. The revenue captured therein is the Grant in aid from the Government to cover for other expenses. Thus, the accounts does not depict the true financial condition of discom and therefore, zero marks have been awarded for metrics linked to financial accounts.
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Provisional accounts.

KPDCL achieved Rank NA (out of 51 utilities), with Grade C- and Integrated Score of -19.0 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.03 in FY21 to (-0.29) in FY22. Major recasting in FY 21 accounts.
  - PBT (excl. Other Subsidy) improved from (-3%) of Revenue booked in FY21 to 4% in FY22
  - Tariff Subsidy received remained constant at 100% in FY21 and FY22
  - Cash adjustment due to Trade Receivables declined from 3% of Revenue booked in FY21 to 1% in FY22
- AT&C losses improved from 7.8% in FY21 to 7.7% in FY22

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 25% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (4% of Revenue booked)
  - High Total Subsidy disbursement 100% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Days Receivable currently at 53 days as against National median of 71 days
- Healthy Cash adjusted Leverage, currently at 4.92

#### **Performance Excellence**

- Collection Efficiency currently at 100%
- Amongst the top 20% ile performers in Billing Efficiency currently at 92.3%
- Achieved SERC approved Distribution loss target

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 78 days as compared to LPS norm of 45 days
- Liquidity can be improved Adjusted Quick Ratio currently at 0.28 (for max. score, expected is 1.00)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 110%, as compared to National median of 50%

#### **External Environment**

- Government dues can be lowered currently ~25% of total amount billed to Government in the past 3 years is due.
- · Automatic pass-through of fuel costs is implemented with a significant time lag

#### **Specific Disincentives**

- Ind-AS can be complied and Going Concern can be addressed to remove audit qualification
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved 12% liquidated since FY21 (for max. score, pace of liquidation should be 28%+)

# Madhya Pradesh Madhya Kshetra Vidyut Vitaran Company Limited (MPMKVVCL)

## **Overview of MPMKVVCL<sup>1</sup>**

| Ownership                   | State Govt. PSU  |
|-----------------------------|--|
| Date of incorporation       | 31-May-2002  |
| Nature of operations        | Distribution   |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.75 in FY21 to 0.26 in FY22
  - PBT (excl. Other Subsidy) improved from (-12%) of Revenue booked in FY21 to (-7%) in FY22
  - Tariff Subsidy received improved from 69% of subsidy booked in FY21 to 104% in FY22. Further, the DISCOM received Other Subsidy of ~5% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-10%) of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses improved from 49% in FY21 to 26.4% in FY22 driven both by improvement in Collection Efficiency (from 71.5% in FY21 to 95.8% in FY22) and Billing Efficiency (from 71.3% in FY21 to 76.9% in FY22)

#### **Key Strengths**

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 374 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 228 days (for max. score, expected less than or equal to 60 days)
- Adjusted Quick Ratio currently at 0.33 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio can be improved currently at 0.28 (for max. score, expected is 1.1)
- Debt as % of Revenue booked is significantly high at ~121%, as compared to National median of  $\sim\!50\%$

#### **Performance Excellence**

- Billing Efficiency can be improved currently at 76.9% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **Specific Disincentives**

• Ind-AS can be complied, Employee Liability and Going concern can be addressed to remove audit qualification

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.12 in FY21 to 0.35 in FY22
  - PBT (excl. Other Subsidy) declined from 0% of Revenue booked in FY21 to (-13%) in FY22
  - Tariff Subsidy received improved from 73% of subsidy booked in FY21 to 105% in FY22
  - Cash adjustment due to Trade Receivables has improved from (-6%) of Revenue booked in FY21 to 5% in FY22
- AT&C losses improved significantly from 30.3% in FY21 to 11.6% in FY22 driven majorly by improvement in Collection Efficiency (from 79.9% in FY21 to 100% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20%ile performers in Days Payable currently at 32 days as compared to LPS norm of ~45 days
- Healthy Adjusted Quick Ratio, currently at 1.25

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Debt Service Coverage Ratio can be improved currently at 0.14 (for max. score, expected is 1.1)
- Leverage can be improved which is currently at 18.71 (for max. score, expected greater than 0 up to 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at ~88%, as compared to National median of ~50%

#### **External Environment**

• Govt. support required for taking over of Discom losses

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 2.13 in FY21 to 0.27 in FY22
  - PBT (excl. Other Subsidy) improved from (-26%) of Revenue booked in FY21 to (-15%) in FY22
  - Tariff Subsidy received improved from 70% of subsidy booked in FY21 to 105% in FY22. Further, the DISCOM received Other Subsidy of ~10% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables improved from (-7%) of Revenue booked in FY21 to (-3%) in FY22
- AT&C losses improved from 45.4% in FY21 to 31.0% in FY22 driven majorly by improvement in Collection Efficiency (from 77.1% in FY21 to 94.9% in FY22)

#### **Key Strengths**

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 321 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 218 days (for max. score, expected less than or equal to 60 days)
- Debt levels can be reduced currently Debt as 131% of Revenue booked is significantly high, as compared to National median of 50%
- Liquidity can be improved Adjusted Quick Ratio currently at 0.33 (for max. score, expected is 1.00)
- Debt Service Coverage ratio (cash adjusted) can be improved, currently at 0.21 (for max. score, expected greater than or equal to 1.1)

#### Performance Excellence

- Billing Efficiency can be improved currently at 72.7% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **Specific Disincentives**

- Delay in Audit of Annual Account can be addressed
- Ind-AS can be complied and Employee Liability may be addressed to remove audit qualification

# Maharashtra State Electricity Distribution Company Limited (MSEDCL)

## **Overview of MSEDCL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |
|-----------------------------|---|
| Date of incorporation       | 31-May-2005   |
| Nature of operations        | Distribution  |
| Area of operations          | State of Maharashtra except for some parts of Mumbai city |
| Number of customers         | 28,873,382  |
| % Agricultural customers    | 15.48%  |
| % C&I customers             | 8.22%   |
| Gross input energy          | 144,235 MU (9% change) <sup>3</sup>                       |
| Total energy sold           | 116,663 MU (11% change) <sup>3</sup>                      |
| Revenue booked <sup>2</sup> | INR 90,842 Cr (15% change) <sup>3</sup>                   |
| Profit after tax            | INR 280 Cr  |

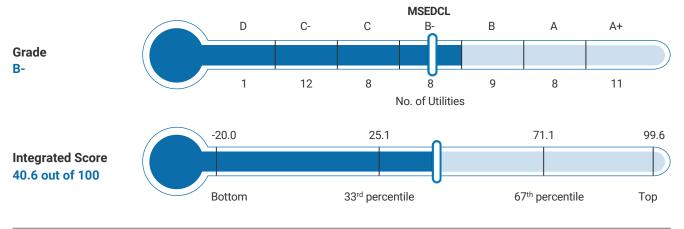

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

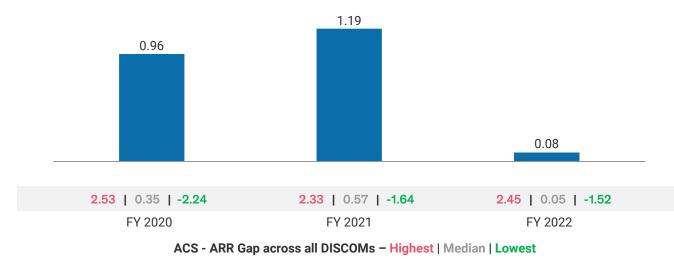

3. Compared to FY 2021.

- MSEDCL score improved significantly from 6.9 (10th Ratings) to 40.6 (11th Ratings).
- Major improvement in ACR-ARR Gap, Leverage, Loss Takeover by State Government metrics in FY22
- Data for FY22 for the 11th Rating Exercise sourced from Audited accounts

MSEDCL achieved Rank 30 (out of 51 utilities), with Grade B- and Integrated Score of 40.6 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.19 in FY21 to 0.08 in FY22
  - PBT (excl. Other Subsidy) improved from (-7%) of Revenue booked in FY21 to (-1%) in FY22
  - Tariff Subsidy received improved from 86% of subsidy booked in FY21 to 127% in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-11%) of Revenue booked in FY21 to (-3%) in FY22
- AT&C losses improved from 27.2% in FY21 to 15.5% in FY22 driven majorly by improvement in Collection Efficiency (from 86.3% in FY21 to 99.7% in FY22)

### **Key Strengths**

#### **Financial Sustainability**

• Healthy Cash adjusted Leverage, currently at 4.03

#### Performance Excellence

- Collection Efficiency currently at 99.73%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 177 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 202 days (for max. score, expected less than or equal to 60 days)

#### **External Environment**

 Government dues can be lowered – currently 22% of total amount billed to Government in the past 3 years is due

#### **Specific Disincentives**

- Ind-AS can be complied and Going Concern can be addressed to remove audit qualification
- Director Finance should be exclusive

# Manipur State Power Distribution Company Limited (MSPDCL)

## **Overview of MSPDCL<sup>1</sup>**

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.54 in FY21 to 1.02 in FY22
  - PBT (excl. Other Subsidy) declined from (-1%) of Revenue booked in FY21 to (-4%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
  - Cash adjustment due to Trade Receivables declined from (-7%) of Revenue booked in FY21 to (-8%) in FY22
- AT&C losses deteriorated from 20.3% in FY21 to 25.0% in FY22 driven by decline in Billing Efficiency (from 86.1% in FY21 to 83.6% in FY22) and Collection Efficiency (from 92.6% in FY21 to 89.7% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

• Healthy Debt Service Coverage Ratio, currently at 5.70

#### Performance Excellence

• Achieved SERC – approved Distribution loss target

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be reduced currently at INR 1.02/ kWh
  - Negative PBT ((-4%) of Revenue booked)
  - Total Subsidy disbursement 100% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-8%) of Revenue booked)
- Days Payable may be reduced currently at 100 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 425 days (for max. score, expected less than or equal to 60 days)

#### Performance Excellence

• Collection Efficiency can be improved - currently at 89.7% (for max. score, expected is 99.5%+)

#### **External Environment**

- Govt. support required for taking over of Discom losses
- Automatic pass-through of fuel costs can be implemented

#### **Specific Disincentives**

- Ind-AS can be adopted and Employee Liability may be addressed to remove audit qualification
- Tariff Petition should be filed within the rating timelines
- Audit Committee can be constituted

