FOREWORD

It is my proud privilege to present the 69th edition of our annual 'Crime in India' report for the year 2021. The report published since 1953, covering various aspects of crime, is a principal reference document for the stakeholders for evaluation of the prevalent situation, planning policies and creating deterrence for future occurrence of crime in the society.

Crime is a highly complex phenomenon that changes across cultures and across time. Increased population, technological advancements and heightened competition for economic resources have brought about change in crime and its pattern as well and this has thrown new challenges to the law enforcement agencies. The concern with crime is well justified given its pernicious effects on economic activity and formulation of effective policies is a vital corollary to prevention of crime. The statistics in the report are essential in formulation of policies on the basis of quantitative facts.

The Bureau has been collecting data on various aspects of crime from States/UTs and collating it in a form of a report. Over the years, the report has proven itself to be a reference publication for evidence based policy formulation. The data is also used by researchers for in-depth analysis of the subject for developing theories for better understanding of criminogenic factors.

The Bureau has been once again successful in timely publication of the report. This could not have been possible without the support and co-operation extended by States/UTs. I take this opportunity to express my sincere gratitude to the Heads of States/UT Police, Directors of SCRBx/CID and their teams for their efforts in timely sharing of data with the Bureau.

I also take the opportunity to appreciate the Officers and staff of Statistical Branch, NCRB for their hardwork and dedication, that has resulted in the timely publication of the report.

Like previous years, the Crime in India-2021 report is available in digital format and it can be freely accessed by all the stakeholders by accessing our website https://ncrb.gov.in.

Any suggestions and feedback for further improvement in content and quality of the publication would be highly appreciated.

Disclaimer

1. The information published in this report has been obtained from States/UTs Police and CAPFs/CPOs. National Crime Records Bureau has only compiled and collated the data and presented it in the form of this report. As data is being furnished by States/UTs/ CAPFs/CPOs, NCRB is not responsible for authenticity of the information. However, any discrepancy observed in this report may be brought to the notice of the Bureau.

Limitations

1. Since the publication caters to the 'Principal Offence Rule' for classification of crime, the actual count of each crime head may be under reported. This is because among many offences registered in a single FIR case, only most heinous crime (maximum punishment) will be considered as counting unit. Hence, there is likelihood of some IPC/SLL cases getting under reported as they are hidden under major IPC crimes. For example, Murder with Rape is accounted as Murder; Dowry Prohibition Act when applied along with Dowry Death (304B of IPC) will be counted as Dowry Death only.
2. The Socio-economic causative factors or reasons of crimes are not being captured by the Bureau. Only police recorded crime cases are being captured for this publication.
3. Crime Rates (Crime per lakh population) of States/UTs have been arrived at using the Mid-Year Projected Population of respective States/UTs of 2021 based on 2011 census (Report of the Technical Group on Population Projections, July, 2020, National Commission on Population, Ministry of Health & Family Welfare). However, this is not available in respect of metropolitan cities. Crime Rates for Metropolitan cities have been calculated using Actual Population Census 2011. Hence, Crime Rates of States and Metropolitan cities are not comparable.
4. 'Crime Rate' is not calculated for City-wise Crimes under 'Children, SCs/STs & Senior Citizens' due to non-availability of Population figures of these groups in the cities.
5. Due to non-receipt of validated data from Anti-Corruption Bureaux of Kerala and Chhattisgarh for 'Chapter 8C-Prevention of Corruption Act' for the year 2019 and 2020, the data furnished for 2018 had instead been used in CII-2019 and CII-2020 for arriving at National figures/trends. Now, the Prevention of Corruption Act data for 2019 and 2020 from Kerala and Chhattisgarh has been received and has been factored in the above mentioned chapter.

