ORDER

The report of the Committee is on record. Respondent No.3, Central Pollution Control Board, filed the reply which is on record. MPSEIAA has filed the reply. During the course of hearing, it was argued that report reveals a huge gap among quantity of generation, quantity of collection and the quantity of waste disposal including variations with the figures uploaded on the website by the State Pollution Control Board. It is further argued that the existing facilities are working, below capacity (on average about 30 % of capacity). The version of the SEIAA is that there a significant gap between the number of beds registered with the MPPCB and CBWTF and, therefore, the fresh gap analysis needs to be conducted by the MPPCB, so that further required action may be initiated and taken by the SEIAA. Leaned counsel appearing for the State Pollution Control Board has submitted that MPPCB has not been arrayed as party. Learned counsel for the applicant has made a request to

implead MPPCB as a respondent. In the matters of environment, violation of environment or compliance of environmental rules, we are of the view that the State PCB is a necessary party and can be made as a party to respond, reply and also to ensure compliance of environmental rules. The detailed report by the MPPCB may be filed before the next date of hearing. All the respondents are directed to file their reply before the next date of hearing.