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.24 in FY21 to 0.05 in FY22. FY21 accounts have been recasted.
  - PBT (excl. Other Subsidy) improved from (-25%) of Revenue booked in FY21 to (-13%) in FY22
  - Tariff Subsidy received declined from 100% of subsidy booked in FY21 to 99% in FY22. Further, the DISCOM received Other Subsidy of ~16% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables declined from (-1%) of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses deteriorated from 30.9% in FY21 to 36.1% in FY22 driven majorly by reduction in Collection Efficiency (from 100.0% in FY21 to 92.4% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 284 days as compared to LPS norm of ~45 days
- Days Receivables may be reduced currently at 233 days (for max. score, expected less than or equal to 60 days)
- Liquidity can be improved Adjusted Quick Ratio currently at 0.35 (for max. score, expected is 1.00)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 151%, as compared to National median of 50%

#### Performance Excellence

- Billing Efficiency can be improved currently at 69.1% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

- Automatic pass-through of fuel costs can be implemented
- Require regulatory support for issuance of true-up order for FY21

#### **Specific Disincentives**

- Red Card on account of providing only provisional accounts can be addressed
- Red Card on account to Defaults to bank/FIs (SMA-2 Default to PFC & REC) can be addressed
- True-up Orders should be issued within the rating timelines
- Operational Audit Committee can be constituted
- Managing Director and Director Finance should be exclusive
- Preparation of quarterly accounts can be undertaken by Discom

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.08 in FY21 to (-0.18) in FY22
  - PBT (excl. Other Subsidy) improved from 2.5% of Revenue booked in FY21 to 3% in FY22
  - Tariff Subsidy received improved from 87% of subsidy booked in FY21 to 105% in FY22.
- AT&C losses improved from 18.5% in FY21 to 11.7% in FY22 driven majorly by improvement in Collection Efficiency (from 92% in FY21 to 100% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 33%ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (3% of Revenue booked)
  - High Total Subsidy disbursement 105% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-2%) of Revenue booked)
- Healthy Adjusted Quick Ratio, currently at 1.04
- Healthy Cash adjusted Leverage, currently at 4.29

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Specific Disincentives**

- Ind-AS may be complied and Employee Liabilities may be addressed to remove audit qualification
- Quarterly accounts can be prepared by discom

# Ajmer Vidyut Vitran Nigam Limited (AVVNL)

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.38 in FY21 to (-0.58) in FY22
  - PBT (excl. Other Subsidy) improved from -2% of Revenue booked in FY21 to -0.3% in FY22
  - Tariff Subsidy received improved from 75% of subsidy booked in FY21 to 122% in FY22. Further, the DISCOM received Other Subsidy of  $\sim$ 4% of Revenue booked in FY22.
- AT&C losses improved from ~21.4% in FY21 to ~12.7% in FY22 driven majorly by improvement in Collection Efficiency (from ~92.6% in FY21 to ~100% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (~3% of Revenue booked)
  - High Total Subsidy disbursement 119% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Amongst the top 10% ile performers in Days Receivable currently at ~16 days as against National median of ~71 days
- Healthy Cash adjusted Leverage, currently at 4.83

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

Regulation supports automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at ~80 days as compared to LPS norm of ~45 days
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at ~117%, as compared to National median of ~50%
- Adjusted Quick Ratio can be improved, currently at 0.60 (for max. score, expected is 1.00)

#### **Performance Excellence**

• Billing Efficiency can be improved - currently at 87.3% (for max. score, expected is 92%+)

- Ind-AS can be adopted to remove Audit Qualification
- Tariff and True-up Orders should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved 11% liquidated (for max. score, pace of liquidation should be 28%+)

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 1.18 in FY21 to 0.18 in FY22
  - PBT (excl. Other Subsidy) declined from (-11%) of Revenue booked in FY21 to (-14%) in FY22
  - Tariff Subsidy received improved from 75% of subsidy booked in FY21 to 113% in FY22. Further, the DISCOM received Other Subsidy of 7% of Revenue booked in FY22.
- AT&C losses improved from 31.0% in FY21 to 21.9% in FY22 driven majorly by improvement in Collection Efficiency (from 89.0% in FY21 to 100% in FY22)

#### **Key Strengths**

#### Performance Excellence

• Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 164 days as compared to LPS norm of 45 days
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 117%, as compared to National median of 50%

#### Performance Excellence

- Billing Efficiency can be improved currently at 78.1% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

- Ind-AS can be adopted and Employee Liabilities can be addressed to remove Audit Qualification
- Tariff and True-up Orders should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved Regulatory Assets increased by 13% since FY21 (for max. score, pace of liquidation should be 28%+)

# Jaipur Vidyut Vitran Nigam Limited (JVVNL)

## **Overview of JVVNL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |
|-----------------------------|---|
| Date of incorporation       | 19-Jun-2000   |
| Nature of operations        | Distribution  |
| Area of operations          | 12 districts of Rajasthan, namely, Jaipur, Dausa, Alwar, Bharatpur, Dholpur,<br>Sawaimadhopur, Tonk, Karauli, Kota, Jhalawar, Baran & Bundi |
| Number of customers         | 5,038,760   |
| % Agricultural customers    | 11.45%  |
| % C&I customers             | 9.39%   |
| Gross input energy          | 35,698 MU (6% change) <sup>3</sup>  |
| Total energy sold           | 27,941 MU (9% change) <sup>3</sup>  |
| Revenue booked <sup>2</sup> | INR 22,743 Cr (4% change) <sup>3</sup>  |
| Profit after tax            | INR 436 Cr  |

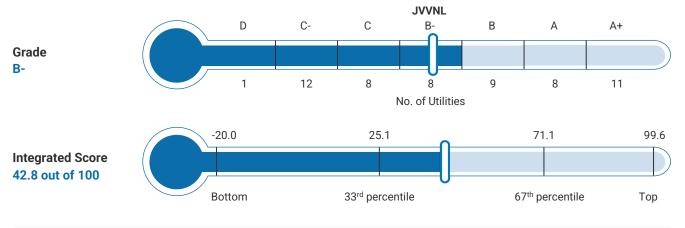

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

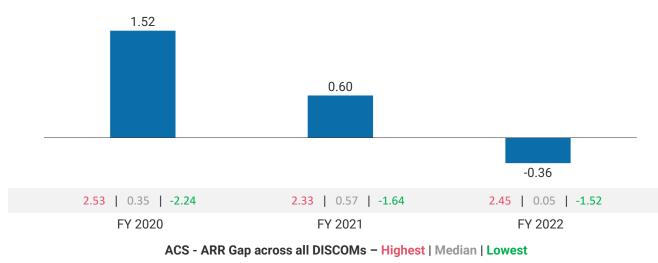

- JVVNL score improved significantly from 16.7 (10th Ratings) to 42.8 (11th Ratings).
- Major improvement in ACR-ARR gap, DSCR, Collection Efficiency metrics in FY22
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Audited accounts

JVVNL achieved Rank 29 (out of 51 utilities), with Grade B- and Integrated Score of 42.8 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap is improved from 0.60 in FY21 to (-0.36) in FY22
  - PBT (excl. Other Subsidy) improved from (-5%) of Revenue booked in FY21 to (-2%) in FY22
  - Tariff Subsidy received improved from 82% of Subsidy booked in FY21 to 119% in FY22. Further, the DISCOM received Other Subsidy of ~4% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has improved from (-2%) of Revenue booked in FY21 to (-0.40%) in FY22
- AT&C losses improved from 25.1% in FY21 to 16.8% in FY22 driven by improvement in Billing Efficiency (from 80.6% in FY21 to 83.2% in FY22) and Collection Efficiency (from 93.0% in FY21 to 100.0% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (2% of Revenue booked)
  - High Total Subsidy disbursement 116% of Subsidy booked
  - · Marginally negative cash adjustment due to Trade Receivables
- Healthy Cash adjusted Leverage, currently at 4.09

#### Performance Excellence

• Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 173 days as compared to LPS norm of 45 days
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 101%, as compared to National median of 50%

- Ind-AS can be adopted to remove Audit Qualification
- Director Finance should be exclusive
- Tariff and True-up Orders should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved 11% liquidated since FY21 (for max. score, pace of liquidation should be 28%+)

# Tamil Nadu Generation and Distribution Corporation Limited (TANGEDCO)

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 2.12 in FY21 to 1.79 in FY22
  - PBT (excl. Other Subsidy) improved from (-48%) of Revenue booked in FY21 to (-38%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22. Further, the DISCOM received Other Subsidy of ~18% of Revenue booked in FY22
- AT&C losses deteriorated from 11.9% in FY21 to 13.5% in FY22 driven by decline in Billing Efficiency (from 89.5% in FY21 to 87.9% in FY22)

#### **Key Improvement Areas**

### **Financial Sustainability**

- ACS-ARR Gap may be reduced currently at INR 1.79/kWh
  - Negative PBT ((-19%) of Revenue booked)
  - Total Subsidy received 98% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-1%) of Revenue booked)
- Days Payable may be reduced currently at ~200 days as compared to LPS norm of ~45 days
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-0.26) (for max. score, expected greater than or equal to 1.1)
- Leverage can be improved which is currently at (-48.14) (for max. score, expected greater than 0 up to 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at ~251%, as compared to National median of ~50%

#### Performance Excellence

• Billing Efficiency can be improved – currently at 87.9% (for max. score, expected is 92%+)

#### **External Environment**

- Automatic pass-through of fuel costs can be implemented
- Government support required for taking over of Discom losses

- Red Card on account of Auditor's Adverse Opinion needs to be addressed
- Tariff and True-up Orders should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved Regulatory Assets increased by 9% since FY21 (for max. score, pace of liquidation should be 28%+)

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.68 in FY21 to 1.52 in FY22
  - PBT (excl. Other Subsidy) improved from (-21%) of Revenue booked in FY21 to (-19%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
  - Cash adjustment due to Trade Receivables has declined from 8% of Revenue booked in FY21 to (-4%) in FY22
- AT&C losses deteriorated from 9.0% in FY21 to 14.1% in FY22 driven majorly by decline in Collection Efficiency (from 100% in FY21 to 94.2% in FY22)

### **Key Strengths**

#### Performance Excellence

• Achieved SERC - approved Distribution loss target

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be reduced currently at INR 1.52/kWh
  - Negative PBT ((-1%) of Revenue booked)
  - Total Subsidy Received 61% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-4%) of Revenue booked)
- Days Payable can be reduced currently at ~356 days as compared to LPS norm of ~45 days
- Days Receivable can be reduced currently at ~267 days (for max. score, expected less than or equal to 60 days)
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-1.24) (for max. score, expected is greater than or equal to 1.1)
- Leverage can be improved which is currently at (-5.23) (for max. score, expected greater than 0 up to 5)

