## PREFACE

For progressive improvement in the economic growth of a developing country like India, sustainable energy supply is of paramount significance. Coal, being a relatively cheap and abundant energy resource in contrast to a very low hydrocarbon resource potential in India, remains the focus of attention of the energy planners ever since the oil crunch of the early seventies as well as ever increasing energy demand in the country. For making a strategic coal sector plan for the country on a continuing basis, a sound data base is a must.

Coal Statistics, therefore, assumes paramount significance to meet the requirements of the Central Government, different Government Bodies, planners etc. 'Coal Directory of India' incorporating firmed up data of the previous year is brought out every year around October/November. To meet the immediate requirement, **Provisional Coal Statistics 2008-09** like previous few years is now being brought out utilizing available data bank of this organization.

This issue incorporates provisional information of the preceding financial year along with past few years' information on Reserve, Production, Despatches, Pit-head Closing Stock, Import & Export of coal, coal products etc. Information on lignite is also included.

The publication of this Provisional Coal Statistics should meet the immediate demand of its users associated with the energy sector especially related to Coal & Lignite sectors.

## **EXECUTIVE SUMMARY:**

### **INDIAN COAL SCENARIO: 2008-09**

#### **Overall Coal Demand and Supply**

Planning Commission of India had assessed the demand of Raw Coal for 2008-09 at 550.00 Mill Tonnes (Mt) (including colliery consumption and export). Against this demand, indigenous supply was expected at 497.29 Mt and materialization through import was to be at 53.17 Mt (coking - 17.80 Mt, non coking - 35.36 Mt.)

Actual Supply of Raw coal was at 489.85 mill tonnes from indigenous sources, whereas import estimated to have taken place is 59.0 Mill Tonnes, comprising of 24 Mt of coking and 35 Mt of non coking coal, during the year 2008-09.

#### **Production of Coal & Lignite**

Continuing with its dominant role in the commercial energy spectrum of the country, the All-India (including that of Meghalaya) Coal production improved to 492.95 Mt in 2008-09 from 457.08 Mt in 2007-08, thus grew by 7.8% over the last year. Out of about 36 Mt increase in production, CIL and SCCL contributed 24 Mt and 4 Mt respectively, rest 8 Mt from captive blocks.

Lignite production, however, witnessed negative growth of 4.6% over previous year.

#### **Contribution of OC & UG Mines (Coal)**

The contribution from OC mines continued to increase further whereas that from UG mines remained stable in quantity but declined in percentage share of total raw coal production.

During 2008-09, All-India OC contribution has recorded 433.932 Mt (88.03%) as compared to 398.182 Mt (87.11%) during 2007-08. The corresponding figures for UG mines are 59.01 Mt (11.97%) and 58.90 Mt (112.89%) respectively in the two successive years under review. Thus production from OC mines achieved growth of 8.98% and that for UG mine is 0.15%

#### **Performance of Coal Companies**

Coal India Ltd. (CIL), a Govt. of India Undertaking produced 403.73 Mt (81.9% of All India production) against its target (B.E) of 405.00 Mt during the year. Singareni Collieries Co.(SCCL), an Undertaking of Andhra Pradesh State Govt. and Govt. of India produced 44.54 Mt against the target(B.E) of 41.50 Mt having 9.0% All India share during 2008-09. CIL and SCCL produced 379.46 (83.0% share) and 40.604 Mt (8.9% share) respectively in the last year.

#### **Production (Mt): 2008-09**

Company	Production		Achvmt. (%)
	Target	Achievement	
CIL	405.00	403.73	99.7
SCCL	41.50	44.54	107.3
Others	50.79	44.68	88.0
<b>TOTAL</b>	<b>497.29</b>	<b>492.95</b>	<b>99.1</b>

#### **Off Take (Mt): 2008-09**

Company	Despatches		Achvmt. (%)
	Target	Achievement	
CIL	405.00	401.41	99.11
SCCL	41.50	44.53	107.30
Others	50.79	43.92	86.47
<b>TOTAL</b>	<b>497.29</b>	<b>489.86</b>	<b>98.51</b>

## Productivity

Productivity, in terms of OMS, has witnessed steady increase during the year in opencast as well as in underground mines of CIL. CIL improved OMS from 8.60 in last year to 8.95 in the year under reference in case of OC mines and from 0.73 to 0.76 for UG mines. Overall OMS of CIL is estimated at 4.09 during the year 08-09 in comparison of last year's 3.79.