Methodology for Data Collection & Publication

A) Data Collection and Compilation Process

Crime in India – 2021 deals with the crime data which refers to the calendar year (1st January to 31st December of 2021). The data collection process including clarifications from the States/UTs/Central Agencies started in Jan, 2022 and continued till June, 2022.

a) State/UT Police:

i. The annual State/UT data for "Crime in India" is furnished by the 36 States/UTs in the NCRB prescribed proformae through a software application developed by NCRB.

ii. Similar data is also furnished for 53 Metropolitan Cities by respective SCRBs /CIDs (i.e. Metropolitan Cities which have the population of 1 million (10 lakh) or more as per Population Census, 2011). However, data pertaining to only 19 Metropolitan Cities which have crossed the population of 2 million (20 lakhs) is being published in hard copy. The data for remaining 34 Metropolitan Cities would, however, be available on NCRB Website.

iii. Delhi UT comprises of both Delhi City and rural part of Delhi.

iv. The data is entered by State/UT Police at Police Station/District level.

v. A training is conducted every year for the functional officials (Police constables, HCs, ASIs, SIs, etc. from all States/UTs) to explain the various issues concerning entry of data in input tables.

vi. The consolidation of District/State level data is done by State Police Agencies (SCRB/ CID).

vii. First level data validation is done at the Police Station/District level during the data capturing process itself and Second level data validation is done at the state level at the time of consolidation of District data through the NCRB application.

viii. Data is scrutinized at NCRB for discrepancy / inconsistency. The same, if any, are communicated to the respective State/UT for verification and rectification.

ix. Amendments/Rectifications, if any, in the data are incorporated in the database by NCRB.

b) Central Law Enforcement Agencies/CAPFs:

Details of seizures and prosecutions under Prevention of Corruption Act, Direct Taxes Enactments, Customs Act, NDPS Act, etc. as being furnished by CAPFs (Assam Riffles, Border Security Force, Central Industrial Security Force, Central Reserve Police Force, Indo Tibetan Border Police and Sashastra Seema Bal) and the respective Central Law Enforcement Agencies (viz. CBI, Central Board of Direct Taxes, DRI, Narcotics Control Bureau, NIA and Central Board of Indirect Taxes & Customs) have been published under Chapter 20C & Chapter 20D respectively

c) Compilation at NCRB:

i. After receiving final data from all States/UTs including Metropolitan Cities, All-India data is generated by NCRB.

ii. The National Level tables for the "Crime in India" publication are generated through the application and cross checked for discrepancy, if any.

iii. Calculations used in columns, if any, are mentioned at the bottom of the respective table.

B) Methodology Adopted for the Present Publication (2021)

a) Principal Offence Rule:

As per the International Standard, the Bureau follows 'Principal Offence Rule' for counting of crime. In other words Principal Offence Rule refers to the system of recording each criminal incident as one crime. If many offences are registered in a single FIR case, only the most heinous crime i.e. the one that attracts maximum punishment will be considered as counting unit.

CRIME STATISTICS - A WORD OF CAUTION!

Crime is manifestation of myriad complex factors. The causes of criminal behavior lie in the social processes and structures. People commit crimes due to the process of socialization that does not develop strong sense of right or wrong and ever-increasing desires act as strong stimulus for taking to crime to fulfill these desires. The genesis of crime can be traced to interplay of various social, economic, demographic, local and institutional factors. The presumption that crime occurs because of the failures of police therefore exhibits a lack of mature understanding of the theories of criminal behavior.

Further, these social factors along with other latent and concomitant factors vary significantly across different regions, states and societies. The differences in procedures over large geographical regions and method of functioning inherent between organizations also creates wide variations. Hence, any comparison among States/districts/regions/social groups etc. on the basis of these published data alone will be too simplistic and is best avoided.

Further, no weightage has been assigned to the gravity or nature of the crime. All crimes have thus been treated equal in counting the total crime for a State or City. More crime registered say, in a city is, therefore, not an indicator of its being comparatively unsafe than the city, where total crime may be less.

Lastly, as crime increases with population, Crime per lakh population (*Crime Rate*) may be a better indicator to assess increase or decrease in crime. However, a word of caution here! The primary presumption that the upward swing in police data indicates an increase in crime and thus a reflection of the ineffectiveness of the police is fallacious. ‘Rise in crime’ and ‘increase in registration of crime by police’ are clearly two different things, a fact which requires better understanding. Thus an oft-repeated expectation from certain quarters that an effective police administration will be able to keep the crime figures low is misplaced. Increase in crime numbers in a State police data may in fact be on account of certain citizen centric police initiatives, like launching of e-FIR facility or women Helpdesks, etc. The increase or decrease in crime numbers, however, does call for a professional investigation of underlying factors jointly with local communities to suitably address the issues involved.