#### **External Environment**

- Government dues can be lowered currently 40% of total amount billed to Government in the past 3 years is due
- Automatic pass-through of fuel costs should be implemented
- Require regulatory support for issuance of true-up order for FY21
- Govt. Support required for taking over of Discom losses

- Ind-AS can be adopted, Employee liabilities and Going concern can be addressed to remove Audit Qualification
- True-up Order should be issued within the rating timelines

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.60 in FY21 to 1.40 in FY22
  - PBT (excl. Other Subsidy) declined from (-19%) of Revenue booked in FY21 to (-20%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22.
  - Cash adjustment due to Trade Receivables improved from (-10%) of Revenue booked in FY21 to (-2%) in FY22
- AT&C losses improved from 15.5% in FY21 to 9.1% in FY22 driven majorly by improvement in Collection Efficiency (from 91.1% in FY21 to 100% in FY22)

#### **Key Strengths**

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 1.40/ kWh
  - Negative PBT ((-1%) of Revenue booked)
  - Total Subsidy Received- 18% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-2%) of Revenue booked)
- Days Payable may be reduced currently at 375 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 130 days (for max. score, expected less than or equal to 60 days)
- Adjusted Quick Ratio can be improved, currently at 0.36 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio (cash adjusted) can be improved currently it is (-0.75) (for max. score, expected greater than or equal to 1.1)
- Leverage (cash adjusted) may be improved currently at (-4.57) (for max. score, expected greater than 0 upto 5)

#### **External Environment**

- Government dues can be lowered currently ~25% of total amount billed to Government in the past 3 years is due
- Govt. Support required for taking over of Discom losses
- Require regulatory support for issuance of true-up order for FY21
- Automatic pass-through of fuel costs can be implemented

- Ind-AS can be adopted, Employee Liabilities can be addressed to remove Audit Qualification
- True-up Order should be issued within the rating timelines

# **Tripura State Electricity Corporation Limited (TSECL)**

## **Overview of TSECL<sup>1</sup>**

| Ownership                   | State Govt. PSU                            |

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.18 in FY21 to 0.53 in FY22
  - PBT (excl. Other Subsidy) declined from 1% of Revenue booked in FY21 to (-6%) in FY22
  - Tariff Subsidy received improved from 74% of subsidy booked in FY21 to 87% in FY22.
- AT&C losses improved from 37.4% in FY21 to 33.2% in FY22 driven majorly by improvement in Billing Efficiency (from 71.5% in FY21 to 75.3% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

• Healthy Adjusted Quick Ratio, currently at 1.14

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 0.53/ kWh
  - Negative PBT ((-6%) of Revenue booked)
  - Total Subsidy disbursement 87% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-4%) of Revenue booked)
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-4.02) (for max. score, expected greater than or equal to 1.1)
- Leverage (cash adjusted) may be improved currently at (-5.16) (for max. score, expected greater than 0 upto 5)

#### **Performance Excellence**

- Billing Efficiency can be improved currently at 75.3% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 88.7% (for max. score, expected is 99.5%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

- Govt. Support required for taking over of Discom losses
- Require regulatory support for issuance of true-up order for FY21

- Ind-AS can be complied to remove audit qualification
- Tariff Orders and True-up Orders, Tariff Petition should be issued within the rating timelines

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 1.36 in FY21 to 1.45 in FY22
  - PBT (excl. Other Subsidy) remained constant at (-23%) of Revenue booked for FY21 and FY 22
  - Tariff Subsidy received remained constant at 100% for FY21 and FY 22 Further, the DISCOM received Other Subsidy of 3% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables improved from (-10%) of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses improved from 32.1% in FY21 to 28.6% in FY22 driven majorly by improvement in Collection Efficiency (from 91.7% in FY21 to 96.0% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 1.45/ kWh
  - Negative PBT ((-20%) of Revenue booked)
  - Total Subsidy disbursement 100% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-5%) of Revenue booked)
- Days Payable may be reduced currently at 251 days as compared to LPS norm of 45 days
- Days Receivables may be reduced currently at 596 days (for max. score, expected less than or equal to 60 days)
- Adjusted Quick Ratio can be improved, currently at 0.22 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio (cash adjusted) can be improved currently it is 0.36 (for max. score, expected greater than or equal to 1.1)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 145%, as compared to National median of ~50%

#### Performance Excellence

- Billing Efficiency can be improved currently at 74.4% (for max. score, expected is 92%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

- Automatic pass-through of fuel costs can be implemented
- Govt. support required for taking over of Discom losses

- Employee Liabilities can be addressed to remove audit qualification
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Regulator can issue cost reflective tariff

# **Kanpur Electricity Supply Company Limited (KESCO)**

### **Overview of KESCO<sup>1</sup>**

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 2.33 in FY21 to 1.05 in FY22
  - PBT (excl. Other Subsidy) improved from (-22%) of Revenue booked in FY21 to (-14%) in FY22
  - The DISCOM received Other Subsidy of 9% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has declined from (-3%) of Revenue booked in FY21 to (-8%) in FY22
- AT&C losses deteriorated from 12.4% in FY21 to 15.5% in FY22 driven by decline in Collection Efficiency (from 97.8% in FY21 to 93.4% in FY22)

### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be improved currently at INR 1.05/ kWh
  - Negative PBT ((-7%) of Revenue booked)
  - Total Subsidy disbursement 123% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-8%) of Revenue booked)
- Days Payable may be reduced currently at 338 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 425 days (for max. score, expected less than or equal to 60 days)
- Liquidity can be improved Adjusted Quick Ratio currently at 0.19 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio (Cash Adjusted) can be improved currently at (-0.17) (for max. score, expected is greater than or equal to 1.1)
- Leverage (Cash Adjusted) can be improved currently at (-30.90) (for max. score, expected is greater than 0 up to 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 94%, as compared to National median of 50%

#### **External Environment**

- Government dues can be lowered currently ~35% of total amount billed to Government in the past 3 years is due
- Automatic pass-through of fuel costs can be implemented

- Ind-AS may be complied to remove audit qualification
- Tariff Order, True-up Order, Tariff Petitions should be filed within the rating timelines
- Regulator can issue cost reflective tariff

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 1.81 in FY21 to 2.45 in FY22. FY21 have been recasted
  - PBT (excl. Other Subsidy) declined from (-15%) of Revenue booked in FY21 to (-19%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22. Further, the DISCOM received Other Subsidy of 8% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has declined from (-15%) of Revenue booked in FY21 to (-22%) in FY22
- AT&C losses deteriorated from 32.2% in FY21 to 34.9% in FY22 driven by decline in Collection Efficiency (from 85% in FY21 to 78.8% in FY22)

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 2.45/ kWh
  - Negative PBT ((-11%) of Revenue booked)
  - Total Subsidy disbursement 102% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-22%) of Revenue booked)
- Days Payable may be reduced currently at 263 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 597 days (for max. score, expected less than or equal to 60 days)
- Liquidity can be improved Adjusted Quick Ratio currently at 0.38 (for max. score, expected is 1.00)
- Debt Service Coverage Ratio can be improved currently at (-0.22) (for max. score, expected is 1.1)
- Leverage can be improved currently at (-23.72) (for max score, expected is between 0 and 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 98%, as compared to National median of ~50%

#### Performance Excellence

- Collection Efficiency can be improved currently at 79% (for max. score, expected is 99.5%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

- Ind-AS may be complied and Employee Liabilities may be addressed to remove audit qualification
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Regulator can issue cost reflective tariff

## Paschimanchal Vidyut Vitran Nigam Limited (PVVNL)

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 1.10 in FY21 to 0.57 in FY22
  - PBT (excl. Other Subsidy) improved from (-22%) of Revenue booked in FY21 to (-12%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22. Further, the DISCOM received Other Subsidy of 9% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has declined from 0% of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses deteriorated from 17.8% in FY21 to 22.3% in FY22 driven majorly by decline in Collection Efficiency (from 100% in FY21 to 94.4% in FY22)

## **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be improved currently at INR 0.57/ kWh
  - Negative PBT ((-3%) of Revenue booked)
  - Total Subsidy disbursement 100% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-5%) of Revenue booked)
- Days Payable may be reduced currently at 98 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 220 days (for max. score, expected less than or equal to 60 days)
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at 0.33 (for max. score, expected is greater than or equal to 1.1)

## Performance Excellence

• Distribution losses may be reduced - current losses are higher than SERC-approved levels

### **External Environment**

• Automatic pass-through of fuel costs can be implemented

- Ind-AS may be complied to remove audit qualification
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Regulator can issue cost reflective tariff

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 2.00 in FY21 to 1.81 in FY22
  - PBT (excl. Other Subsidy) improved from (-29%) of Revenue booked in FY21 to (-18%) in FY22
  - Tariff Subsidy received remained constant at 100% of subsidy booked in FY21 and FY22. Further, the DISCOM received Other Subsidy of 15% of Revenue booked in FY22.
  - Cash adjustment due to Trade Receivables has declined from (-13%) of Revenue booked in FY21 to (-23%) in FY22
- AT&C losses deteriorated from 32.5% in FY21 to 40.3% in FY22 driven majorly by decline in Collection Efficiency (from 85.1% in FY21 to 74.7% in FY22)

## **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 1.81/kWh
  - Negative PBT ((-3%) of Revenue booked)
  - Total Subsidy disbursement 100% of Subsidy booked
  - Negative cash adjustment due to Trade Receivables ((-23%) of Revenue booked)
- Days Payable may be reduced currently at 282 days as compared to LPS norm of 45 days
- Days Receivable may be reduced currently at 864 days (for max. score, expected less than or equal to 60 days)
- Debt Service Coverage Ratio (Cash Adjusted) may be improved , currently at 0.26 (for max. score, expected greater than or equal to 1.1)
- Leverage (Cash Adjusted) may be improved, currently at 22.27 (for max. score, expected greater than 0 upto 5)
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 143%, as compared to National median of 50%

#### Performance Excellence

- Billing Efficiency can be improved currently at 79.9% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 74.7% (for max. score, expected is 99.5%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

- Ind-AS can be complied to remove audit qualification
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Regulator should issue cost reflective tariff