However, OMS has declined in case of OC mines of SCCL, from 10.75 in 2007-08 to 10.41 in 2008-09, OMS in UG mines slightly improved from 1.02 (2007-08) to 1.05 (2008-09). But due to the fact that almost entire increase in production is in OC mine, thus source mix was tilted towards OC, the overall OMS of SCCL has improved from 2.63 ( 2007-08) to 3.00 (2008-09)

## Sector wise Despatches / Off-take

All India raw coal dispatches during 2008-09 to other sectors are as follows:-

Sector	Target (Mt)	Actual (Mt)	Achieved (%)
Steel	18.74	16.84	88.8%
Power (U)	336.69	344.57	102.3%
Power (captive)	44.16	29.92	67.7%
Sponge Iron	25.19	19.33	76.7%
Cement	13.76	15.28	111.1%

During the year, for **power generation (utilities)**, CIL despatched 295.54 Mt. against MOC target of 292.93 Mt. and SCCL despatched 30.12 Mt. against target of 28.88 Mt. Thus, CIL and SCCL achieved 100.9% and 104.3% of their targets in case of power (U). It may be mentioned that CIL and SCCL despatched 73.63% and 67.64% of its total raw coal for power (U). All India raw coal despatches to power utilities were at 344.57 Mt. (70.34% of total despatches) against the target of 336.69

Mt. All India achievement stood at 102.3%. Beside excellent performance of CIL and SCCL, some existing captive blocks, viz., Panem and JPL improved its despatch to power utilities resulted such overall improvement. The details of sectorwise targets and despatches to these sectors by CIL, SCCL and others are reported in table 1.2.

## Pit-head Closing Stock of Coal & Lignite

Pit-head vendible closing stock of indigenous coal was further increased to 48.93 Mt, a growth of 4.60% whereas that of lignite 0.902 Mt.

At the end of the year, CIL alone was having pit-head closing stock at 48.09 Mt - thus covering 98.3% of share of total stock. SCCL held only 0.15 Mt stock at the end of the year covering mere 0.3% of share.

## Import and Export of Coal

Due to non availability of detail coal import and export data of 2008-09 from DGCI&S, import of coking, non coking and coke estimated based on detailed data received up to Nov 2008. It is estimated that during the year, total import of coal would be around 59.0 Mt comprising of 24.00 Mt of coking coal and 35.00 Mt of non-coking coal. Coke import is estimated at 2.00 Mt.

Indian coal is traditionally high ash coal and of low calorific value. Imported coking coal, mostly from Australia, was mainly used in steel sector on quality consideration. On the other hand, non-coking coal, mostly imported from Indonesia and South Africa, is used in power sectors and cement sector also mainly on cost/ quality consideration.

- 2 Import of the year is estimated.
- 3 Supply of metallurgical coal has been reported against steel, but coking coal used for non metallurgical purpose has been reported against sector meant to receive non coking coal.
- 4 Supply to cement by CIL as shown above is not inclusive of supply to its CPP.

Note It is assumed that there is no change in industrial stock. Washed coal has been converted into raw coal equivalent.

Sectorwise despatch of lignite estimated for GMDCL and RSMLL.

Import and export of coal have been estimated based on DGCI&S data up to Nov 08 and market trend thereafter.

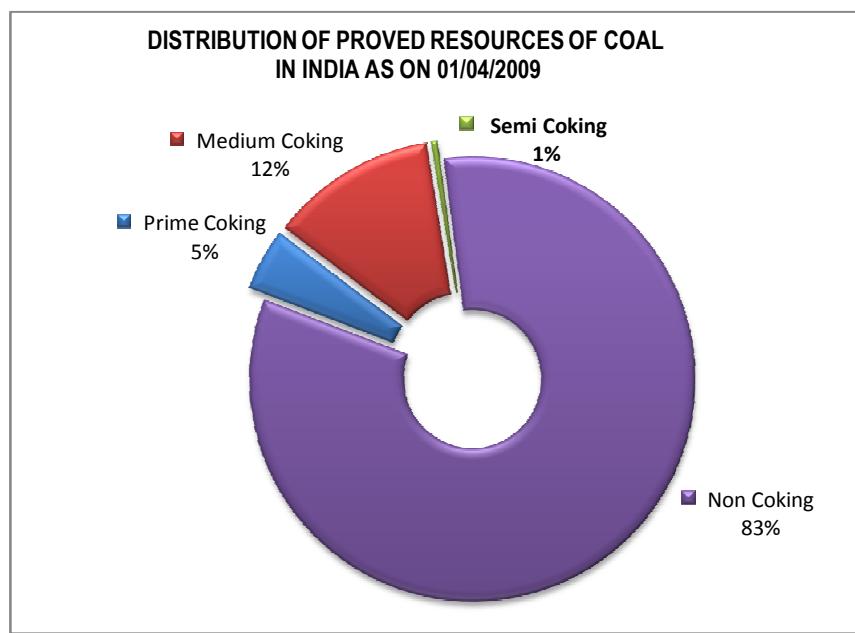

Statistical Difference is large mainly due to mismatch of equation: Stock change + production # offtake in case of some large companies.

Note: GR=Geological Reserves as estimated during allocation.

PRC = peak rated capacity ( in mill tonnes).

Peak rated capacities are not available for all the blocks, hence estimated.

GR as reported during allotment may be modified during approval of Mine Plan.