Chapter 1A

Summary

(States & UTs)

Certain States like Uttar Pradesh, Delhi, etc. have provided the citizen friendly service of Online Registration of FIR under certain category of offences like 'Vehicle Theft' and 'Other Thefts'. As this may have increased the crime reporting under such heads in these States, they become statistically non-comparable with other States not having such online registration facility.

Chapter 1B

Summary

(Metropolitan Cities)

(19 Cities with more than 2 Million Population)

Certain States like Uttar Pradesh, Delhi, etc. have provided the citizen friendly service of Online Registration of FIR under certain category of offences like 'Vehicle Theft' and 'Other Thefts'. As this may have increased the crime reporting under such heads in these States, they become statistically non-comparable with other States not having such online registration facility.

Disclaimer

1. The information published in this report has been obtained from States/UTs Police and CAPFs/CPOs. National Crime Records Bureau has only compiled and collated the data and presented it in the form of this report. As data is being furnished by States/UTs/ CAPFs/CPOs, NCRB is not responsible for authenticity of the information. However, any discrepancy observed in this report may be brought to the notice of the Bureau.

Limitations

1. Since the publication caters to the 'Principal Offence Rule' for classification of crime, the actual count of each crime head may be under reported. This is because among many offences registered in a single FIR case, only most heinous crime (maximum punishment) will be considered as counting unit. Hence, there is likelihood of some IPC/SLL cases getting under reported as they are hidden under major IPC crimes. For example, Murder with Rape is accounted as Murder; Dowry Prohibition Act when applied along with Dowry Death (304B of IPC) will be counted as Dowry Death only.
2. The Socio-economic causative factors or reasons of crimes are not being captured by the Bureau. Only police recorded crime cases are being captured for this publication.
3. Crime Rates (Crime per lakh population) of States/UTs have been arrived at using the Mid-Year Projected Population of respective States/UTs of 2021 based on 2011 census (Report of the Technical Group on Population Projections, July, 2020, National Commission on Population, Ministry of Health & Family Welfare). However, this is not available in respect of metropolitan cities. Crime Rates for Metropolitan cities have been calculated using Actual Population Census 2011. Hence, Crime Rates of States and Metropolitan cities are not comparable.
4. 'Crime Rate' is not calculated for City-wise Crimes under 'Children, SCs/STs & Senior Citizens' due to non-availability of Population figures of these groups in the cities.
5. Due to non-receipt of validated data from Anti-Corruption Bureaux of Kerala and Chhattisgarh for 'Chapter 8C-Prevention of Corruption Act' for the year 2019 and 2020, the data furnished for 2018 had instead been used in CII-2019 and CII-2020 for arriving at National figures/trends. Now, the Prevention of Corruption Act data for 2019 and 2020 from Kerala and Chhattisgarh has been received and has been factored in the above mentioned chapter.

Methodology for Data Collection & Publication

A) Data Collection and Compilation Process

Crime in India – 2021 deals with the crime data which refers to the calendar year (1st January to 31st December of 2021). The data collection process including clarifications from the States/UTs/Central Agencies started in Jan, 2022 and continued till June, 2022.

a) State/UT Police:

i. The annual State/UT data for "Crime in India" is furnished by the 36 States/UTs in the NCRB prescribed proformae through a software application developed by NCRB.

ii. Similar data is also furnished for 53 Metropolitan Cities by respective SCRBs /CIDs (i.e. Metropolitan Cities which have the population of 1 million (10 lakh) or more as per Population Census, 2011). However, data pertaining to only 19 Metropolitan Cities which have crossed the population of 2 million (20 lakhs) is being published in hard copy. The data for remaining 34 Metropolitan Cities would, however, be available on NCRB Website.

iii. Delhi UT comprises of both Delhi City and rural part of Delhi.