## Uttarakhand Power Corporation Limited (UPCL)

## **Overview of UPCL<sup>1</sup>**

| Ownership                   | State Govt. PSU                        |
|-----------------------------|--|

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.04 in FY21 to (-0.49) in FY22
  - PBT (excl. Other Subsidy) improved from (-2%) of Revenue booked in FY21 to 0% in FY22
  - Cash adjustment due to Trade Receivables improved from 1% of Revenue booked in FY21 to 10% in FY22
- AT&C losses improved from 15.4% in FY21 to 14.1% in FY22 driven majorly by improvement in Collection Efficiency (from 98.3% in FY21 to 100% in FY22)

### **Key Strengths**

## **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT
  - · Positive cash adjustment due to Trade Receivables (10% of Revenue booked)
- Amongst the top 20%ile performers in Days Receivable currently at 17 days as against National median of ~71 days
- Amongst the top 10% ile performers in Days Payable to Gencos and Trancos currently at 24 days as compared to LPS norm of ~45 days
- Healthy Cash adjusted Leverage, currently at 1.09
- Healthy Debt Service Coverage Ratio currently at 3.67
- Healthy Debt levels currently Debt as % of Revenue booked is ~19%, as compared to National median of ~50%

#### Performance Excellence

Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

### **Financial Sustainability**

• Adjusted Quick Ratio can be improved, currently at 0.17 (for max. score, expected is 1.00)

#### **External Environment**

 Government dues can be lowered – currently 30% of total amount billed to Government in the past 3 years is due

- Ind-AS can be adopted to remove Audit Qualification
- Managing Director should be exclusive
- Tariff petition should be filed within the rating timelines

## West Bengal State Electricity Distribution Company Limited (WBSEDCL)

## **Overview of WBSEDCL<sup>1</sup>**

| Ownership                   | State Govt. PSU   |
|-----------------------------|---|
| Date of incorporation       | 16-Feb-2007   |
| Nature of operations        | Distribution  |
| Area of operations          | State of West Bengal excluding some districts served by CESC and IPCL |
| Number of customers         | 21,499,055  |
| % Agricultural customers    | 1.61%   |
| % C&I customers             | 9.95%   |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.92 in FY21 to (-0.22) in FY22. Major recasting in FY21
  - PBT (excl. Other Subsidy) improved significantly from (-19%) of Revenue booked in FY21 to 4% in FY22
  - Tariff Subsidy received improved from 99% of subsidy booked in FY21 to 100% in FY22
- AT&C losses improved from 21.3% in FY21 to 16.7% in FY22 driven majorly by improvement in Billing Efficiency (from 79.0% in FY21 to 84.8% in FY22

## **Key Strengths**

## **Financial Sustainability**

- Amongst the top 33%ile performers in ACS-ARR Gap (cash adjusted)
  - Negative PBT ((-1%) of Revenue booked)
  - High Total Subsidy disbursement 100% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Healthy Cash adjusted Leverage, currently at 3.76

### Performance Excellence

• Achieved SERC - approved Distribution loss target

#### **External Environment**

• Implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 147 days as compared to LPS norm of 45 days
- Adjusted Quick Ratio can be improved, currently at 0.25 (for max. score, expected is 1.00)

#### **External Environment**

- Require regulatory support for issuance of true-up order for FY21
- Govt. support required for taking over of Discom losses

- Employee Liabilities can be addressed to remove audit qualification
- Managing Director and Director Finance should be given exclusive charge
- Tariff and True-up Orders should be issued within the rating timelines

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.69) in FY21 to (-0.26) in FY22. FY21 accounts have been
  recasted
  - PBT (excl. Other Subsidy) declined from 10% of Revenue booked in FY21 to 5% in FY22
  - Tariff Subsidy received improved from 91% of subsidy booked in FY21 to 94% in FY22
- AT&C losses improved marginally from 9.6% in FY21 to 8.9% in FY22

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 33%ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (4% of Revenue booked)
  - Total Subsidy disbursement 94% of Subsidy booked
  - · Marginally negative cash adjustment due to Trade Receivables
- Amongst the top 20%ile performers in Days Receivable currently at 19 days as against National median of ~71 days
- Healthy Debt Service Coverage Ratio (cash adjusted), currently at 1.46
- Healthy Cash adjusted Leverage, currently at 0.92
- Healthy Debt levels currently Debt as % of Revenue booked is 16%, as compared to National median of ~50%

#### Performance Excellence

- Achieved SERC approved Distribution loss target
- Amongst the top 20% ile performers in Billing Efficiency currently at 92.2%

### **External Environment**

Discom implements automatic pass-through of fuel costs

## **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 375 days as compared to LPS norm of 45 days
- Adjusted Quick Ratio can be improved, currently at 0.19 (for max. score, expected is 1.00)

## **External Environment**

Require regulatory support for issuance of Tariff Order for FY23 and True-up Order for FY21

- Tariff Order and True-up Order, Tariff Petition should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved Regulatory Assets increased by 21% since FY21 (for max. score, pace of liquidation should be 28%+)

## BSES Yamuna Power Limited (BYPL)

## **Overview of BYPL<sup>1</sup>**

| Ownership                   | Public Private Company  |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-1.05) in FY21 to (-0.01) in FY22. FY21 accounts has been
  recasted
  - PBT (excl. Other Subsidy) declined from 13% of Revenue booked in FY21 to 0% in FY22
  - Tariff Subsidy received improved from 97% of subsidy booked in FY21 to 99% in FY22.
- AT&C losses improved from 9.4% in FY21 to 8% in FY22 driven by improvement in Collection Efficiency (from 99.1% in FY21 to 100% in FY22) and Billing Efficiency (from 91.4% in FY21 to 92% in FY22)

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20%ile performers in Days Receivable currently at 20 days as against National median of ~71 days
- Healthy Cash adjusted Leverage, currently at 1.26
- Healthy Debt Coverage Service Ratio, currently at 1.11
- Healthy Debt levels currently Debt as % of Revenue booked is 25%, as compared to National median of ~50%

#### Performance Excellence

- Achieved SERC approved Distribution loss target
- Collection Efficiency currently at 100%
- Amongst the top 25% ile performers in Billing Efficiency currently at 92%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 645 days as compared to LPS norm of 45 days
- Adjusted Quick Ratio can be improved, currently at 0.10 (for max. score, expected is 1.00)

### **External Environment**

Require regulatory support for issuance of tariff order for FY23 and true-up order for FY21

- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved Regulatory Assets increased by 36% since FY21 (for max. score, pace of liquidation should be 28%+)

## Tata Power Delhi Distribution Limited (TPDDL)

## **Overview of TPDDL<sup>1</sup>**

| Ownership                   | Private Public Utility                 |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from (-0.23) in FY21 to (-0.35) in FY22
  - PBT (excl. Other Subsidy) improved marginally from 3.8% of Revenue booked in FY21 to 3.9% in FY22
  - Tariff Subsidy received improved from 91% of subsidy booked in FY21 to 104% in FY22.
- AT&C losses improved marginally from 7.7% in FY21 to 7.1% in FY22

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 25% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (8% of Revenue booked)
  - High Total Subsidy disbursement 104% of Subsidy booked
  - · Positive cash adjustment due to Trade Receivables
- Amongst the top 10%ile performers in Days Receivable currently at 10 days as against National median of ~71 days
- Healthy Cash adjusted Leverage, currently at 2.59
- Healthy Debt Service Coverage Ratio, currently at 1.15

## Performance Excellence

- Collection Efficiency currently at 100%
- Amongst the top 20%ile performers in Billing Efficiency, currently at 92.9%

## **External Environment**

• Discom implements automatic pass-through of fuel costs

### **Key Improvement Areas**

#### **Financial Sustainability**

Adjusted Quick Ratio can be improved, currently at 0.33 (for max. score, expected is 1.00)

## **External Environment**

Require regulatory support for issuance of tariff order for FY23, true-up order for FY21

- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Pace of Regulatory Assets liquidation needs to be improved 6.73% liquidated since FY21 (for max. score, pace of liquidation should be 28%+)

## Adani Electricity Mumbai Limited (AEML)

## **Overview of AEML<sup>1</sup>**

| Ownership                   | Privately Owned   |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved significantly from 0.37 in FY21 to (-0.55) in FY22. Major recasting in FY21 accounts
  - PBT (excl. Other Subsidy) improved significantly from (-7%) of Revenue booked in FY21 to 6% in FY22
- AT&C losses improved from 8.9% in FY21 to 6.7% in FY22 driven majorly by improvement in Billing efficiency (from 91.7% in FY21 to 93.3% in FY22).

## **Key Strengths**

## **Financial Sustainability**

- Amongst the top 20% ile performers in ACS-ARR Gap (cash adjusted)
  - · Positive PBT (15% of Revenue booked)
  - · Positive cash adjustment due to Trade Receivables
- Amongst the top 20% ile performers in Days Payable to Gencos and Transcos- currently at 42 days as compared to LPS norm of 45 days
- Amongst the top 20%ile performers in Days Receivable currently at 21 days as against National median of 71 days
- Healthy Adjusted Quick Ratio, currently at 1.46
- Healthy Debt Service Coverage Ratio, currently at 4.16
- Healthy Cash adjusted Leverage, currently at 2.50

### **Performance Excellence**

- Achieved SERC approved Distribution loss target
- Amongst the top 20% ile performers in Billing Efficiency currently at 93.3%
- Collection Efficiency currently at 100%

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 0.10 in FY21 to (-0.10) in FY22
  - PBT (excl. Other Subsidy) improved from (-4%) of Revenue booked in FY21 to 3% in FY22
  - Cash adjustment due to Trade Receivables declined from 2% of Revenue booked in FY21 to (-1%) in FY22
- AT&C losses deteriorated from 0.2% in FY21 to 2.1% in FY22 driven majorly by decline in Collection Efficiency (from 100% in FY21 to 98.7% in FY22)

## **Key Strengths**

## **Financial Sustainability**

- Amongst the top 33% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (5% of Revenue booked)
  - Negative cash adjustment due to Trade Receivables ((-1%) of Revenue booked)
- Amongst the top 20% ile performers in Days Payable to Gencos and Transcos- currently at 32 days as compared to LPS norm of 45 days
- Amongst the top 25%ile performers in Days Receivable currently at 32 days as against National median of 71 days
- Healthy Debt Service Coverage ratio, currently at 1.55
- Healthy Cash adjusted Leverage, currently at 3.49

#### Performance Excellence

- Amongst the top 10% ile performers in Billing Efficiency currently at 99.2%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.07 in FY21 to 0.46 in FY22. Minor recasting in FY21 accounts
  - PBT (excl. Other Subsidy) improved from (-2%) of Revenue booked in FY21 to 3% in FY22
  - Cash adjustment due to Trade Receivables declined from 0% of Revenue booked in FY21 to (-12%) in FY22
- AT&C losses deteriorated from 25.9% in FY21 to 33.5% in FY22 driven majorly by improvement in Collection Efficiency (from 100% in FY21 to 87% in FY22)

#### **Key Strengths**

#### **Financial Sustainability**

- Days Receivable currently at 50 days as against National median of ~71 days
- Healthy Debt levels currently Debt as % of Revenue booked is ~15%, as compared to National median of ~50%

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap may be improved currently at INR 0.46/ kWh
  - Positive PBT (1% of Revenue booked)
  - Negative cash adjustment due to Trade Receivables ((-12%) of Revenue booked)
- Debt Service Coverage Ratio (cash adjusted) may be improved, currently at (-1.88) (for max. score, expected greater than or equal to 1.1)
- Leverage (Cash Adjusted) may be improved, currently at (-3.87) (for max. score, expected greater than 0 upto 5)

#### Performance Excellence

- Billing Efficiency can be improved currently at 76.4% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 87% (for max. score, expected is 99.5%+)

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

#### **Specific Disincentives**

• Employee Liabilities can be addressed to remove audit qualification

### **Relative Performance (w.r.t FY21)**

• TPNODL is a New Utility with 1 year of operation and hence has excluded from the ranking list. Last year the rating was done basis financials of the erstwhile utility (before takeover)

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 33%ile performers in Days Receivable currently at 37 days as against National median of ~71 days
- Healthy Adjusted Quick Ratio, currently at 1.08
- Healthy Debt levels currently Debt as % of Revenue booked is 8%, as compared to National median of ~50%

#### Performance Excellence

• Achieved SERC - approved Distribution loss target

#### **Key Improvement Areas**

## **Financial Sustainability**

- ACS-ARR Gap can be improved currently at INR 0.33/ kWh
  - Positive PBT (4% of Revenue booked)
  - Negative cash adjustment due to Trade Receivables ((-11%) of Revenue booked
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-0.06) (for max. score, expected is greater than or equal to 1.1)
- Leverage can be improved which is currently at (-83.66) (for max. score, expected greater than 0 upto 5)

#### Performance Excellence

• Collection Efficiency can be improved - currently at 88% (for max. score, expected is 99.5%+)

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

# **TP Southern Odisha Distribution Limited (TPSODL)**

## **Overview of TPSODL<sup>1</sup>**

| Ownership                   | Private Public Utility   |
|-----------------------------|--|
| Date of incorporation       | 25-Dec-2020  |
| Nature of operations        | Distribution   |
| Area of operations          | 8 districts in Southern Odisha - Ganjam, Gajapati, Boudh, Kandhamal,<br>Rayagarda, Koraput, Nabarangapur and Malkanagiri |
| Number of customers         | 2,391,570  |
| % Agricultural customers    | 1.25%  |
| % C&I customers             | 4.14%  |
| Gross input energy          | 3,942 MU (337% change) <sup>3</sup>  |
| Total energy sold           | 3,021 MU (321% change) <sup>3</sup>  |
| Revenue booked <sup>2</sup> | INR 1,735 Cr (355% change) <sup>3</sup>  |
| Profit after tax            | INR 69 Cr  |

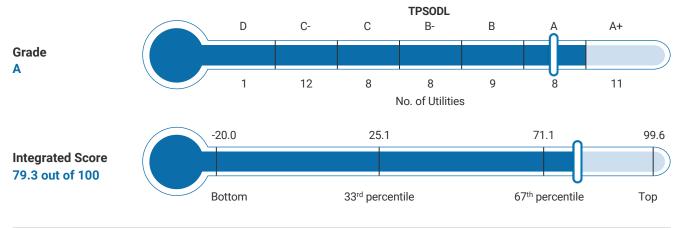

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- TPSODL score improved significantly from 46.0 (10<sup>th</sup> Ratings) to 79.3 (11<sup>th</sup> Ratings).
- Major improvement in ACR-ARR gap, DSCR metrics in FY22
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Audited accounts

TPSODL achieved Rank NA (out of 51 utilities), with Grade A and Integrated Score of 79.3 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

#### **Relative Performance (w.r.t FY21)**

- TPSODL is a New Utility with less than 2-years of operation and hence has been excluded from the ranking list
- ACS-ARR Gap deteriorated from (-1.09) in FY21 to 0.38 in FY22. Major recasting in FY21 accounts
  - PBT (excl. Other Subsidy) declined significantly from 8% of Revenue booked in FY21 to 5% in FY22
  - Cash adjustment due to Trade Receivables has declined from 18% of Revenue booked in FY21 to (-14%) in FY22
- AT&C losses deteriorated from 20.5% in FY21 to 34.3% in FY22 driven majorly by decline in Collection Efficiency (from 100% in FY21 to 85.8% in FY22)

### **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 20% ile performers in Days Payable to Gencos and Transcos currently at 37 days as compared to LPS norm of ~45 days
- Healthy Adjusted Quick Ratio, currently at 1.31
- Healthy Debt levels currently Debt as % of Revenue booked is 20%, as compared to National median of ~50%

#### **Performance Excellence**

• Achieved SERC - approved Distribution loss target

#### **Key Improvement Areas**

#### **Financial Sustainability**

- ACS-ARR Gap can be reduced currently at INR 0.38/kWh
  - Positive PBT (5% of Revenue booked)
  - · Negative cash adjustment due to Trade Receivables ((-14%) of Revenue booked
- Debt Service Coverage Ratio (cash adjusted) may be improved currently at (-3.02) (for max. score, expected greater than or equal to 1.1)
- Leverage (cash adjusted) may be improved currently at (-4.17) (for max. score, expected greater than 0 upto 5)

#### Performance Excellence

- Billing Efficiency can be improved currently at 76.6% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 86% (for max. score, expected is 99.5%+)

#### **External Environment**

• Automatic pass-through of fuel costs can be implemented

### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated significantly from (-1.64) in FY21 to (-0.02) in FY22. Major recasting in FY21.
  - PBT (excl. Other Subsidy) improved from 10% of Revenue booked in FY21 to 14% in FY22
  - Cash adjustment due to Trade Receivables has declined from 24% of Revenue booked in FY21 to (-14%) in FY22
- AT&C losses deteriorated from 22.4% in FY21 to 30.2% in FY22 driven majorly by decline in Collection Efficiency (from 100% in FY21 to 88.4% in FY22)

## **Key Strengths**

#### **Financial Sustainability**

- Days Receivable currently at 56 days as against National median of ~71 days
- Healthy Adjusted Quick Ratio, currently at 1.74
- Healthy Debt Service Coverage Ratio, currently at 4.39
- Healthy Cash adjusted Leverage, currently at 0.96
- Healthy Debt levels currently Debt as % of Revenue booked is 4%, as compared to National median of ~50%

#### **Key Improvement Areas**

#### Performance Excellence

- Billing Efficiency can be improved currently at 79.0% (for max. score, expected is 92%+)
- Collection Efficiency can be improved currently at 88% (for max. score, expected is 99.5%+)

## **External Environment**

• Automatic pass-through of fuel costs should be implemented

#### **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-1.47) in FY21 to (-1.09) in FY22
  - PBT (excl. Other Subsidy) declined from 21% of Revenue booked in FY21 to 15% in FY22
- AT&C losses improved from 9.8% in FY21 to 8.5% in FY22 driven majorly by improvement in Collection Efficiency (from 98.5% in FY21 to 99.4% in FY22)

## **Key Strengths**

#### **Financial Sustainability**

- Amongst the top 10% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (9% of Revenue booked)
  - Marginally negative cash adjustment due to Trade Receivables
- Amongst the top 10% ile performers in Days Receivable currently at 15 days as against National median of 71 days
- Healthy Adjusted Quick Ratio, currently at 1.49
- Healthy Debt Service Coverage Ratio currently at 29.36
- Healthy Debt levels currently Debt as % of Revenue booked is Nil, as compared to National median of ~50%

#### **Performance Excellence**

• Amongst the top 25%ile performers in Billing Efficiency currently at 92.0%

#### **Key Improvement Areas**

## **External Environment**

• Automatic pass-through of fuel costs can be implemented

#### **Specific Disincentives**

• Tariff and True-up Orders should be issued within the rating timelines

| Gross input energy          | 10,444 MU (5% change) <sup>3</sup>    |
| Total energy sold           | 9,615 MU (5% change) <sup>3</sup>     |
| Revenue booked <sup>2</sup> | INR 7,479 Cr (5% change) <sup>3</sup> |
| Profit after tax            | INR 816 Cr                            |

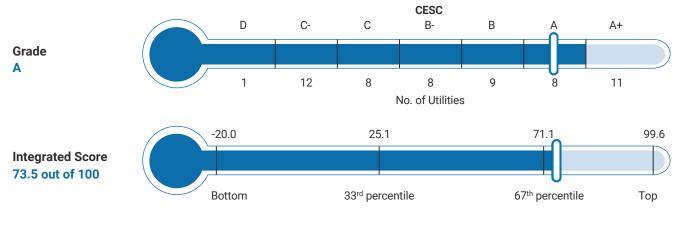

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- CESC score improved from 71.2 (10<sup>th</sup> Ratings) to 73.5 (11<sup>th</sup> Ratings).
- Major improvement in DSCR metric in FY22
- Major decline in Days Payable in FY22
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Audited accounts

CESC achieved Rank 16 (out of 51 utilities), with Grade A and Integrated Score of 73.5 out of 100. Further, it exhibited a Stable Trajectory w.r.t. Integrated Score

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from (-0.02) in FY21 to (-0.67) in FY22
  - PBT (excl. Other Subsidy) declined from 5% of Revenue booked in FY21 to 4% in FY22
  - Cash adjustment due to Trade Receivables has improved from (-5%) of Revenue booked in FY21 to 5% in FY22
- AT&C losses improved from 14.0% in FY21 to 8.1% in FY22 driven majorly by improvement in Collection Efficiency (from 93.9% in FY21 to 100% in FY22)