iv. The data is entered by State/UT Police at Police Station/District level.

v. A training is conducted every year for the functional officials (Police constables, HCs, ASIs, SIs, etc. from all States/UTs) to explain the various issues concerning entry of data in input tables.

vi. The consolidation of District/State level data is done by State Police Agencies (SCRB/ CID).

vii. First level data validation is done at the Police Station/District level during the data capturing process itself and Second level data validation is done at the state level at the time of consolidation of District data through the NCRB application.

viii. Data is scrutinized at NCRB for discrepancy / inconsistency. The same, if any, are communicated to the respective State/UT for verification and rectification.

ix. Amendments/Rectifications, if any, in the data are incorporated in the database by NCRB.

b) Central Law Enforcement Agencies/CAPFs:

Details of seizures and prosecutions under Prevention of Corruption Act, Direct Taxes Enactments, Customs Act, NDPS Act, etc. as being furnished by CAPFs (Assam Riffles, Border Security Force, Central Industrial Security Force, Central Reserve Police Force, Indo Tibetan Border Police and Sashastra Seema Bal) and the respective Central Law Enforcement Agencies (viz. CBI, Central Board of Direct Taxes, DRI, Narcotics Control Bureau, NIA and Central Board of Indirect Taxes & Customs) have been published under Chapter 20C & Chapter 20D respectively

c) Compilation at NCRB:

i. After receiving final data from all States/UTs including Metropolitan Cities, All-India data is generated by NCRB.

ii. The National Level tables for the "Crime in India" publication are generated through the application and cross checked for discrepancy, if any.

iii. Calculations used in columns, if any, are mentioned at the bottom of the respective table.

B) Methodology Adopted for the Present Publication (2021)

a) Principal Offence Rule:

As per the International Standard, the Bureau follows 'Principal Offence Rule' for counting of crime. In other words Principal Offence Rule refers to the system of recording each criminal incident as one crime. If many offences are registered in a single FIR case, only the most heinous crime i.e. the one that attracts maximum punishment will be considered as counting unit.

CRIME STATISTICS - A WORD OF CAUTION!

Crime is manifestation of myriad complex factors. The causes of criminal behavior lie in the social processes and structures. People commit crimes due to the process of socialization that does not develop strong sense of right or wrong and ever-increasing desires act as strong stimulus for taking to crime to fulfill these desires. The genesis of crime can be traced to interplay of various social, economic, demographic, local and institutional factors. The presumption that crime occurs because of the failures of police therefore exhibits a lack of mature understanding of the theories of criminal behavior.

Further, these social factors along with other latent and concomitant factors vary significantly across different regions, states and societies. The differences in procedures over large geographical regions and method of functioning inherent between organizations also creates wide variations. Hence, any comparison among States/districts/regions/social groups etc. on the basis of these published data alone will be too simplistic and is best avoided.

Further, no weightage has been assigned to the gravity or nature of the crime. All crimes have thus been treated equal in counting the total crime for a State or City. More crime registered say, in a city is, therefore, not an indicator of its being comparatively unsafe than the city, where total crime may be less.

Lastly, as crime increases with population, Crime per lakh population (*Crime Rate*) may be a better indicator to assess increase or decrease in crime. However, a word of caution here! The primary presumption that the upward swing in police data indicates an increase in crime and thus a reflection of the ineffectiveness of the police is fallacious. ‘Rise in crime’ and ‘increase in registration of crime by police’ are clearly two different things, a fact which requires better understanding. Thus an oft-repeated expectation from certain quarters that an effective police administration will be able to keep the crime figures low is misplaced. Increase in crime numbers in a State police data may in fact be on account of certain citizen centric police initiatives, like launching of e-FIR facility or women Helpdesks, etc. The increase or decrease in crime numbers, however, does call for a professional investigation of underlying factors jointly with local communities to suitably address the issues involved.

Disclaimer

1. The information published in this report has been obtained from States/UTs Police and CAPFs/CPOs. National Crime Records Bureau has only compiled and collated the data and presented it in the form of this report. As data is being furnished by States/UTs/ CAPFs/CPOs, NCRB is not responsible for authenticity of the information. However, any discrepancy observed in this report may be brought to the notice of the Bureau.