#### **Key Strengths**

## **Financial Sustainability**

- Amongst the top 10% ile performers in ACS-ARR Gap (cash adjusted)
  - Positive PBT (14% of Revenue booked)
  - · Positive cash adjustment due to Trade Receivables (5% of Revenue booked)
- Days Receivable currently at 52 days as against National median of ~71 days
- Healthy Debt Service Coverage Ratio (cash adjusted), currently at 1.16
- Healthy Cash adjusted Leverage, currently at 4.93

#### Performance Excellence

- Collection Efficiency currently at 100%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

- Days Payable may be reduced currently at 75 days as compared to LPS norm of 45 days
- Debt levels can be reduced currently Debt as % of Revenue booked is significantly high at 112%, as compared to National median of ~50%

#### **External Environment**

• Require regulatory support for issuance of true-up order for FY21

#### **Specific Disincentives**

• Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines

# India Power Corporation Limited (IPCL)

## **Overview of IPCL<sup>1</sup>**

| Ownership                   | Private Owned                          |

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from (-0.43) in FY21 to 0.34 in FY22
  - PBT (excl. Other Subsidy) declined from 7% of Revenue booked in FY21 to (-5%) in FY22
  - Cash adjustment due to Trade Receivables has declined from 1% of Revenue booked in FY21 to (-1%) in FY22
- AT&C losses deteriorated marginally from 3.5% in FY21 to 4.0% in FY22

## **Key Strengths**

#### **Financial Sustainability**

 Amongst the top 33%ile performers in Days Receivable – currently at 43 days as against National median of 71 days

#### Performance Excellence

- Amongst the top 10% ile performers in Billing Efficiency currently at 96.9%
- Achieved SERC approved Distribution loss target

#### **External Environment**

• Discom implements automatic pass-through of fuel costs

#### **Key Improvement Areas**

#### **Financial Sustainability**

• Debt Service Coverage Ratio (cash adjusted) may be improved, currently at 0.53 (for max. score, it should be greater than or equal to 1.1)

#### **External Environment**

• Require regulatory support for issuance of tariff order for FY23 and true-up order for FY21

#### **Specific Disincentives**

• Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines

ACS - ARR Gap across all PDs - Highest | Lowest

ACS-ARR Gap – Weighted Average for 11th Ratings: **3.99 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **2% (stable)** 

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved from 4.67 in FY21 to 3.80 in FY22
  - Cash adjustment due to Trade Receivables has improved from (-6%) of Revenue booked in FY21 to (-3%) in FY22
- AT&C losses improved from 59.4% in FY21 to 52.7% in FY22 driven by improvement in Billing Efficiency (from 44% in FY21 to 50% in FY22) and Collection Efficiency (from 92.0% in FY21 to 94.7% in FY22)

## **Key Improvement Areas**

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 3.80
  - Negative PBT ((-161%) of Revenue booked)
  - Negative Cash Adjustment due to Trade Receivables ((-3%) of Revenue booked)

## Performance Excellence

- Billing Efficiency can be improved currently at 50% (for max. score, expected is 90%+)
- Distribution losses may be reduced current losses are higher than SERC-approved levels
- Separated and audited accounts can be made available for the power department

## **External Environment**

- Require regulatory support for issuance of tariff order for FY23 and true-up order for FY21
- Automatic pass-through of fuel costs can be implemented

## **Specific Disincentives**

- Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines
- Regulator should issue cost reflective tariff

ACS-ARR Gap – Weighted Average for 11th Ratings: **0.18 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **165% (deteriorating)** 

## **Relative Performance, Key Strengths and Improvement Areas**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated significantly from (-0.47) in FY21 to 0.52 in FY22
  - PBT (excl. Other Subsidy) declined from 9% of Revenue booked in FY21 to (-12%) in FY22
- AT&C losses improved marginally from 13.8% in FY 21 to 13.3% in FY 22 Driven majorly by improvement in Billing Efficiency (from 86.2% in FY21 to 87.5% in FY22)

## **Key Strengths**

### **Financial Sustainability**

Low debt levels – current Debt at 0% of Revenue booked

## Performance Excellence

• Collection Efficiency is high - currently at 99.1%

#### **Key Improvement Areas**

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 0.52
  - Negative PBT ((-12%) of Revenue booked)
  - · Negative Cash Adjustment due to Trade Receivables

#### Performance Excellence

- Distribution losses may be reduced current losses are higher than SERC-approved levels
- Separated and audited accounts can be made available for the power department

## **External Environment**

• Automatic pass-through of fuel costs can be implemented

### **Specific Disincentive**

• Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines

## Electricity Department, UT Administration of Dadra & Nagar Haveli and Daman & Diu (Daman & Diu PD)

## **Overview of Daman & Diu PD<sup>1</sup>**

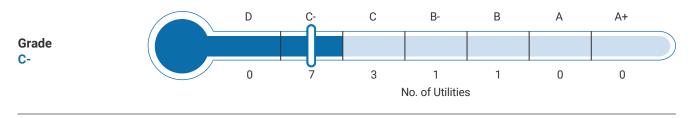

| Ownership                   | Power Department           |
|-----------------------------|----------------------------|
| Nature of operations        | Transmission, Distribution |
| Area of operations          | UT of Daman & Diu          |
| Number of customers         | 64,000 +                   |
| Gross input energy          | NA                         |

## **Overview of Goa PD1**

| Ownership                   | Power Department                      |
|-----------------------------|---------------------------------------|
| Nature of operations        | Transmission, Distribution            |
| Area of operations          | State of Goa                          |
| Number of customers         | 6.2 lakhs+                            |
| Gross input energy          | 4,577 MU (7% change) <sup>3</sup>     |
| Total energy sold           | 4,046 MU (6% change) <sup>3</sup>     |
| Revenue booked <sup>2</sup> | INR 2,084 Cr (7% change) <sup>3</sup> |
| Profit after tax            | INR -264 Cr                           |

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- Goa PD score declined from 51.1 (10<sup>th</sup> Ratings) to 43.8 (11<sup>th</sup> Ratings)
- Major decline in ACS-ARR Gap, Corporate Governance in FY22
- Major improvement in Distribution Loss as compared to SERC approved metric in FY22
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Provisional accounts

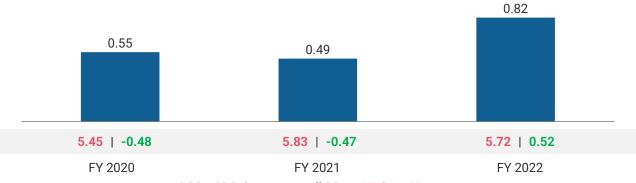

Goa PD achieved Rank 2 (out of 11 power departments), with Grade B- and Integrated Score of 43.8 out of 100. Further, it exhibited a Declining Trajectory w.r.t. Integrated Score

## **Summary of Performance across Metrics**

## Analysis of ACS-ARR Gap (In INR / kWh)

ACS - ARR Gap across all PDs - Highest | Lowest

ACS-ARR Gap – Weighted Average for 11th Ratings: **0.69 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **22% (deteriorating)** 

## **Relative Performance, Key Strengths and Improvement Areas**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.49 in FY21 to 0.82 in FY22
  - PBT (excl. Other Subsidy) declined from (-5%) of Revenue booked in FY21 to (-13%) in FY22
  - Tariff Subsidy received has remained 100% of booked in both FY21, FY22
  - Cash adjustment due to Trade Receivables has improved from (-6%) of Revenue booked in FY21 to (-5%) in FY22
- AT&C losses have remained similar ~13.1% in FY21 to ~13.3% in FY22

## **Key Strengths**

## **Financial Sustainability**

• Low debt levels – current Debt at 13% of Revenue booked

## Performance Excellence

- Achieved SERC-approved Distribution loss target
- Billing Efficiency is high currently at 91.5%

## **External Environment**

• Regulation supports automatic pass-through of fuel costs

## **Key Improvement Areas**

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 0.82
  - Negative PBT ((-13%) of Revenue booked)
  - High Total Subsidy disbursement 100% of Subsidy booked
  - Negative Cash Adjustment due to Trade Receivables ((-5%) of Revenue booked)

## Performance Excellence

• Separated and audited accounts can be made available for the power department

## **External Environment**

• Regulatory support needed for issuance of True-up Order for FY21

## **Specific Disincentives**

- Regulator can determine cost-reflective Tariffs (currently tariffs are calculated after considering subsidy)
- True-up Order should be issued within the rating timelines

## Department of Electricity, UT of Lakshadweep (Lakshadweep ED)

## **Overview of Lakshadweep ED**<sup>1</sup>

| Ownership                   | Power Department |
|-----------------------------|------------------|
| Nature of operations        | Distribution     |
| Area of operations          | NA               |
| Number of customers         | NA               |
| Gross input energy          | NA               |
| Total energy sold           | NA               |
| Revenue booked <sup>2</sup> | NA               |
| Profit after tax            | NA               |

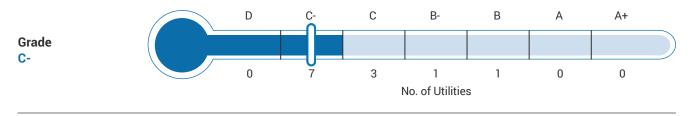

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- Lakshadweep ED score improved marginally from -1.8 (10th Ratings) to -1.5 (11th Ratings)
- Lakshadweep ED, has not submitted their financials for the 11<sup>th</sup> Integrated Ratings Exercise. Hence, no marks have been awarded for metrics linked to financial accounts

Lakshadweep ED achieved Rank 10 (out of 11 power departments), with Grade C- and Integrated Score of -1.5 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

## **Summary of Performance across Metrics**

ACS - ARR Gap across all PDs – Highest | Lowest

ACS-ARR Gap – Weighted Average for 11th Ratings: **0.66 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **N/A** 

## **Relative Performance, Key Strengths and Improvement Areas**

## Background

• Ladakh has been classified as PD in 11<sup>th</sup> Rating, as opposed to DISCOM in the 10<sup>th</sup> Rating. Given that frameworks for PD and DISCOMs are different, its 11<sup>th</sup> Rating score is not comparable to 10<sup>th</sup> Rating Scores and it has not been ranked for 11<sup>th</sup> Exercise

## **Key Strengths**

## Performance Excellence

Achieved SERC - approved Distribution loss target

## Key Improvement Areas

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 0.66
  - Negative PBT ((-6%) of Revenue booked)
  - Total Subsidy disbursement 100% of Subsidy booked
  - Negative Cash Adjustment due to Trade Receivables ((-8%) of Revenue booked)

### Performance Excellence

- Billing Efficiency can be improved currently at 66.2% (for max. score, expected is 90%+)
- Separated and audited accounts can be made available for the power department

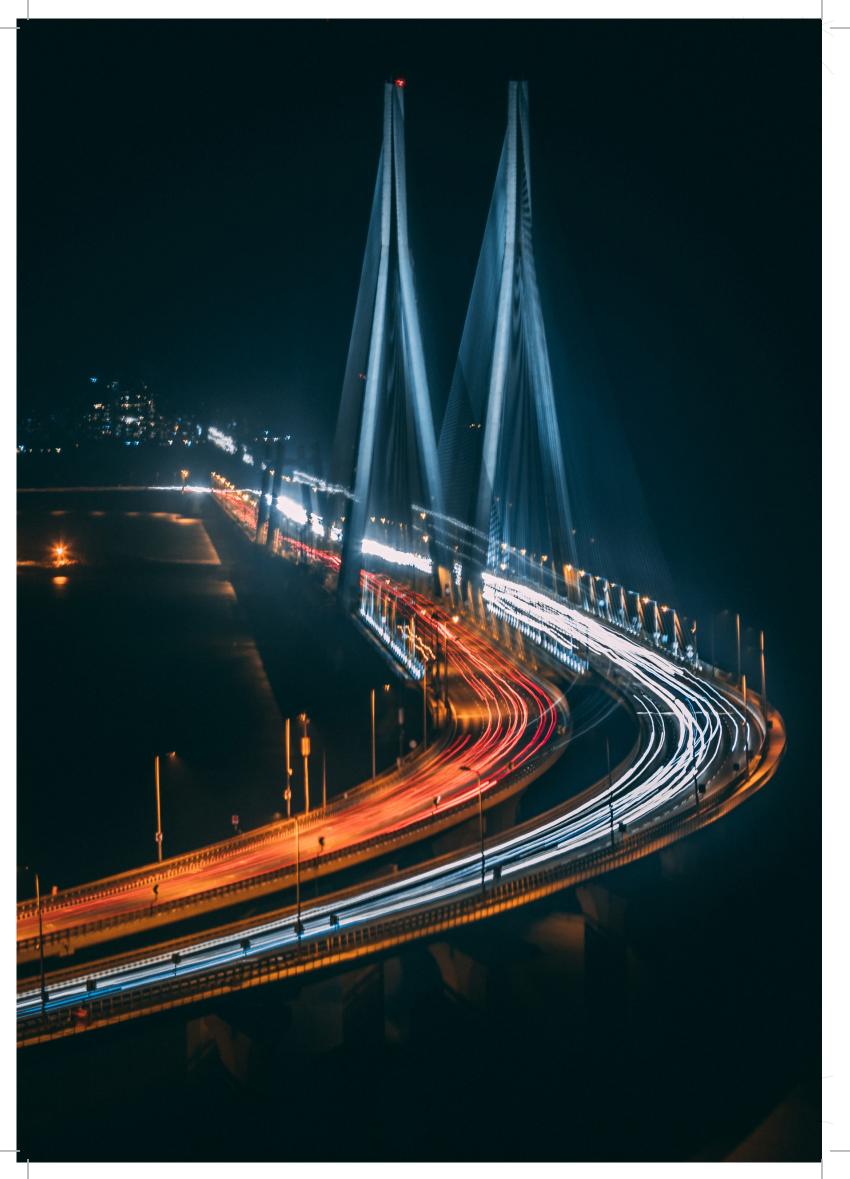

### **External Environment**

• Automatic pass-through of fuel costs can be implemented

### **Specific Disincentives**

• Tariff and True-up Orders, Tariff Petition should be issued within the rating timelines

## The Brihanmumbai Electric Supply & Transport Undertaking (BEST)

## **Overview of BEST<sup>1</sup>**

| Ownership                   | Power Department                                |
|-----------------------------|---|
| Nature of operations        | Distribution                                    |
| Area of operations          | 75 sq. km. territory of old city area of Mumbai |
| Number of customers         | 10 Lakhs+                                       |
| Gross input energy          | 4,407 MU (9% change) <sup>3</sup>               |
| Total energy sold           | 4,069 MU (10% change) <sup>3</sup>              |
| Revenue booked <sup>2</sup> | INR 3,120 Cr (7% change) <sup>3</sup>           |
| Profit after tax            | INR -609 Cr                                     |

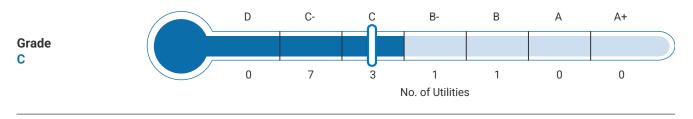

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

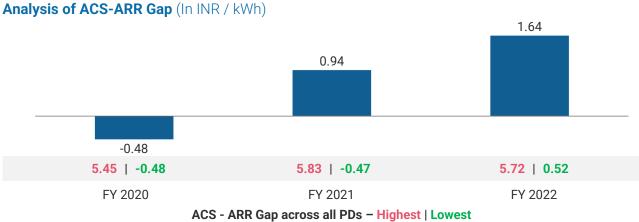

- BEST score declined significantly from 72.5 (10th Ratings) to 33.8 (11th Ratings)
- Major decline in ACS-ARR Gap, Collection Efficiency, Corporate Governance metrics in FY22
- Major improvement in Distribution Loss metric in FY22
- Data for FY22 for the 11th Rating Exercise sourced from Provisional accounts

BEST achieved Rank 3 (out of 11 power departments), with Grade C and Integrated Score of 33.8 out of 100. Further, it exhibited a Declining Trajectory w.r.t. Integrated Score

## **Summary of Performance across Metrics**

ACS-ARR Gap – Weighted Average for 11th Ratings: **1.15 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **133% (deteriorating)** 

## **Relative Performance, Key Strengths and Improvement Areas**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.94 in FY21 to 1.64 in FY22
  - PBT (excl. Other Subsidy) declined from (-10%) of Revenue booked in FY21 to (-20%) in FY22
- AT&C losses have deteriorated marginally from 8.2% in FY21 to 8.4% in FY22
- Cash adjustment due to Trade Receivables has declined from (-3%) of the Revenue booked in FY21 to (-4%) in FY22

## **Key Strengths**

### Performance Excellence

• Billing Efficiency is high – currently at 95.4%

## **External Environment**

• Regulation supports automatic pass-through of fuel costs

## **Key Improvement Areas**

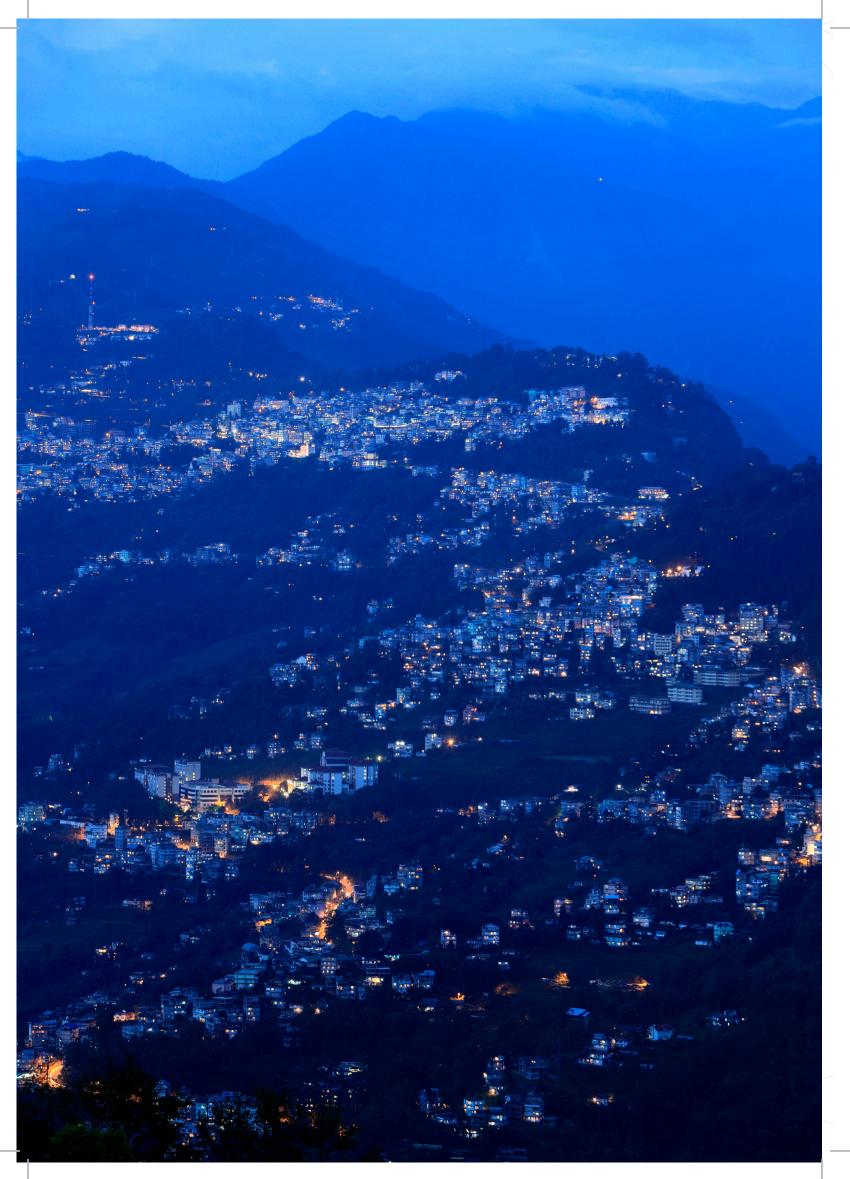

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 1.64
  - Negative PBT ((-20%) of Revenue booked)
  - Negative cash adjustment due to Trade Receivables ((-4%) of Revenue booked)

## Performance Excellence

• Separated and audited accounts can be made available for the power department

## Power & Electricity Department, Government of Mizoram (Mizoram PD)

## **Overview of Mizoram PD<sup>1</sup>**

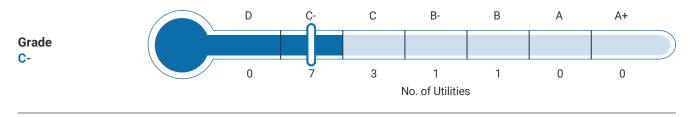

| Ownership                   | Power Department                          |
|-----------------------------|---|
| Nature of operations        | Generation, Transmission and Distribution |
| Area of operations          | State of Mizoram                          |
| Number of customers         | NA  |
| Gross input energy          | NA  |
| Total energy sold           | ΝΑ  |
| Revenue booked <sup>2</sup> | NA  |
| Profit after tax            | NA  |