Limitations

1. Since the publication caters to the 'Principal Offence Rule' for classification of crime, the actual count of each crime head may be under reported. This is because among many offences registered in a single FIR case, only most heinous crime (maximum punishment) will be considered as counting unit. Hence, there is likelihood of some IPC/SLL cases getting under reported as they are hidden under major IPC crimes. For example, Murder with Rape is accounted as Murder; Dowry Prohibition Act when applied along with Dowry Death (304B of IPC) will be counted as Dowry Death only.
2. The Socio-economic causative factors or reasons of crimes are not being captured by the Bureau. Only police recorded crime cases are being captured for this publication.
3. Crime Rates (Crime per lakh population) of States/UTs have been arrived at using the Mid-Year Projected Population of respective States/UTs of 2021 based on 2011 census (Report of the Technical Group on Population Projections, July, 2020, National Commission on Population, Ministry of Health & Family Welfare). However, this is not available in respect of metropolitan cities. Crime Rates for Metropolitan cities have been calculated using Actual Population Census 2011. Hence, Crime Rates of States and Metropolitan cities are not comparable.
4. 'Crime Rate' is not calculated for City-wise Crimes under 'Children, SCs/STs & Senior Citizens' due to non-availability of Population figures of these groups in the cities.
5. Due to non-receipt of validated data from Kerala and Chhattisgarh for 'Chapter 8C-Prevention of Corruption Act' from Anti-Corruption Bureaux for the year 2019 and 2020, and therefore the data furnished for 2018 had instead been used in that publication for arriving at National figures/trends. Now, the data for 2019 and 2020 from Kerala and Chhattisgarh has been received and has been factored in the above mentioned chapter.

Methodology for Data Collection & Publication

A) Data Collection and Compilation Process

Crime in India – 2021 deals with the crime data which refers to the calendar year (1st January to 31st December of 2021). The data collection process including clarifications from the States/UTs/Central Agencies started in Jan, 2022 and continued till June, 2022.

a) State/UT Police:

i. The annual State/UT data for "Crime in India" is furnished by the 36 States/UTs in the NCRB prescribed proformae through a software application developed by NCRB.

ii. Similar data is also furnished for 53 Metropolitan Cities by respective SCRBs /CIDs (i.e. Metropolitan Cities which have the population of 1 million (10 lakh) or more as per Population Census, 2011). However, data pertaining to only 19 Metropolitan Cities which have crossed the population of 2 million (20 lakhs) is being published in hard copy. The data for remaining 34 Metropolitan Cities would, however, be available on NCRB Website.

iii. Delhi UT comprises of both Delhi City and rural part of Delhi.

iv. The data is entered by State/UT Police at Police Station/District level.

v. A training is conducted every year for the functional officials (Police constables, HCs, ASIs, SIs, etc. from all States/UTs) to explain the various issues concerning entry of data in input tables.

vi. The consolidation of District/State level data is done by State Police Agencies (SCRB/ CID).

vii. First level data validation is done at the Police Station/District level during the data capturing process itself and Second level data validation is done at the state level at the time of consolidation of District data through the NCRB application.

viii. Data is scrutinized at NCRB for discrepancy / inconsistency. The same, if any, are communicated to the respective State/UT for verification and rectification.

ix. Amendments/Rectifications, if any, in the data are incorporated in the database by NCRB.

b) Central Law Enforcement Agencies/CAPFs:

Details of seizures and prosecutions under Prevention of Corruption Act, Direct Taxes Enactments, Customs Act, NDPS Act, etc. as being furnished by CAPFs (Assam Riffles, Border Security Force, Central Industrial Security Force, Central Reserve Police Force, Indo Tibetan Border Police and Sashastra Seema Bal) and the respective Central Law Enforcement Agencies (viz. CBI, Central Board of Direct Taxes, DRI, Narcotics Control Bureau, NIA and Central Board of Indirect Taxes & Customs) have been published under Chapter 20C & Chapter 20D respectively

c) Compilation at NCRB:

i. After receiving final data from all States/UTs including Metropolitan Cities, All-India data is generated by NCRB.

ii. The National Level tables for the "Crime in India" publication are generated through the application and cross checked for discrepancy, if any.

iii. Calculations used in columns, if any, are mentioned at the bottom of the respective table.