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

- Mizoram PD score declined from 23.3 (10th Ratings) to 4.0 (11th Ratings)
- Mizoram PD, has not submitted their financials for the 11<sup>th</sup> Integrated Ratings Exercise. Hence, no marks have been awarded for metrics linked to financial accounts

Mizoram PD achieved Rank 7 (out of 11 power departments), with Grade C- and Integrated Score of 4.0 out of 100. Further, it exhibited a Declining Trajectory w.r.t. Integrated Score

FY 2020

## **Relative Performance, Key Strengths and Improvement Areas**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap improved marginally from 5.83 in FY21 to 5.72 in FY22
  - PBT (excl. Other Subsidy) improved from (-300%) of Revenue booked in FY21 to (-239%) in FY22
- AT&C losses have improved from 45.1% in FY21 to 41.3% in FY22 driven majorly by improvement in Billing Efficiency (from 54.9% in FY21 to 58.7% in FY22)

## **Key Improvement Areas**

### **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 5.72
  - Negative PBT ((-239%) of Revenue booked)

#### Performance Excellence

- Distribution losses may be reduced current losses are higher than SERC-approved levels
- Billing Efficiency can be improved currently at 58.7% (for max. score, expected is 90%+)
- Separated and audited accounts can be made available for the power department

#### **External Environment**

- Automatic pass-through of fuel costs can be implemented
- Regulatory support needed for issuance of True-up Order for FY21

## **Specific Disincentives**

- Regulator can determine cost-reflective Tariffs (currently tariffs are calculated after considering subsidy
- Tariff and True-up Orders, Tariff Petition should be issued within the rating timeline

## Electricity Department of Government of Puducherry (Puducherry PD)

## **Overview of Puducherry PD<sup>1</sup>**

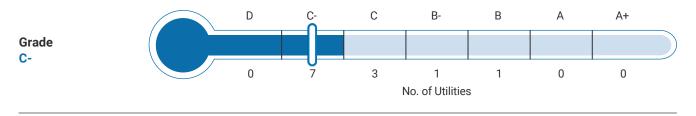

| Ownership                   | Power Department           |
|-----------------------------|----------------------------|
| Nature of operations        | Transmission, Distribution |
| Area of operations          | UT of Puducherry           |
| Number of customers         | NA                         |
| Gross input energy          | NA                         |
| Total energy sold           | NA                         |
| Revenue booked <sup>2</sup> | NA                         |
| Profit after tax            | NA                         |

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

- Puducherry PD score declined from 43.8 (10th Ratings) to -1.0 (11th Ratings)
- Puducherry PD, has not submitted their financials for the 11<sup>th</sup> Integrated Ratings Exercise. Hence, no marks have been awarded for metrics linked to financial accounts

Puducherry PD achieved Rank 9 (out of 11 power departments), with Grade C- and Integrated Score of -1.0 out of 100. Further, it exhibited a Declining Trajectory w.r.t. Integrated Score

## Power Department, Government of Sikkim (Sikkim PD)

## **Overview of Sikkim PD<sup>1</sup>**

| Ownership                   | Power Department                     |
|-----------------------------|--------------------------------------|
| Nature of operations        | Distribution and Transmission        |
| Area of operations          | State of Sikkim                      |
| Number of customers         | NA                                   |
| Gross input energy          | 1,216 MU (-2% change) <sup>3</sup>   |
| Total energy sold           | 1,041 MU (-3% change) <sup>3</sup>   |
| Revenue booked <sup>2</sup> | INR 448 Cr (-6% change) <sup>3</sup> |
| Profit after tax            | INR -78 Cr                           |

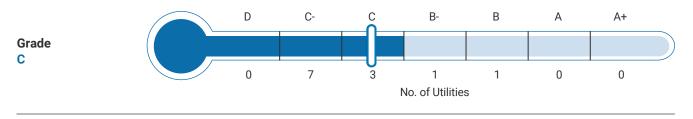

1. Values are from the latest available data.

2. Revenue booked does not include other regulatory income.

3. Compared to FY 2021.

- Sikkim PD score improved significantly from -0.3 (10th Ratings) to 32.7 (11th Ratings)
- Major improvement in ACS-ARR Gap Distribution Loss Actual as compared to Approved, Collection Efficiency metrics in FY22
- Data for FY22 for the 11<sup>th</sup> Rating Exercise sourced from Provisional accounts

Sikkim PD achieved Rank 4 (out of 11 utilities), with Grade C and Integrated Score of 32.7 out of 100. Further, it exhibited an Improving Trajectory w.r.t. Integrated Score

## Analysis of ACS-ARR Gap (In INR / kWh)

ACS-ARR Gap – Weighted Average for 11th Ratings: **0.78 INR / kWh** ACS-ARR Gap – 2-Year CAGR: **-39% (improving)** 

## **Relative Performance, Key Strengths and Improvement Areas**

## **Relative Performance (w.r.t FY21)**

- ACS-ARR Gap deteriorated from 0.55 in FY21 to 0.64 in FY22
  - PBT (excl. Other Subsidy) declined from (-14%) of Revenue booked in FY21 to (-17%) in FY22
- AT&C losses improved from 25.9% in FY21 to 22.2% in FY22 driven majorly by improvement in Billing Efficiency (from 74.1% in FY21 to 77.8% in FY22)

## **Key Strengths**

## **External Environment**

• Discom implements automatic pass-through of fuel costs

### Performance Excellence

• Collection Efficiency at 100%

#### **Key Improvement Areas**

## **Financial Sustainability**

- ACS-ARR Gap (cash adjusted) is significantly high currently at 0.64
  - Negative PBT ((-17%) of Revenue booked)

#### Performance Excellence

• Separated and audited accounts can be made available for the power department

## **Specific Disincentives**

Regulator can address the uncovered revenue gap – currently at 16% of ARR

## **APPENDIX 3.** Scoring methodology

## A. Scoring Methodology for State & Private Distribution Utilities

| S. No. | Parameter  | Score         |
|--------|--|---------------|
| Α      | Financial Sustainability   | 75            |
| 1      | ACS-ARR Gap (cash adjusted)  | 35            |
|        | Note: 3 years weighted average metric to be used for scoring with following weights: 60% for FY22, 25% for FY21 and 15% for FY20 |               |
|        | If equal to or less than -0.05, full marks to be awarded, else separate absolute & trajectory scoring applicable                 | 35            |
|        | Marks for absolute level   | 28            |
|        | Greater than -0.05 up to 0.9   | Proportionate |
|        | Greater than 0.9   | 0             |
|        | Marks for trajectory (applicable when latest ACS-ARR gap (cash adjusted) is less than or equal to 1.4)                           | 7             |
|        | 1 Year AGR of ACS-ARR gap (cash adjusted) is less than -5%   | 3.5           |
|        | 2 Year CAGR of ACS-ARR gap (cash adjusted) is less than -5%  | 3.5           |
| 2      | Days Receivable  | 3             |
|        | Equal to or less than 60 days  | 3             |
|        | Greater than 60 days up to 120 days  | Proportionate |

| 4      | Tariff Cycle Timelines  | 1             |
|        | Tariff order for the next year (T+1) issued by 31 Mar of the recently closed FY (T) for which audited accounts should be available        | 0.5           |
|        | True-up order for tariffs of the year (T-1) issued by 31 Mar of the recently closed FY (T) for which audited accounts should be available | 0.5           |
| 5      | Auto Pass Through of Fuel Costs   | 1             |
|        | If fuel costs are recovered on at least a quarterly basis   | 1             |
|        | If fuel costs are not recovered or if SERC does not allow fuel costs adjustment   | 0             |
| D      | Specific Disincentives  |               |
|        | Note 1: Cumulative impact on the score from all Specific Disincentives will be  |               |

capped at -10 marks, except for Red card metrics

| . No. | Parameter   | Score  |
|-------|---|--|
|       | Note 2: Red card metrics are: 1) Auditor's adverse opinion 2) Availability of audited accounts 3) Default to banks / FIs  |  |
|       | Disincentive score for these metrics is outside the -10 marks limit for Specific Disincentives and results in ineligibility for A+, A grades  |  |
|       | Auditor's Adverse Opinion   | -15  |
|       | For overall adverse opinion by auditor  | -15  |
|       | If the utility submits a provisional account for the evaluation year (T) and if the last submitted audited account had an adverse opinion, then the adverse opinion disincentive will continue to apply | -15  |
|       | Availability of Audited Accounts  | -15  |
|       | Note 1: Maximum disincentive for this metric will be capped at -15  |  |
|       | Note 2: If audited accounts are received before the rating date, this metric will not be treated as a red card and the overall capping limits for Specific Disincentives will apply                     |  |
|       | Note 3: Lenders may review previously awarded disincentives on receipt of audited accounts to make the process more dynamic   |  |
|       | Note 4: Timeline for submission of audited accounts is $30^{th}$ November for FY 2022 for the $11^{th}$ Integrated Rating Exercise  |  |
|       | Post Nov 30 of the next FY (T+1), audited accounts for the last closed FY (T) should be available, else monthly disincentive applicable   | -0.5 per month                               |
|       | If the utility only provides provisional accounts for the last closed FY (T) till the rating date, additional disincentive applicable   | -5 additional                                |
|       | If the utility does not have audited accounts for the previously closed 2 FYs (i.e., T-1 and T-2), then -5 marks additional disincentive per year applicable  | -5 per year<br>additional<br>(capped at -10) |
|       | Default to Banks / FIs  | -15  |
|       | Conditions for frequency of default   |  |
|       | If there is default to any 1 lender in auditor's report   | 25% of yearly<br>disincentives               |
|       | If there is default to any 2 lenders in auditor's report  | 50% of yearly<br>disincentives               |
|       | If there is default to any 3 or more lenders in auditor's report  | 100% of yearly<br>disincentives              |
|       | Yearly disincentives for frequency of default   |  |
|       | Default in last closed FY (T)   | -4   |
|       | Default in year (T-1)   | -3   |
|       | Default in year (T-2)   | -2   |
|       | Default to PFC or REC including quantum of default  |  |
|       | If there is any default to PFC or REC as of last quarter closing of ongoing FY (T+1)  |  |