B) Methodology Adopted for the Present Publication (2021)

a) Principal Offence Rule:

As per the International Standard, the Bureau follows 'Principal Offence Rule' for counting of crime. In other words Principal Offence Rule refers to the system of recording each criminal incident as one crime. If many offences are registered in a single FIR case, only the most heinous crime i.e. the one that attracts maximum punishment will be considered as counting unit.

CRIME STATISTICS - A WORD OF CAUTION!

Crime is manifestation of myriad complex factors. The causes of criminal behavior lie in the social processes and structures. People commit crimes due to the process of socialization that does not develop strong sense of right or wrong and ever-increasing desires act as strong stimulus for taking to crime to fulfill these desires. The genesis of crime can be traced to interplay of various social, economic, demographic, local and institutional factors. The presumption that crime occurs because of the failures of police therefore exhibits a lack of mature understanding of the theories of criminal behavior.

Further, these social factors along with other latent and concomitant factors vary significantly across different regions, states and societies. The differences in procedures over large geographical regions and method of functioning inherent between organizations also creates wide variations. Hence, any comparison among States/districts/regions/social groups etc. on the basis of these published data alone will be too simplistic and is best avoided.

Further, no weightage has been assigned to the gravity or nature of the crime. All crimes have thus been treated equal in counting the total crime for a State or City. More crime registered say, in a city is, therefore, not an indicator of its being comparatively unsafe than the city, where total crime may be less.

Lastly, as crime increases with population, Crime per lakh population (*Crime Rate*) may be a better indicator to assess increase or decrease in crime. However, a word of caution here! The primary presumption that the upward swing in police data indicates an increase in crime and thus a reflection of the ineffectiveness of the police is fallacious. ‘Rise in crime’ and ‘increase in registration of crime by police’ are clearly two different things, a fact which requires better understanding. Thus an oft-repeated expectation from certain quarters that an effective police administration will be able to keep the crime figures low is misplaced. Increase in crime numbers in a State police data may in fact be on account of certain citizen centric police initiatives, like launching of e-FIR facility or women Helpdesks, etc. The increase or decrease in crime numbers, however, does call for a professional investigation of underlying factors jointly with local communities to suitably address the issues involved.

Chapter 14

Human Trafficking

(States & UTs)

Chapter-14
Human Trafficking

Trafficking in Persons is a serious crime that gravely violates basic human rights. Traffickers often exploit the vulnerabilities of people by making false promises of a new job, better living condition and support to their families etc. Such promises may appear legitimate to people, but it makes many men, women and children easy prey for exploitation.

In order to strengthen the law enforcement response against trafficking in persons, Ministry of Home Affairs has released funds to State Governments from time to time for setting up Anti Human Trafficking Units (AHTUs) in all districts of States/UTs. They are tasked with investigation of Human Trafficking cases and build up database on such cases including on criminals involved. Rs. 100 crore from Nirbhaya fund has been allocated for setting up new AHTUs and for strengthening of existing AHTUs. As per data provided by States/UTs, so far 768 AHTUs are functional and 20 States/UTs have achieved their target of setting up AHTUs in all districts (Table 14.8).

NCRB started collecting data on human trafficking cases from these Anti-Human Trafficking Units across the country since 2016 and since then it has been publishing such data under a separate chapter titled "Human Trafficking". As per data provided by States/UTs, 2,189 cases of Human Trafficking have been registered by AHTUs of States/UTs during 2021. Highest number of the cases have been registered in Telangana (347 cases), Maharashtra (320 cases), and Assam (203 cases).

The data collated in the following tables has been provided by AHT Units through their State Crime Records Bureau. This data represents only those trafficking cases which have been registered by respective AHTUs. Hence, it is advisable not to compare these figures with those given under different laws/sections of human trafficking elsewhere in the Report.
